## Introduction

This Fast Facts report provides a national profile of the regular Upward Bound (UB) and Upward Bound Math-Science (UBMS) programs-two of the seven Federal TRIO programs (TRIO) funded by the U.S. Department of Education (ED) that provide direct services to students.

TRIO Fast Facts reports present information on program funding, program outcomes, and characteristics of program participants. Fast Facts reports for TRIO's Veterans Upward Bound (U.S. Department of Education, 2020), Student Support Services (U.S. Department of Education, 2016a) and Talent Search (U.S. Department of Education, 2016b) programs are available on the Department's website.

The two main sources of data for this report are (1) ED's Federal TRIO Programs Funded Projects Database and (2) annual performance reports (APRs) that UB and UBMS grantees submit. The Funded Projects Database provides funding information on grantees (such as the amount of funding the grantee received and number of participants the grantee was funded to serve), and the APRs provide individual-level data on each participant's background characteristics, program services received, and achievement of program outcomes. ${ }^{i}$ ED's National Student Loan Data System (NSLDS) and the National Center for Education Statistics' Integrated Postsecondary Education Data System (IPEDS) data were used to supplement APR information on participants' postsecondary education enrollment and the institutions attended. ${ }^{\text {ii }}$

The main body of this report provides information on the characteristics of the high school students who are served by UB and UBMS programs, as well as information pertaining to the performance of the program. Program performance findings are presented separately for UB and UBMS programs, and any differences found between these two programs should not be interpreted as one program being more effective than the other. There are many reasons that could explain program performance differences between these two programs,
including that these programs serve different types of students (see table A-1).

Detailed tables with additional findings are presented in Appendix A, and national rates of postsecondary degree completion are provided in Appendix B.

## Population Served and Grantees

TRIO programs provide support services to individuals from disadvantaged backgrounds to promote achievement in postsecondary education. The UB and UMBS programs are designed to assist high school students with college entrance and developing skills and motivation necessary for college success.

To be eligible for UB and UBMS services, students must (among other qualifying factors) meet at least one of the program's three eligibility criteria; that is, being (1) a potential first-generation college student; (2) a low-income individual; or (3) an individual who has a high risk for academic failure (see Upward Bound regulations Title 34, Section 645.3(b)).ii Among students who received UB and UBMS services during the 2017-18 program year, around a quarter possessed all three of these characteristics (see Exhibit 1). The percentage of participants who met each of the program eligibility criteria was:

- 92 percent were potential first-generation college students;
- 88 percent were low income;

Exhibit 1. Percentage distribution of eligibility criteria among Upward Bound and Upward Bound Math-Science participants: 2017-18

■ 33 percent were at high risk for academic failure; and

- 86 percent possessed more than one of these three characteristics. ${ }^{\text {iv }}$

See table A-1 in Appendix A for additional results showing the characteristics of participants served during the 2017-18 program year.

The UB and UBMS programs serve these high school students through grants to projects located throughout the U.S. (see Exhibit 2). ${ }^{\text {v }}$ The majority of UB and UBMS grants were awarded to postsecondary institutions, but 134 (11 percent) grants were awarded to nonprofit institutions, secondary schools, and other types of organizations. In the 2017-18 program year, 1,167 UB and UBMS grantees were funded- 956 were UB grantees, and 211 were UBMS grantees (see Exhibit 3).
Collectively, these grantees received more than \$370 million in program funding and provided services to approximately 85,000 participants. On average, UB grantees served more participants than UBMS grantees ( 75 participants per project compared to 63 participants per project).

Exhibit 2. Upward Bound and Upward Bound Math-Science grantee locations: 2017-18

NOTE: AK = Alaska; FSM = Federated States of Micronesia; GU = Guam; HI = Hawaii; MH = Marshall Island; PR = Puerto Rico; and PW = Palau.
Exhibit 3. Number of Upward Bound and Upward Bound Math-Science grants, number of program participants, and amount of program funding, by program type: 2017-18

| Characteristic |  | Program type |  |
| :--- | ---: | ---: | ---: |
|  | Total | Upward Bound | Upward Bound Math-Science |
| Number of funded grants | 1,167 | 956 | 211 |
| Number of grantees that are minority-serving institutions | 376 | 311 | 65 |
| Total funding (\$) | $370,309,168$ | $312,052,710$ | $58,256,458$ |
| Average funding per grantee (\$) | 317,317 | 326,415 | 276,097 |
| Total participants served | 84,934 | 71,542 | 13,392 |
| Average number of participants served per grantee | 73 | 75 | 63 |
| Average cost per participant served (\$) | 4,360 | 4,362 | 4,350 |

## Program Outcomes

## Measures

The primary goal of the UB and UBMS programs is to increase the rate at which participants enroll in and complete postsecondary education programs. Additionally, grantees have immediate assessment outcome goals for current-year participants that include meeting secondary school retention and graduation targets, as well as meeting academic
performance targets as measured through standardized tests and grade point averages. Exhibit 4 provides the calculation rules for the outcomes presented in this report.

Postsecondary degree completion is measured within 150 percent of normal time from first enrollment at a postsecondary institution. Degree completion rates
for a bachelor's degree are determined as the percentage of students who enrolled who completed a bachelor's degree within 6 years of first enrollment; and degree completion rates for an associate degree are determined as the percent of students who enrolled who completed an associate degree within 3
years of first enrollment. This report presents degree completion rates separately by the level of the postsecondary institution first attended (4-year or 2year postsecondary institution).

Exhibit 4. Upward Bound (UB) and Upward Bound Math-Science (UBMS) program outcomes calculation rules: 2017-18 program year

## Results

A majority (84 percent) of UB and UBMS participants who graduated from high school in 2017-18 enrolled in postsecondary education soon after high school graduation (see Exhibit 5). Among 2017-18 high school graduates, 57 percent matriculated into a $4-$
year institution, and 26 percent matriculated into an institution that does not award a bachelor's degree.

Exhibit 5. Among Upward Bound (UB) and Upward Bound Math-Science (UBMS) participants who graduated high school, percentage enrolling in postsecondary education, by level of postsecondary institution first attended

UB and UBMS

- 4-yar institution

UB only
 $n=17,819$

UBMS only

Level of institution unknown

$n=2,999$

Did not enroll

The rate of postsecondary enrollment was similar for UB and UBMS participants ( 84 percent and 86 percent, respectively). A smaller share of UB participants, compared to UBMS participants, matriculated directly into a bachelor's degree-granting (4-year) institution ( 56 percent and 62 percent, respectively). ${ }^{\text {vi }}$

Among UB and UBMS participants in the 2012 postsecondary educational enrollment cohort who first enrolled at a 4-year institution, almost half (48 percent) earned a bachelor's degree within 6 years of matriculation (see Exhibit 6). The time to degree was within 4 years for nearly one-fourth ( 23 percent) of these cohort participants and was 5 or 6 years for 25 percent of these participants. The bachelor's degree completion rate was higher for UBMS cohort participants than UB cohort participants (53 percent and 47 percent, respectively).

For UB and UBMS participants in the 2012 postsecondary education enrollment cohort who first enrolled in a 2-year postsecondary institution, onefifth (21 percent) had earned a bachelor's degree within 6 years of matriculation or an associate degree within 3 years of matriculation (see Exhibit 7). The 21 percent was split roughly evenly between bachelor's and associate degrees; 79 percent did not earn a degree within 150 percent of normal time. The degree completion rate was higher for UBMS participants than UB participants ( 27 percent and 20 percent, respectively). UBMS cohort participants were more likely to earn a bachelor's degree than UB participants (18 percent and 9 percent, respectively).

Exhibit 6. Among Upward Bound (UB) and Upward Bound Math-Science (UBMS) participants who first enrolled at a 4-year institution, percentage earning a bachelor's degree by time to degree, overall and by program type
UB and UBMS

Exhibit 7. Among Upward Bound (UB) and Upward Bound Math-Science (UBMS) participants who first enrolled at a 2 -year institution, percentage earning a bachelor's or associate degree within $150 \%$ of normal time by highest degree earned, overall and by program type

UBMS only

$n=437$

Bachelor's degree
Associate degree
Did not earn a degree
grade during this same year, nearly three-fourths (73 percent) achieved at the proficient level of state assessments in both reading/language arts and mathematics (see Exhibit 8). UBMS participants were more likely to achieve at the proficient level in both of these subjects than were UB participants (79 percent and 72 percent, respectively).

Tables A-2 and A-6 in Appendix A present additional results for program outcomes. These tables show an association between program eligibility criteria and
outcomes, such that the greater the number of program eligibility criteria that a participant possesses, the lower the likelihood that the participant achieved a program objective. For example, the overall postsecondary enrollment rate for UB and UBMS participants was 84 percent. Among UB and UBMS participants who were low income, first-generation college students, and had a high risk for academic
failure, this enrollment rate was 76 percent (see table A-2). UB projects are more likely than UBMS projects to serve participants who have all three eligibility criteria ( 28 percent and 20 percent, respectively; see table A-1).

## Exhibit 8. Percentage of Upward Bound and Upward Bound Math-Science participants achieving immediate assessment academic performance outcomes, overall and by program type

Academic performance - cumulative GPA was 2.5 or higher at the end of the school year

Academic performance - achieved at the proficient level of state assessments in both reading/language arts and mathematics

## For Further Reference

For more information on the UB and UBMS programs, the TRIO umbrella program, and lowincome and first-generation college students, see the resources listed in this section.

Table A-1. Number and percentage distribution of Upward Bound and Upward Bound Math-Science participants served in 2017-18, by grantee and participant characteristics, and by program type: 2017-18-Continued

[^0]Table A-1. Number and percentage distribution of Upward Bound and Upward Bound Math-Science participants served in 2017-18, by grantee and participant characteristics, and by program type: 2017-18-Continued

| Characteristic | Total |  | Program type |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  |  | UB |  | UBMS |  |
|  | Number | Percent | Number | Percent | Number | Percent |
| Instruction/tutorial for students with limited English proficiency |  |  |  |  |  |  |
| Yes | 3,159 | 3.7 | 2,793 | 3.9 | 366 | 2.7 |
| No | 58,388 | 68.8 | 49,077 | 68.6 | 9,311 | 69.6 |
| Not offered by project | 23,355 | 27.5 | 19,648 | 27.5 | 3,707 | 27.7 |

${ }^{1}$ Other type of organization includes 4-year private for-profit and 2 -year private institutions, secondary schools, nonprofit agencies, and "other" organizations.
${ }^{2}$ The 2017-18 program year was the first year in the 2017-22 funding cycle; 19\% of projects that are funded for the 2017-22 funding cycle were not funded in the previous funding cycle (2012-17).
${ }^{3}$ Underrepresented minority members include participants who were reported in the American Indian/Alaska Native, Black or African American, and/or Hispanic race/ethnicity groups. ${ }^{4}$ These Upward Bound participant eligibility criteria are outlined in the UB statutory requirements (see Title 34 , Section 645.3). The criterion of at risk for academic failure was added in the 2012-17 grant cycle and, beginning with the 2013-14 project year, grantees were required to assess a new participant's eligibility using all three eligibility criteria.
${ }^{5}$ The at risk for academic failure criteria are specified in the Upward Bound regulations (see Title 34, Section 645.6). "Not proficient" means did not achieve at the proficient level on state assessments in both reading/language arts and mathematics. "Low GPA" means GPA was 2.5 or less. "Not completed algebra" means had not successfully completed pre-algebra or algebra course by the beginning of $10^{\text {th }}$ grade.
${ }^{6}$ Limited English proficiency, with reference to an individual, means an individual whose native language is other than English and who has sufficient difficulty speaking, reading, writing, or understanding the English language to deny that individual the opportunity to learn successfully in classrooms in which English is the language of instruction.
${ }^{7}$ Disconnected youth is defined as individuals between the ages of 14 and 24 who are homeless, in foster care, involved in the juvenile justice system, or are neither employed nor enrolled in an educational institution.
NOTE: GEAR UP = Gaining Early Awareness and Readiness for Undergraduate Programs; GPA = grade point average; UB = Upward Bound; UBMS = Upward Bound Math-Science. The results presented for each of the participant characteristics exclude participants who had an unknown response for the given characteristic. Detail may not sum to totals due to rounding.

| 4 years or more | 880 | 784 | 89.1 | 549 | 62.4 | 220 | 25.0 | 15 | 1.7 | 96 | 10.9 |

$\ddagger$ Reporting standard not met.
${ }^{1}$ Cohort participants were considered to have immediately enrolled in postsecondary education if they enrolled in postsecondary education by the fall term immediately following high school graduation.
${ }^{2}$ Information on the postsecondary institution first attended was obtained from UB and UBMS annual performance report and National Student Loan Data System data. Two percent of participants in the 2017-18 high school graduation cohort were missing information on the postsecondary institution attended.
${ }^{3}$ Percentage results are among those in the 2017-18 high school graduation cohort. The 2017-18 high school graduation cohort includes participants who graduated with a regular high school diploma in the 2017-18 academic year.
${ }^{4}$ Other type of organization includes 4-year private for-profit and 2-year private institutions, secondary schools, nonprofit agencies, and "other" organizations.
${ }^{5}$ The 2017-18 program year was the first year in the 2017-22 funding cycle; 19\% of projects that are funded for the 2017-22 funding cycle were not funded in the previous funding cycle (2012-17).
6 Underrepresented minority members include participants who were reported in the American Indian/Alaska Native, Black or African American, and/or Hispanic race/ethnicity groups.
${ }^{7}$ These Upward Bound participant eligibility criteria are outlined in the UB statutory requirements (see Title 34, Section 645.3). The criterion of at risk for academic failure was added in the 2012-17 grant cycle and, beginning with the 2013-14 project year, grantees were required to assess a new participant's eligibility using all three eligibility criteria.
${ }^{8}$ The at risk for academic failure criteria are specified in the Upward Bound regulations (see Title 34, Section 645.6). "Not proficient" means did not achieve at the proficient level on state assessments in both reading/language arts and mathematics. "Low GPA" means GPA was 2.5 or less. "Not completed algebra" means had not successfully completed pre-algebra or algebra course by the beginning of $10^{\text {th }}$ grade.
${ }^{9}$ Limited English proficiency, with reference to an individual, means an individual whose native language is other than English and who has sufficient difficulty speaking, reading, writing, or understanding the English language to deny that individual the opportunity to learn successfully in classrooms in which English is the language of instruction.
${ }^{10}$ Disconnected youth is defined as individuals between the ages of 14 and 24 who are homeless, in foster care, involved in the juvenile justice system, or are neither employed nor enrolled in an educational institution.
NOTE: AP = Advanced Placement; FAFSA = Free Application for Federal Student AID; GPA = grade point average; HS = high school; IB = International Baccalaureate; NSLDS = National Student Loan Data System; UB = Upward Bound; UBMS = Upward Bound Math-Science. The results presented for each of the participant characteristics exclude participants who had an unknown response for the given characteristic.

${ }^{1}$ For the 2012 postsecondary education enrollment cohort, completion of the bachelor's degree within 6 years had to be on or before September 30, 2018 (within 6 years of entering postsecondary education). For results by time to degree, completion of the bachelor's degree "within 4 years" had to be on or before September 30, 2016 and completion of the bachelor's degree "in 5 or 6 years" had to be on or before September 30, 2018.
${ }^{2}$ Percentage results are among those in the 2012 UB/UBMS postsecondary education enrollment cohort who first attended a 4 -year institution. This group includes participants who graduated high school during the 2011-12 academic year and enrolled in a 4 -year postsecondary institution by the fall year immediately following high school graduation (fall 2012).
${ }^{3}$ Other type of organization includes 4 -year private for-profit and 2 -year private institutions, secondary schools, nonprofit agencies, and "other" organizations.
${ }^{4}$ Underrepresented minority members include participants who were reported in the American Indian/Alaska Native, Black or African American, and/or Hispanic race/ethnicity groups.
${ }^{5}$ Limited English proficiency, with reference to an individual, means an individual whose native language is other than English and who has sufficient difficulty speaking, reading, writing, or understanding the English language to deny that individual the opportunity to learn successfully in classrooms in which English is the language of instruction.
${ }^{6}$ Cumulative GPA at beginning of 2011-12 academic year.
NOTE: GPA = grade point average; UB = Upward Bound; UBMS = Upward Bound Math-Science. The results presented for each of the participant characteristics exclude participants who had an unknown response for the given characteristic.

${ }^{1}$ For the 2012 postsecondary education enrollment cohort, the bachelor's degree completion date had to be on or before September 30, 2018 (within 6 years of entering postsecondary education) and the associate degree date by September 30, 2015 (within 3 years of entering postsecondary education) for within $150 \%$ of normal time.
${ }^{2}$ Percentage results are among those in the 2012 UB/UBMS postsecondary education enrollment cohort who first attended a 2 -year institution. This group includes participants who graduated high school during the 2011-12 academic year and enrolled in a 2 -year postsecondary institution by the fall year immediately following high school graduation (fall 2012).
${ }^{3}$ Other type of organization includes 4-year private for-profit and 2-year private institutions, secondary schools, nonprofit agencies, and "other" organizations.
${ }^{4}$ Underrepresented minority members include participants who were reported in the American Indian/Alaska Native, Black or African American, and/or Hispanic race/ethnicity groups.
${ }^{5}$ Limited English proficiency, with reference to an individual, means an individual whose native language is other than English and who has sufficient difficulty speaking, reading, writing, or understanding the English language to deny that individual the opportunity to learn successfully in classrooms in which English is the language of instruction.
${ }^{6}$ Cumulative GPA at beginning of 2011-12 academic year.
Notes: GPA = grade point average; UB = Upward Bound; UBMS = Upward Bound Math-Science. The results presented for each of the participant characteristics exclude participants who had an unknown response for the given characteristic.
SOURCES: U.S. Department of Education, Federal TRIO Programs, UB/UBMS longitudinal data file 2000-17 and Funded Projects database, 2012-18; U.S. Department of Education, National Center for Education Statistics, Integrated Postsecondary Education Data System 2012; and National Student Loan Data System data, Fall 2011 through Fall 2018.

Table A-5. Among Upward Bound and Upward Bound Math-Science 2012 postsecondary education enrollment cohort members, number and percentage distribution of participants by highest degree earned within $150 \%$ of normal time, and by level of postsecondary institution first attended

| Characteristic | Overall |  | Level of institution first attended ${ }^{1}$ |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  |  | 4-year institution |  | 2-year institution |  |
|  | Number | Percent | Number | Percent | Number | Percent |
| Total | 13,021 | 100.0 | 8,562 | 100.0 | 4,363 | 100.0 |
| Highest postsecondary degree completed within 150 percent of normal time ${ }^{2}$ |  |  |  |  |  |  |
| Bachelor's degree | 4,552 | 35.0 | 4,088 | 47.7 | 448 | 10.3 |
| Associate degree | 657 | 5.0 | 185 | 2.2 | 468 | 10.7 |
| Certificate/diploma | 278 | 2.1 | 76 | 0.9 | 192 | 4.4 |
| Did not complete a bachelor's or associate degree or certificate/diploma within 150 percent of normal time | 7,534 | 57.9 | 4,213 | 49.2 | 3,255 | 74.6 |

${ }^{1}$ Participants who were missing information on the level of the postsecondary institution first attended are not included in the results by level of institution first attended. Information on the postsecondary institution first attended was obtained from UB and UBMS annual performance report and National Student Loan Data System data. One percent of participants in the 2012 postsecondary education enrollment cohort were missing information on the postsecondary institution attended.
${ }^{2}$ For the 2012 postsecondary education enrollment cohort, the bachelor's degree completion date had to be on or before September 30, 2018 (within 6 years of entering postsecondary education); and the associate degree and certificate/diploma date by September 30, 2015 (within 3 years of entering postsecondary education) for within 150 percent of normal time. NOTE: UB = Upward Bound; UBMS = Upward Bound Math-Science. The 2012 UB/UBMS postsecondary education enrollment cohort includes participants who graduated high school during the 2011-12 academic year and enrolled in postsecondary education by the fall term immediately following high school graduation (fall 2012). The results presented by level of institution first attended exclude participants who were missing information on this characteristic.

[^2]Table A-6. Number and percentage of Upward Bound and Upward Bound Math-Science participants who achieved the immediate assessment outcomes, by grantee and participant characteristics: 2017-18 program year-Continued

| Characteristic | Immediate assessment outcomes |  |  |  |  |  |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Academic performance GPA ${ }^{1}$ |  |  | Academic performance standardized tests ${ }^{2}$ |  |  | Secondary school retention and graduation ${ }^{3}$ |  |  | Secondary school graduation - rigorous study ${ }^{4}$ |  |  |
|  | Achieved outcome |  |  | Achieved outcome |  |  | Achieved outcome |  |  | Achieved outcome |  |  |
|  | Total | Number | Percent | Total | Number | Percent | Total | Number | Percent | Total | Number | Percent |
| Instruction/tutorial for students with limited English proficiency |  |  |  |  |  |  |  |  |  |  |  |  |
| Yes | 3,050 | 2,643 | 86.7 | 579 | 330 | 57.0 | 3,157 | 3,103 | 98.3 | 565 | 501 | 88.7 |
| No | 56,705 | 48,305 | 85.2 | 12,728 | 9,640 | 75.7 | 58,352 | 57,196 | 98.0 | 12,334 | 10,982 | 89.0 |
| Not offered by project | 22,396 | 19,314 | 86.2 | 5,123 | 3,498 | 68.3 | 23,337 | 22,788 | 97.6 | 4,987 | 4,298 | 86.2 |

${ }^{1}$ For the academic performance-GPA measure, the denominator includes participants who were served in 2017-18, excluding those who were deceased/permanently incapacitated or no GPA was possible; and the numerator includes those who had a GPA of 2.5 or higher.
${ }^{2}$ For the academic performance-standardized test measure, the denominator includes participants who were both served and high school seniors in 2017-18, excluding those who were deceased/permanently incapacitated; and the numerator includes those who achieved at the proficient level on state assessments in reading/language arts and mathematics.
${ }^{3}$ For the secondary school retention and graduation measure, the denominator includes participants who were served in 2017-18, excluding those who were deceased/permanently incapacitated; and the numerator includes those who continued in school for the next academic year at the next grade level, or who graduated from secondary school with a regular secondary school diploma.
${ }^{4}$ For the secondary school graduation—rigorous study measure, the denominator includes current and prior-year participants who graduated high school during the 2017-18 academic year, excluding those who were deceased/permanently incapacitated; and the numerator includes those who completed a rigorous secondary school program of study.
${ }^{5}$ Other organizations include 4-year private for-profit and 2-year private institutions, secondary schools, nonprofit agencies, and "other" organizations.
${ }^{6}$ The 2017-18 program year was the first year in the 2017-22 funding cycle; 19\% of projects that are funded for the 2017-22 funding cycle were not funded in the previous funding cycle (2012-17).
7 Underrepresented minority members include participants who were reported in the American Indian/Alaska Native, Black or African American, and/or Hispanic race/ethnicity groups.
${ }^{8}$ These Upward Bound participant eligibility criteria are outlined in the UB statutory requirements (see Title 34, Section 645.3). The criterion of at risk for academic failure was added in the 2012-17 grant cycle and, beginning with the 2013-14 project year, grantees were required to assess a new participant's eligibility using all three eligibility criteria.
${ }^{9}$ The at risk for academic failure criteria are specified in the Upward Bound regulations (see Title 34, Section 645.6). "Not proficient" means did not achieve at the proficient level on state assessments in both reading/language arts and mathematics. "Low GPA" means GPA was 2.5 or less. "Not completed algebra" means had not successfully completed pre-algebra or algebra course by the beginning of 10th grade.
${ }^{10}$ Limited English proficiency, with reference to an individual, means an individual whose native language is other than English and who has sufficient difficulty speaking, reading, writing, or understanding the English language to deny that individual the opportunity to learn successfully in classrooms in which English is the language of instruction.
${ }^{11}$ Disconnected youth is defined as individuals between the ages of 14 and 24 who are homeless, in foster care, involved in the juvenile justice system, or are neither employed nor enrolled in an educational institution.
NOTE: GEAR UP = Gaining Early Awareness and Readiness for Undergraduate Programs; GPA = grade point average; UB = Upward Bound; UBMS = Upward Bound Math-Science. The results presented for each of the participant characteristics exclude participants who had an unknown response for the given characteristic.

## Appendix B. National Rates of Postsecondary Degree Completion

To provide some context for the UB and UBMS participant degree completion rates presented in the Program Outcomes section of this report, estimates of national postsecondary degree completion rates for low-income and first-generation students are presented below. The estimates are based on data from the 2012/17 Beginning Postsecondary Students Longitudinal Study (BPS:12/17). The BPS:12/17 is a nationally representative cohort of students who enrolled in postsecondary education for the first time during 2011-12 and were followed up during the sixth year after entry into postsecondary education (2016-2017). When generating the national rates of postsecondary degree completion presented in this Appendix, the BPS:12/17 sample was limited to students who graduated high school in 2011 or 2012 with a regular high school diploma and were both low-income and first-generation college students. ${ }^{\text {vi }}$ Although results are presented by these TRIO eligibility criteria, differences may exist between the UB and UBMS participants and the BPS:12/17 sample that limits the ability to directly compare degree completion rates. ${ }^{\text {viii }}$

Exhibit B-1 summarizes the postsecondary degree completion rates for the BPS:12/17 subsample and UB/UBMS 2012 postsecondary education enrollment cohort participants, by level of the institution first attended. ${ }^{\text {ix }}$ Among low-income and first-generation college students who first enrolled at a 4 -year
institution, 47 percent of UB/UBMS participants and 43 percent of the BPS sample earned a bachelor's degree within 6 years (the 95 percent confidence interval for this BPS estimate extends from 37 to 50 percent).

For low-income and first-generation college students who first attended a 2 -year institution, 31 percent of UB/UBMS participants and 24 percent of the BPS sample completed a bachelor's degree or an associate degree within 6 years (the 95 percent confidence interval for this BPS estimate extends from 20 to 29 percent).

While the data from the BPS national sample add valuable context, readers are cautioned against attributing differences in degree completion rates to UB and UBMS participation status, since differences in degree completion rates may instead be a function of other differences (e.g. characteristics of postsecondary institution attended, enrollment intensity, family responsibilities) between these two groups. A more rigorous program evaluation (such as one that includes experimental or quasi-experimental designs) is required to make such direct comparisons. In addition, given that the BPS-based estimates are generated from sample survey data, a confidence interval is associated with each of these estimates (as shown in Exhibit B-1), and readers are encouraged to consider these confidence intervals along with the associated estimates.

Exhibit B-1. Among UB/UBMS and BPS students who graduated high school and immediately enrolled in postsecondary education, percentage earning a degree within 6 years of matriculation, by level of institution first attended

NOTES: BPS = Beginning Postsecondary Students; UB = regular Upward Bound; and UBMS = Upward Bound Math-Science. The bars for the BPS sample display estimates of the degree completion rate and the associated 95 percent confidence interval (CI) for this rate ( $95 \% \mathrm{Cl}$ for 4-year institution attendees: 37, 50; 95\% CI for 2-year attendees: 20, 29). The UB/UBMS results include participants who graduated from high school during the 2011-12 school year and enrolled in postsecondary education by the fall term immediately following high school graduation (fall 2012). The BPS sample results include students who graduated high school in 2011 or 2012 with a regular high school diploma and enrolled in a program of postsecondary education for the first time during 2011-12. Results for both UB/UBMS and BPS sample students are limited to students who were both low-income and firstgeneration college students. For students who first attended a 4 -year institution, degree completion is measured as earning a bachelor's degree within 6 years; for students who first attended a 2-year institution, degree completion is measured as earning a bachelor's or associate degree within 6 years.

Results computed using NCES PowerStats (at https://nces.ed.gov/datalab) on August 12, 2020.

## Endnotes

${ }^{i}$ The program outcomes reported on in this report are primarily based on information that grantees reported in the APR.
${ }^{\text {ii }}$ To determine whether participants had enrolled in postsecondary education, APR and NSLDS data were checked for evidence of enrollment. The unique identification codes for participants' postsecondary enrollment institution (as reported in the APR and/or NSLDS data) were matched with the unique identification codes in the IPEDS data to obtain information from IPEDS on the characteristics of the institution first attended. Among 2017-18 high school graduation cohort participants who enrolled in postsecondary education, 77 percent had evidence of enrollment in both the APR and NSLDS data, 21 percent had evidence in APR data only, and 3 percent had evidence in NSLDS data only. Possible reasons for participants having evidence of postsecondary enrollment in the APR data but not in the NSLDS data include UB/UBMS participants attending postsecondary institutions without federal grants or loans, and difficulties matching cohort member information (name, date of birth, and Social Security Number) to the NSLDS files.
iii As defined in Upward Bound regulations (Title 34, Section 645.6), low-income individual means an individual whose family taxable income did not exceed 150 percent of the poverty level amount in the calendar year preceding the year in which the individual initially participates in the project. First-generation college student means an individual neither of whose natural or adoptive parents received a baccalaureate degree; or a student who, prior to the age of 18, regularly resided with and received support from only one natural or adoptive parent and whose supporting parent did not receive a baccalaureate degree. Individual who has a high risk for academic failure means an individual who has not achieved at the proficient level on state assessments in reading or language arts; has not achieved at the proficient level on state assessments in math; has not successfully completed pre-algebra or algebra by the beginning of the tenth grade; or has a grade point average of 2.5 or less (on a 4.0 scale) for the most recent school year for which grade point averages are available. The criterion of high risk for academic failure was added in the 2012-17 grant cycle and grantees were first required to assess a new participant's eligibility using all three eligibility criteria in the 2013-14 project year.
${ }^{\text {iv }}$ No less than two-thirds of the project's participants each year must be both low-income and first-generation college students; the remaining one-third must be low-income individuals, first-generation college students, or individuals who have a high risk for academic failure.
${ }^{\text {v }}$ Exhibit 2 is based on TRIO Story Maps, which present TRIO's footprint across the U.S. For a link to TRIO Story Maps, visit the main TRIO webpage (https://www2.ed.gov/about/offices/list/ope/trio/index.html) and scroll down to the "Maps" section. The TRIO Story Maps are regularly updated, and so the number and geographic distribution of TRIO grantees will no longer represent the 2017-18 project year. ${ }^{\text {vi }} \mathrm{A}$ significance test result is not reported because we are neither making an inference from a sample to a population nor are we purporting to make causal inferences.
vii Since the national sample includes those who met the TRIO eligibility criteria, some students in the national sample could have received UB and UBMS services.
viii For example, it is possible that the two groups differ on high school academic performance and unobserved characteristics like personality traits, attitudes, motivations, and expectations.
ix The BPS results include students who enrolled in a program of postsecondary education for the first time during 2011-12 at Title IVeligible postsecondary institutions in the 50 states, the District of Columbia, and Puerto Rico. The reported results are based on the U.S. Department of Education, National Center for Education Statistics, 2011-12 Beginning Postsecondary Students Longitudinal Study, Second Follow-up (BPS:12/17). Results were computed using NCES PowerStats (at https://nces.ed.gov/datalab) on August 12, 2020.

This report was produced under U.S. Department of Education (ED) Contract No. ED-OPE-17-O-0031. Sabrina Ratchford served as the contracting officer's representative. The views expressed herein do not necessarily represent the positions or policies of the ED. No official endorsement by the ED of any product, commodity, service, or enterprise mentioned in this publication is intended or should be inferred.

## Availability of Alternate Formats

Requests for documents in alternate formats such as Braille or large print should be submitted to the Alternate Format Center by calling 202-260-0852 or by contacting the 504 coordinator via e-mail at om_eeos@ed.gov.

## Notice to Limited English Proficient Persons

If you have difficulty understanding English, you may request language assistance services for ED information that is available to the public. These language assistance services are available free of charge. If you need more information about interpretation or translation services, please call 1-800-USA-LEARN (1-800-872-5327) (TTY: 1-800-437-0833), or e-mail us at ed.language.assistance@ed.gov. Or write to U.S. Department of Education, Information Resource Center, LBJ Education Building, 400 Maryland Ave. SW, Washington, DC 20202.
