

PSC Solution: TIP0081

Date: 9/29/11

Application: ERS

School Year: ALL

File Specifications: N/A

Solution Type: Technical Tip

Title: Optimizing Data Quality reports

Issue Description:

Data Quality Reports can be generated in the same way every other *EDFacts* report is created: by selecting an individual report, entering a school year into a manual field and generating that report.

To optimize use of these reports, users may generate reports for multiple years for longitudinal comparison by using the "Data Quality Reports Cover". The "Data Quality Reports Cover" also provides users with a hyperlinked list of available data quality reports.

To generate a report, check-mark the school year or years to include in the report and click on the report name, provided in the list at the bottom of the "Data Quality Reports Cover."

The "Data Quality Reports Cover" can be found in the "*EDFacts* Data Collection" folder located in ERS.
