

PSC Solution: 144439a

Revision: Changed School Year to ALL

Date: 1/28/2011

Application: ESS

School Year: ALL

File Specifications: N/X059 – Staff FT Equivalent (FTE)

Solution Type: Known Issue

Title: Errors S059-R55 and S059-R58 when staff FTE permitted values are not applicable

Issue Description:

When submitting file N/X059, states for which the LEAADM, LEASUP, SCHADM, or SCHSUP permitted values do not apply can receive submission error S059-R55 or S059-R58. The business rule logic in ESS assumes that all states offer four permitted values as follows:

S059-R55

- Edit Logic: Raise the error if the following LEA Staff FTE permitted values are not submitted (null): LEAADM, LEASUP.
- The edit identifies when valid Staff FTE values must be present for all LEAs. The values for LEA administrative staff and support personnel are always required.

S059-R58

- Edit Logic: Raise the error if the following LEA Staff FTE permitted values are not submitted (null), and the LEA has at least one school associated with it: SCHADM, SCHSUP.
- The edit identifies when valid Staff FTE values must be present for an LEA. The values for School administrative staff and support personnel are required when the LEA has associated schools.

Solution:

If you have validated with your state's data owner that one or more of these permitted values is not applicable for your state, use the following as a workaround. Report '0' for each of the not applicable permitted values in the N/X059 file, which will avoid triggering these submission errors.
