EXECUTIVE SUMMARY

The Adult Education—Basic Grants to States program authorized under the *Adult Education and Family Literacy Act of 1998 (AEFLA)*, enacted as Title II of the *Workforce Investment Act of 1998 (WIA)* (P.L. 105-220), is the major source of federal support for adult basic education and literacy education programs. When *AEFLA* was authorized in 1998, Congress made accountability for student results a central focus of the new law, setting out new performance accountability requirements for state and local programs that measure program effectiveness on the basis of student academic achievement and employment-related outcomes. The U.S. Department of Education’s (Department’s) Office of Vocational and Adult Education (OVAE) established the National Reporting System (NRS)¹ to implement the accountability requirements of *AEFLA*, and act as a reservoir of data collected under these measures.

This report represents the tenth year² of implementing the *AEFLA* requirements using the NRS. OVAE, as part of its efforts to monitor data collection procedures and promote data quality improvement, developed data quality standards to clarify the policies, processes, and materials that state and local programs should have in place to collect valid and reliable data. OVAE assisted states in meeting the congressionally enacted *AEFLA* standards by: (1) providing resources, training, and technical assistance activities to improve data quality and (2) refining NRS requirements, including producing guidelines for conducting follow-up surveys used to obtain data on particular measures. OVAE also has provided individual technical assistance to states on implementing the data collection and reporting requirements of *AEFLA* through the NRS.

¹ Information regarding the National Reporting System (NRS) may be accessed on the NRS website (<http://www.nrsweb.org/>).

² The Adult Education—Basic Grants to States program year begins July 1 and ends June 30 of the next year. For example, PY 2009–10 refers to July 1, 2009 through June 30, 2010.

The Department is required by Sec. 212(c)(2) of *AEFLA* to make available and issue to Congress and the public the *AEFLA* annual report. Information on each state's³ yearly performance in the Adult Education—Basic Grants to States⁴ program is included in the annual report, as are aggregated data on national performance.

Highlights

The Adult Education—Basic Grants to States program enrolled 2,179,781 learners during program year (PY) 2009–10, of whom 45 percent were enrolled in adult basic education (ABE), 13 percent were enrolled in adult secondary education (ASE), and 42 percent were enrolled in English literacy (EL) programs.

Table ES-1 provides a comparison of actual performance on the core outcome measures for adult education under the NRS, during a three-year period from PY 2007–08 through PY 2009–10. The percentage of adults demonstrating educational gains in ABE/ASE⁵ increased slightly from 39 percent in PY 2007–08 to 40 percent in PY 2008–09 and PY 2009–10. Educational gains for adults in EL programs also showed growth, increasing from 39 percent in PY 2007–08 to 44 percent in PY 2009–10. Adults entering postsecondary education or training increased from 56 percent in 2007–08 to 60 percent in PY 2009–10. However adults completing high school decreased from 61 percent in PY 2007–08 to 52 percent in PY 2009–10, adults entering employment decreased from 62 percent in PY 2007–08 to 49 percent in PY 2009–10, and adults retained in employment and adults decreased from 70 percent in PY 2007–08 to 64 percent in PY 2009–10.

³ The term “State” means “each of the several States of the United States, the District of Columbia, and the Commonwealth of Puerto Rico,” as defined in Sec. 203(17) of the *Adult Education and Family Literacy Act of 1998*.

⁴ The program funds each of the 50 states of the United States, the District of Columbia, and the Commonwealth of Puerto Rico. The program also funds the outlying areas of the United States, including the United States Virgin Islands, Guam, American Samoa, Commonwealth of the Northern Mariana Islands, and the Republic of Palau, but they are not represented in this report.

⁵ ABE/ASE means adult basic education/adult secondary education. ABE/ASE consists of six educational levels with four levels in ABE—beginning literacy, beginning basic, low intermediate, and high intermediate; and two levels in ASE—low secondary and high secondary.

INTRODUCTION

Adult education programs under the *Adult Education and Family Literacy Act of 1998 (AEFLA)* address the critical needs in our nation of improving the literacy skills of adults and enhancing their abilities to be more productive members of society and the workforce. *AEFLA*, enacted as Title II of the *Workforce Investment Act of 1998 (WIA)* (P.L. 105–220), is the principal source of federal support for adult basic skills programs. The purposes of *AEFLA*, as defined in Sec. 202, are to:

- “(1) assist adults to become literate and obtain the knowledge and skills necessary for employment and self-sufficiency;
- (2) assist adults who are parents to obtain the educational skills necessary to become full partners in the educational development of their children; and
- (3) assist adults in the completion of a secondary school education.”

The state-administered grant program provides “adult education,” as defined in Sec. 203(1) of *WIA*, “services or instruction below the postsecondary level for individuals (A) who have attained 16 years of age; (B) who are not enrolled or required to be enrolled in secondary school under State law; and (C) who (i) lack sufficient mastery of basic educational skills to enable the individuals to function effectively in society; (ii) do not have a secondary school diploma or its recognized equivalent, and have not achieved an equivalent level of education; or (iii) are unable to speak, read, or write the English language.” These state grants are allocated by formula based upon each state’s count of “qualifying adults.” Sec. 211(d) of *WIA* defines a “qualifying adult” as one who is at least 16 years of age, beyond the age of compulsory school attendance under the law of the state or outlying area, does not have a secondary school diploma or its recognized equivalent, and is not enrolled in secondary school. These data are drawn from the U.S. Census of Population and Housing. The federal allocation for *AEFLA* grants⁶ to states for PY 2009–10 was \$544,361,550.⁷

⁶ The program also funds the outlying areas of the United States Virgin Islands, Guam, American Samoa, the Commonwealth of the Northern Mariana Islands, and the Republic of Palau, but they are not represented in this report.

⁷ The \$544,361,550 federal allocation for *AEFLA* grants to states and outlying areas for PY 2009-10 includes \$67,896,000 for EL/civics. The *Supplemental Appropriations Act of 2009* (P.L. 111-32) made an additional \$1,729,045 available to States whose PY 2009 grants were at least 9.9 percent less than the funds those States received for PY 2008.

States⁸ distribute 82.5 percent of the federal funds competitively to local adult education providers, using 12 considerations identified in Sec. 231(e) of *AEFLA*.⁹

The local provider network includes a variety of agencies—local educational agencies (LEAs), community colleges, community-based organizations, and volunteer literacy organizations. Many adult education programs also work with welfare agencies at the state and local levels to provide instruction to adults needing basic skills who are receiving benefits under the Temporary Assistance for Needy Families (TANF), a U.S. Department of Health and Human Services program intended to promote self-sufficiency. In addition, *AEFLA* state grants support adults in job training programs through partnerships with One-Stop Career Centers, a system that U.S. Department of Labor oversees, and in other community job training programs.

Courses of instruction offered by local providers include:

- Adult basic education (ABE) instruction for adults whose literacy skills range from the lowest literacy levels to just below the high school literacy level,
- Adult secondary education (ASE) instruction for adults whose literacy skills are at approximately the high school level and who seek to pass the General Educational Development (GED) test or obtain an adult high school credential, and
- English literacy (EL) instruction for adults who lack proficiency in English and who seek to improve their literacy and competence in English.

Adult Education Enrollment and Participant Status

In PY 2009–10, the program enrolled 2,179,781 learners, with 45 percent of learners enrolled in ABE, 13 percent enrolled in ASE, and 42 percent enrolled in EL programs, as indicated in table 1.

⁸ The term “State” means “each of the several States of the United States, the District of Columbia, and the Commonwealth of Puerto Rico,” as defined in Sec. 203(17) of the *Adult Education and Family Literacy Act of 1998*.

Adult education serves varied populations. Table 2 shows the number and percentage of learners by program type and age. Overall, 35 percent of students were under age 25, and 81 percent were under age 45. Only 3 percent were aged 60 or older. Age distribution, however, varied by program type. ASE students, with 58 percent under age 25, tended to be younger than both ABE and EL students, with 46 percent and 17 percent, respectively, under age 25. EL students, with 27 percent over age 44, tended to be older than both ABE and ASE students, with 15 percent and 9 percent, respectively, over age 44. It is interesting to note that 56 percent of EL students were in the 25–44 age range, compared to 33 percent of ASE and 39 percent of ABE students in this age range.

The participation of 16- to 18-year-olds in adult education is of particular interest to policymakers because earning a high school diploma through the regular elementary and secondary education system is the traditional path for these youths. In PY 2009–10, as indicated in table 2 and

appendix C, 11 percent of participants were between the ages of 16 and 18, with little change in the percentage of this population participating since PY 2007–08. Of the 246,848 students in adult education programs who were 16–18 years old, 157,077 (64 percent of the total of 16–18 year olds) were in ABE, compared to 71,499 (29 percent) in ASE and 18,272 (7 percent) in EL. Therefore, a plurality of 16- to 18-year-olds entered into adult education programs at a level that suggests they lacked the literacy skills expected of a high school graduate.

Table 3 provides disaggregate information regarding adult learners categorized by race/ethnicity and age. Hispanics or Latinos represented the largest group enrolled in adult education with 41 percent in PY 2009–10, followed by whites with 27 percent and blacks or African-Americans with 22 percent. Whites represented the largest proportion of 16- to 18-year-olds (43 percent). Hispanic or Latino students represented the largest proportion of adult learners in the remaining age categories: 35 percent of 19- to 24-year-olds, 47 percent of 25- to 44-year-olds, 41 percent of 45- to 59-year-olds, and 35 percent of those 60 years and older.

The extent to which 16- to 18-year-olds participated in adult education programs varied widely among states. One of the causes for the variance may be linked to the difference in each state’s

age requirement for compulsory school attendance.¹⁰ Table 4 shows the five states, including Puerto Rico, with the highest numbers and percentages of young adults, aged 16 to 18, enrolled or served through adult education programs. Although some states with the largest populations, such as Florida and California, have the highest number of adult education students aged 16 to 18, some states with small populations, such as Vermont and Wyoming, have high percentages, despite relatively low numbers overall, of students aged 16 to 18.

^a The term “State” means “each of the several States of the United States, the District of Columbia, and the Commonwealth of Puerto Rico,” as defined in Sec. 203(17) of the *Adult Education and Family Literacy Act of 1998*.

^b In the funding formula under the *Adult Education and Family Literacy Act of 1998 (AEFLA)*, Puerto Rico receives a state formula grant.

Note: The age requirements for compulsory school attendance in the states are as follows: Florida—16; California—18; North Carolina—16; Puerto Rico—16; Georgia—16; Vermont—16; Louisiana—18; Wyoming—16; Hawaii—18.

Adults enter adult education programs from a variety of circumstances. Table 5 indicates that in PY 2009–10, 683,298 students self-reported entering the program while employed; 901,198 students self-reported entering the program while unemployed; 337,421 students self-reported entering the program while on public assistance; 219,560 students self-reported entering the program while in correctional facilities; and 22,361 students self-reported entering the program while in other institutional settings. Note, however, that not all students reported their status, and some reported in more than one category.

¹⁰ For the states referenced in table 4, the age requirement for compulsory school attendance are as follows: Florida—16; California—18; North Carolina—16; Puerto Rico—16; Georgia—16; Vermont—16; Louisiana—18; Wyoming—16; Hawaii—18.

Note: The participant status of each student is self-reported. Not all students self-reported their status and some students reported in more than one category (e.g., a student can be unemployed and on public assistance).

ACCOUNTABILITY SYSTEM—THE NATIONAL REPORTING SYSTEM (NRS)¹¹

Since PY 2000–01, the NRS has been the national accountability and data reporting system on student outcomes for federal adult education programs. The Department’s *NRS Implementation Guidelines: Measures and Methods for the National Reporting System for Adult Education* identifies defined measures for national reporting, establishes methodologies for data collection, and maintains standards for reporting. Each state has established a performance accountability system that meets NRS requirements. The NRS data are the basis for assessing the effectiveness of states in achieving continuous improvement of adult education and literacy activities to optimize the return on investment of federal funds. The NRS includes the following three core indicators of performance, identified in Sec. 212(b)(2)(A) of *AEFLA* that are used to assess state performance:

- “(i) Demonstrated improvements in the literacy skill levels in reading, writing, and speaking the English language, numeracy, problem solving, English language acquisition, and other literacy skills.
- (ii) Placement in, retention in, or completion of, postsecondary education, training, unsubsidized employment or career advancement.
- (iii) Receipt of a secondary school diploma or its recognized equivalent.”

These indicators of performance are represented and defined by the five following outcome measures of the NRS, which are designed to measure adult learner outcomes:

- **Educational Gain**—The percentage of adult learners in basic and English literacy programs who acquired the basic or English language skills needed (as validated through standardized assessments) to complete the educational functioning level in which they were initially enrolled.

To demonstrate NRS improved skill levels as required in Sec. 212(b)(2)(A)(i) of *AEFLA*, the Office of Vocational and Adult Education (OVAE) established a hierarchy of six educational functioning levels¹² to measure basic literacy from beginning literacy through high school completion, and six levels for English literacy, from beginning literacy to the advanced level. The levels are defined through reading, writing, numeracy,

¹¹ Information regarding the National Reporting System (NRS) may be accessed on the NRS website (<http://www.nrsweb.org/>).

¹² The educational levels are listed in figure 1.

and functional and workplace skills (and, for English literacy, speaking and listening skills) at each level. Included for each level is a corresponding set of benchmarks of commonly used standardized assessments, such as the Test of Adult Basic Education (TABE) and the Comprehensive Adult Student Assessment System (CASAS), as examples of how students functioning at each level would perform on these tests.

- **High School Completion**—The percentage of adult learners with a high school completion goal who earned a high school diploma or recognized equivalent after program exit.
- **Entered Postsecondary Education or Training**—The percentage of adult learners with a postsecondary education goal who entered postsecondary education or training after program exit.
- **Entered Employment**—The percentage of unemployed adult learners (in the workforce) with an employment goal who obtained a job within one quarter¹³ after program exit.
- **Retained Employment**—The percentage of adult learners with (1) a job retention goal at the time of enrollment and (2) an employment goal who obtained work by the end of the first quarter after exiting the program and who were employed at the end of the third quarter after program exit.

States also may identify additional performance indicators for adult education and literacy activities and incorporate these indicators, as well as corresponding annual levels of performance, in their state plans.

Incentive Grants

States that achieved superior performance in the Title I¹⁴ and Title II¹⁵ of *WIA* programs were eligible for state incentive grants in PY 2009-10. Beginning in PY 2007-08, incentive grants

¹³ “One quarter” refers to the first academic quarter after program exit.

¹⁴ Title I of the *Workforce Investment Act (WIA)* is entitled Workforce Investment Systems.

¹⁵ The *Adult Education and Family Literacy Act of 1998 (AEFLA)* was enacted as Title II of *WIA*.

were based only on performance on the measures under Titles I and II of WIA.¹⁶ The numbers of states receiving incentive grants and the Title II amounts distributed over the past three years are presented in table 6. The number of states that exceeded their adult education performance levels (Title II of *WIA*) are listed, followed by the number that also exceeded Title I of *WIA* program performance levels through PY 2007–08. States received incentive grants only if they exceeded annual performance levels, as negotiated between the state and OVAE and DOL, for the programs. The determination of whether a state has exceeded its adjusted levels of performance is based on each state’s cumulative achievement across all measures. This is done by calculating the percentage of the state-adjusted level¹⁷ achieved for each measure, and then averaging the percentage achieved across all measures. When the cumulative average exceeds 100 percent, the state is deemed to have exceeded the overall adjusted performance levels. In PY 2009–10, the four states that received incentive awards were Arizona, Minnesota, North Dakota, and Texas.

Sec. 503 of *WIA* indicates that state incentive grants are to be issued in an amount not less than \$750,000 and not more than \$3,000,000, to the extent that funds are available; otherwise, prorated amounts are to be awarded. Funds¹⁸ for the incentive grants set-aside under Title II of *WIA* totaled \$9,760,450 in PY 2009–10. No funds for the incentive grants were set aside under Title I of *WIA*.

¹⁶ Funds for incentive grants were not included under the *Carl D. Perkins Vocational and Technical Education Improvement Act of 2006 (Perkins IV)*.

Measuring Educational Gain

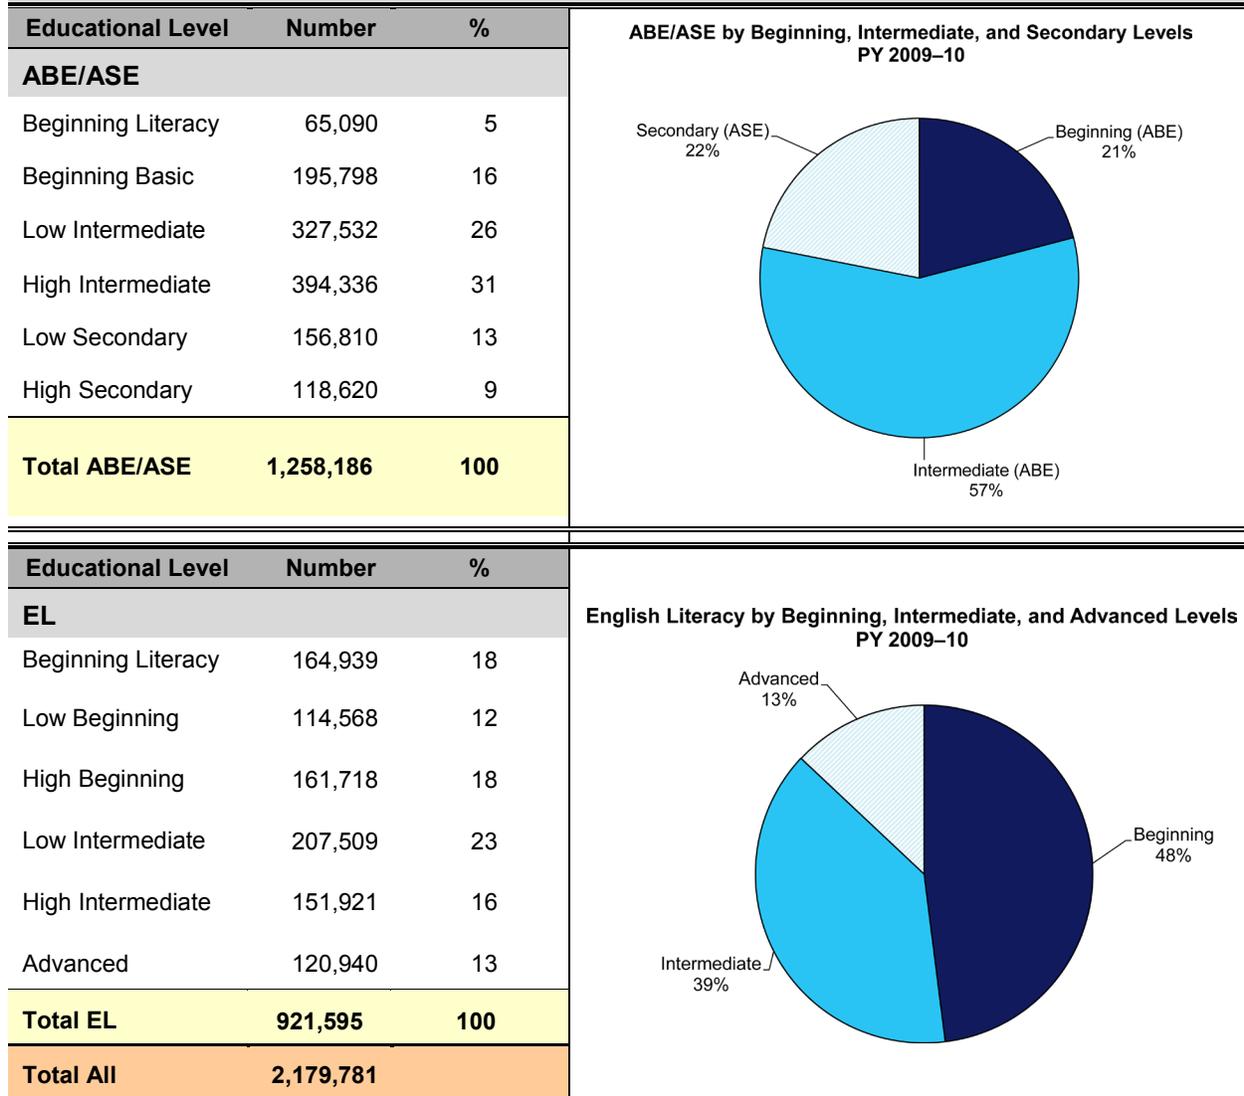

For the NRS, each state must establish standardized assessment procedures that local programs must use first at enrollment to identify an adult learner’s educational functioning level, and then after a period of instruction to measure educational gain (level advancement). Although states must use standardized assessments, states are free to use the assessments that best address the needs of their students and delivery system. Consequently, each state assesses students somewhat differently, using different assessments and administering posttests of students at different times. The most frequently used assessments are the TABE, CASAS, and the Basic English Skills Test (BEST or BEST Plus¹⁹), the latter used exclusively with EL learners.

ABE/ASE²⁰ and EL programs each have six educational levels: four levels in ABE, two levels in ASE, and six levels in EL, as indicated in figure 1. Figure 1 presents PY 2009–10 adult education enrollment figures by educational level as determined by a standardized pretest administered to each student upon program entrance. The majority of students were enrolled in the programs of ABE and ASE. Within ABE and ASE, the largest percentage of student enrollment was 31 percent in the ABE high intermediate level, and the smallest percentage of student enrollment was 5 percent in the ABE beginning literacy level. The majority of students within ABE and ASE, 57 percent, were enrolled in the combined ABE intermediate levels. In EL, the largest percentage of student enrollment was 23 percent in the EL low intermediate level, and the smallest percentage was 12 percent in the ESL low beginning level. The plurality of EL students, 48 percent, was enrolled in the combined beginning levels.

¹⁹ The Basic English Skills Test Plus is used exclusively with English language learners.

²⁰ ABE/ASE means adult basic education/adult secondary education. ABE/ASE consists of six educational levels with four levels in ABE—beginning literacy, beginning basic, low intermediate, and high intermediate; and two levels in ASE—low secondary and high secondary.

Measuring Other Outcomes

Setting and measuring goals for four of the five outcome measures²¹, as discussed in the NRS section of this report, allows adult education students to specify what they want to accomplish and provides a benchmark for both individual goals and program performance measures. There is no requirement in the NRS for students to set any of these goals related to the performance measures, but, once set, adult education programs are held accountable for determining whether students who chose these goals related to the program measures, attained the goals during the program year. States may collect data on these measures by matching administrative records or through follow-up surveys. The use of administrative records is clearly preferred because of the greater accuracy and lower cost, and such record use is possible in most states for the high school completion measure.

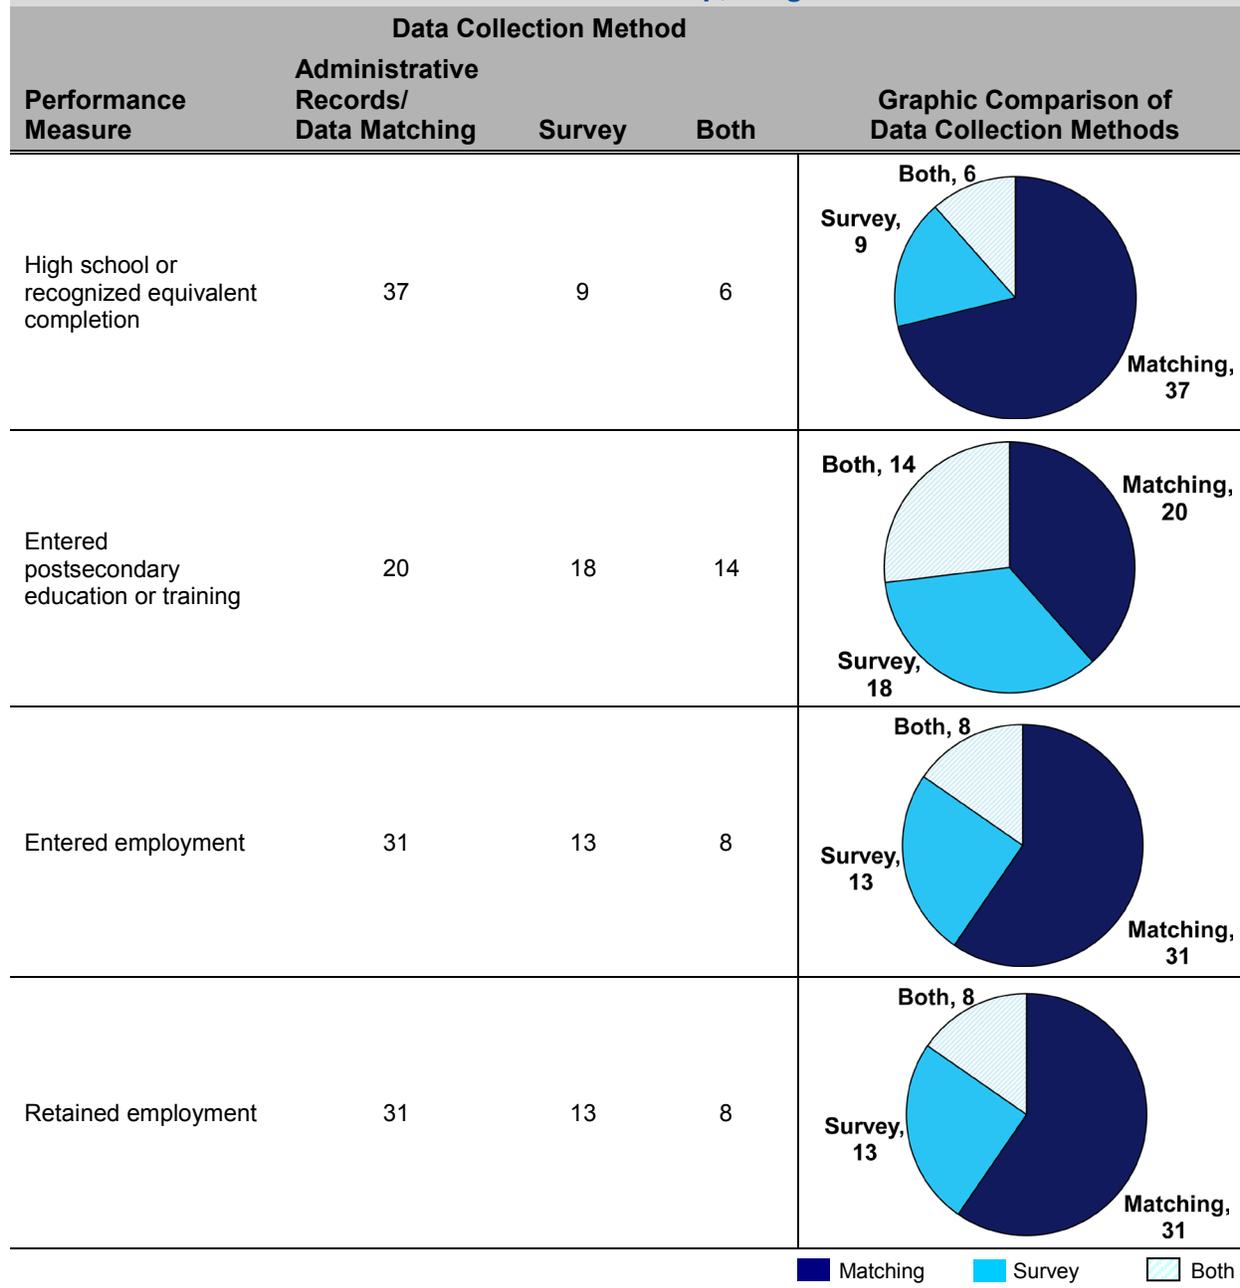

Figure 2 identifies the methods by which states, including the District of Columbia and the Commonwealth of Puerto Rico, currently collect data for the four measures that require programs to follow up with each student who leaves the adult education program. In PY 2009–10, 37 states used administrative records to determine student outcomes for high school completion, nine states used surveys, and six additional states used a combination of administrative records and surveys. Consulting state unemployment insurance (UI) wage records (an example of an administrative record used) is the most efficient, accurate, and cost-effective approach to determining the post-program employment outcomes. However, not all states have the capability to use the UI system due to state data privacy or technical issues. In PY 2009–10, 31 states used this UI system method solely, the same number of states as in PY 2007–08 and PY 2008–09; 13 states used surveys; and an additional eight states used this UI system method in combination with surveys. For entrance to postsecondary education, few comprehensive databases are available to states for measuring postsecondary enrollment. Nevertheless, PY 2007–08 was the first year that more states used administrative records rather than individual student surveys to collect data on these follow-up measures. To assist states in addressing challenges associated with data matching for the postsecondary follow-up measure, the Statewide Longitudinal Data Systems (SLDS) Grants program²² was designed to aid state educational agencies (SEAs) in the development and implementation of SLDSs through a competitive discretionary grant process. These data systems

²¹ Educational gain is not a follow-up measure, but is a required outcome measure and a goal that is set for all adult education learners. Adult learners only set goals for follow-up measures.

FEDERAL INVESTMENTS TO IMPROVE DATA QUALITY AND ITS USE FOR PROGRAM IMPROVEMENT

OVAE has provided states with training and technical assistance to improve the quality and increase the use of NRS data. This assistance has included multiday training sessions and the development of guidebooks that address: (1) implementation of NRS requirements; (2) the conduct of follow-up surveys; and (3) other data quality and program improvement issues. Since 2001, OVAE also has made training resources available online for adult educators. OVAE, as part of its oversight responsibility to monitor improvements in data quality, has continued to use state NRS data quality standards, which identify the policies, processes, and materials that state and local programs should have in place to collect valid and reliable data. The standards define quality data policies and procedures and also provide guidance to states on how to improve their systems.

Federal Implementation Assistance in PY 2009–10

OVAE’s assistance to states during the first few years of NRS focused on the implementation of NRS requirements, development of data systems, and the improvement of data

I can’t wait to implement [these] exercises at [the] local level! — Diving Deep Into the Local NRS Pool training participant

quality. In PY 2009–10, OVAE built on earlier data quality development activities and assisted state and local programs in using the data for their own reporting, program management, and program improvement. In the summer of 2010, OVAE sponsored three, three-day regional training sessions entitled “Diving Deep Into the Local NRS Pool: Attendance, Transition Outcomes, and Educational Gain.” A total of 107 attendees from 44 states and outlying areas participated. This training focused on ways to analyze the core NRS outcome measure of educational gain, the four follow-up measures²³, and student attendance and suggested areas to examine in order to plan program improvement efforts. Teams of state and local staff “dove deep” into the data, reviewed and analyzed those data, and produced a modified tool for use in their state-specific plans to continue their state-local collaboration.

In addition to the three regional training sessions, OVAE sponsored the Adult Education Leadership Institute during PY 2009–10, using a blended format of online and face-to-face learning events. State directors and their staff from 11 states participated in the institute. The initial online

²³ The four follow-up measures are Entered Employment, Retained Employment, High School Completion, and Entered Postsecondary Education or Training.

component began with the topic of collaborative leadership and lasted seven weeks, followed by an initial three-day face-to-face meeting to continue training on two additional dimensions of leadership— strategic and instructional leadership. Following the initial face-to-face meeting, participants developed their state-specific vision for adult education with their staff and shared their vision statement online with other institute participants. The final session of the Leadership Institute was a second face-to-face meeting that addressed the dimensions of operational and transformational leadership. Participants reported in their evaluations of the institute’s online courses that they highly appreciated the opportunities for self-reflection in order to think through the challenges in their current leadership position and the opportunities for in-person interaction during the face-to-face meetings.

OVAE supports technical assistance, which includes in-person workshops, hands-on experiences, and training in the use of the NRSWeb (<http://www.nrsweb.org>). NRSWeb is the adult education practitioner’s source for NRS policies and procedures, changes to the federal accountability requirements and guidelines, publications and related information, direct online training, materials from face-to-face training, webinars, and a calendar of events. Webinars, short seminars delivered through the combined use of the Internet and conference calls, were used to convey important information to practitioners. Online training is a flexible, low-cost method to assist adult educators and administrators with NRS-related topics. In PY 2009–10, NRSWeb offered six self-guided online training opportunities that include 31 courses. Each course is designed specifically for adult education program administrators. These courses cover NRS basics, data quality, and data use. In PY 2009–10, users of NRSWeb completed over 1,600 courses.

This served as a great catalyst to go home and revisit our vision/mission. [The training] equipped us with good tools and resources to aid the process. — Adult Education Leadership Institute training participant

OVAE sponsored one facilitated online course in PY 2009–10. The course, “NRS Basics,” designed for state staff with little knowledge of the NRS, provided information regarding the conceptual framework of the NRS and an overview of its basic requirements.

NRS Implementation by States

Many states now can rely on real-time data to set performance standards, monitor local performance, and implement performance-based funding because the state data systems have

become more sophisticated. The data are being used more meaningfully by administrators, teachers, and support staff to make decisions that help them design more effective programs to meet students' needs. States also use the data-based information to improve standard- and goal-setting for program participants.

Training supported by OVAE has prepared local staff in many states to access and use their data on a regular basis. Staff has increased their abilities to use data as part of their research to identify effective practices for classroom instruction, professional development, and goal setting, and to determine which support mechanisms will help learners persist long enough to reach their education, training, and employment goals. Staff members can now become more directly involved in using data, begin to trust the data, and participate more effectively in the program improvement process. As a result of the training, some states reported that teachers are using these data for their classes and posting graphs of these data outside their classrooms for their students and other teachers to see.

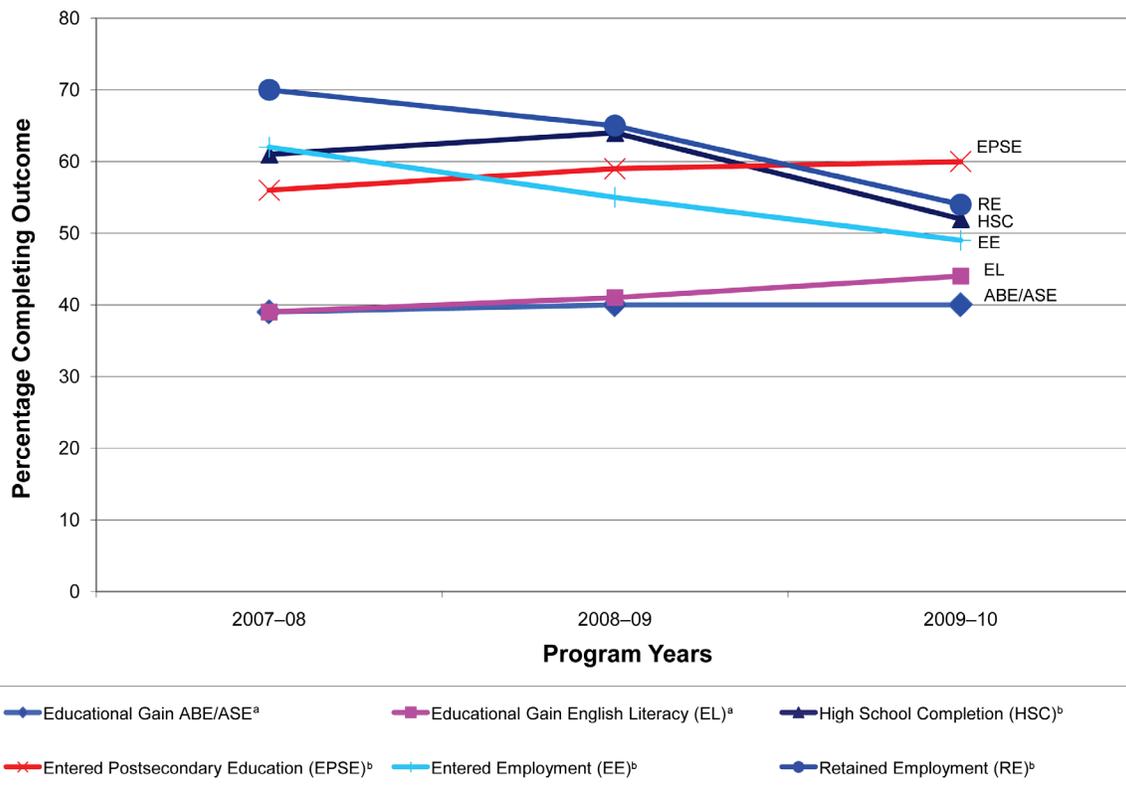

States also are addressing larger programmatic questions using their data. For example, some states are examining whether managed or open enrollment²⁴ would be better for the students. In addition, states are developing ways to account for program efficiencies and outcomes in per-cost units. States are also using longitudinal data to track the continued progress of adult education students along the path toward college and career readiness.

²⁴ A managed enrollment policy allows a student to enter an instructional program only during specific enrollment periods. An open enrollment policy allows a student to enter a program at any time (National Center for the Study of Adult Learning and Literacy, *Adult Student Persistence*, May 2006).

SUMMARY OF NATIONAL PERFORMANCE RESULTS

PY 2009–10 marked the tenth year of implementation of the NRS accountability requirements. Figure 3 provides a comparison of actual performance on each of the outcome measures for adult education under the NRS. The percentage of adults achieving educational outcomes in ABE/ASE remained stable, and the percentage of adults achieving educational outcomes in EL showed a slight increase. The percentage of adults entering postsecondary education or training showed a modest 4 percent increase over the three years. The percentage of adults entering employment showed a modest 4 percent increase over the three years. The percentage of adults entering employment showed the largest decrease, of 13 percent, over the three years. The percentage of adults entering employment showed the largest decrease, of 13 percent, over the three years. The rate of high school completion and the percentage of adults retaining employment both decreased by 9 and 6 percent, respectively. More information on student performance as indicated by each of these measures is in figures 4 through 9.

Figure 4 shows the percentage and number of enrolled adults who acquired the basic literacy skills needed to complete at least one ABE/ASE educational level.²⁵ The percentage of students advancing one or more educational levels increased slightly from 39 percent to 40 percent between PY 2007–08 and PY 2009–10, and the number of these students also slightly increased over this same time period. A total of 1,376,155 adults advanced at least one educational level over the three years.

Notes: Percentage totals reflect rounded figures. Number and calculations do not include the number of students that completed high adult secondary education levels. This is not standardized, and, thus, not comparable across all states and, as such, it is not reported in the raw numbers. The educational functioning levels for adult basic and secondary education are beginning literacy, beginning basic, low intermediate, high intermediate, low secondary and high secondary.

²⁵ See subsection “Measuring Educational Gain” and figure 1 in this report for the meaning of educational level.

Figure 5 shows the percentage and number of enrolled adults acquiring the basic English literacy skills needed to complete at least one educational functioning level. The number and percentage of students acquiring English literacy skills showed an increase from PY 2007–08 to PY 2009–10. The total number of students advancing one or more levels over the three years was 1,242,680.

Earning a high school diploma or a GED is one of the four outcome-related goals that students can set. Figure 6 shows the percentage and number of enrolled adults who set and accomplished the goal of completing high school or a recognized equivalent. The percentage of students achieving this goal decreased over the three-year period from 61 percent to 52 percent. The total number of students achieving this goal over the three years was 478,520.

Figure 7 shows the percentage and number of students who set and achieved the goal of entering postsecondary education or training. The percentage of students who set and achieved this goal increased from 56 percent in PY 2007–08 to 60 percent in 2009–10. The number of students achieving this goal increased slightly, totaling 140,108 over the same period.

Figure 8 shows the percentage and number of unemployed students who set and achieved the goal of entering employment. From PY 2007–08 to PY 2009–10, the percentage of students achieving this goal decreased from 62 percent to 49 percent, accompanied by a decrease in the number of students. Note that this decrease should be carefully interpreted because setting and achieving this goal is partially dependent on fluctuations in the general employment rate. The three-year total of students achieving this goal was 232,279.

Figure 9 shows the percentage and number of students who set a goal to retain or enter employment and ultimately retained employment. From PY 2007–08 to PY 2009–10 both the percentage and number of students achieving this goal decreased. Again, this decrease should be interpreted carefully because setting and achieving this goal is partially dependent on fluctuations in the general employment rate. A total of 260,825 students achieved the goal over the three years.

Notes: Percentage totals reflect rounded figures. To be included under the retained employment goal, an adult learner must have (1) a job retention goal at the time of enrollment and (2) an employment goal where the adult learner obtained work by the end of the first quarter after exiting the program and was employed at the end of the third quarter after program exit.

APPENDIX A. NATIONAL AND STATE PROFILES OF SELECTED ADULT EDUCATION PROGRAM AND STUDENT INFORMATION, FROM PROGRAM YEAR 2007–08 TO PROGRAM YEAR 2009–10

The following pages provide selected program and student information at the national level and for each of the 50 states, the District of Columbia, and Puerto Rico for program year (PY) 2007–08, PY 2008–09 and PY 2009–10 and show performance trends over these last three program years. The first page of each profile provides student demographic and enrollment data. The Participant Status figure shows the number of students who were either employed, or unemployed, or in a correctional setting, or on public assistance, or other institutional setting for PY 2007–08, PY 2008–09 and PY 2009–10. The fiscal year (FY) 2009 Federal Allocations to States funding figure displays the total Adult Education—Basic Grants to States program allocation for FY 2009 and the supplemental amount appropriated under the *Supplemental Appropriations Act of 2009* (P.L. 111-32), which made additional funding available to states whose PY 2009 grants were at least 9.9 percent less than the funds those states received for PY 2008. In each of the state profiles, these are shown relative to each state’s basic grant and English literacy (EL)/civics²⁶ allocations. The Enrollment by Race/Ethnicity figure displays PY 2009–10 adult basic education (ABE), adult secondary education (ASE), and EL enrollment numbers and percentages categorized by race/ethnicity enrollment, and includes the percentage change from PY 2007–08. The Retention and Completion figure shows, for PY 2007–08, PY 2008–09 and PY 2009–10, a side-by-side graph of the number of participants who advanced to the next educational functional level, remained in the same level, completed a level and separated from the program, or separated from the program without advancing based on posttest results and enrollment data. Lastly, the Enrollment by Age figure shows participant enrollment by age for each of the three program years.

The second page of the national profile, as well as each of the state profiles, details participant performance for each of the five performance measures²⁷ in PY 2007–08, PY 2008–09 and PY 2009–10, including a three-year total for each performance measure. The performance measures are: Demonstrated Improvement in Literacy Skills, High School Completion, Entered Postsecondary Education or Training, Entered Employment, and Retained Employment. While percentages are listed for PY 2007–08 and PY 2008–09, the total number of participants completing

²⁶ EL./civics is integrated English literacy and civics education services to immigrants and other limited English proficient populations.

²⁷ The performance measures are discussed in the accountability system section of this report.

at least one level or one outcome for each performance measure is included in addition to the percentages for PY 2009–10.

^a Sec. 212(b)(2)(A) of AEFLA identified three core indicators of student performance. The indicators of performance are represented and defined by outcome measures of NRS, which are designed to measure student outcomes.

^b Data reflects whether adults made educational gains (performance measure I) or achieved other outcomes as indicated via performance measures II-V.

^c Adult Basic and Secondary Education programs consist of six instructional levels representing a hierarchy of basic skills ranging from beginning literacy to high school completion. Data from levels 1–5 are depicted. States are not held accountable for the sixth educational functioning level, High Adult Secondary Education.

^d English Literacy education programs consist of six instructional levels representing a hierarchy of English language skills ranging from beginning English and literacy to advanced language proficiency.

^a Sec. 212(b)(2)(A) of AEFLA identified three core indicators of student performance. The indicators of performance are represented and defined by outcome measures of NRS, which are designed to measure student outcomes.

^b Data reflects whether adults made educational gains (performance measure I) or achieved other outcomes as indicated via performance measures II-V.

^c Adult Basic and Secondary Education programs consist of six instructional levels representing a hierarchy of basic skills ranging from beginning literacy to high school completion. Data from levels 1-5 are depicted. States are not held accountable for the sixth educational functioning level, High Adult Secondary Education.

^d English Literacy education programs consist of six instructional levels representing a hierarchy of English language skills ranging from beginning English and literacy to advanced language proficiency.

^a Sec. 212(b)(2)(A) of AEFLA identified three core indicators of student performance. The indicators of performance are represented and defined by outcome measures of NRS, which are designed to measure student outcomes.

^b Data reflects whether adults made educational gains (performance measure I) or achieved other outcomes as indicated via performance measures II-V.

^c Adult Basic and Secondary Education programs consist of six instructional levels representing a hierarchy of basic skills ranging from beginning literacy to high school completion. Data from levels 1-5 are depicted. States are not held accountable for the sixth educational functioning level, High Adult Secondary Education.

^d English Literacy education programs consist of six instructional levels representing a hierarchy of English language skills ranging from beginning English and literacy to advanced language proficiency.

^a Sec. 212(b)(2)(A) of AEFLA identified three core indicators of student performance. The indicators of performance are represented and defined by outcome measures of NRS, which are designed to measure student outcomes.

^b Data reflects whether adults made educational gains (performance measure I) or achieved other outcomes as indicated via performance measures II-V.

^c Adult Basic and Secondary Education programs consist of six instructional levels representing a hierarchy of basic skills ranging from beginning literacy to high school completion. Data from levels 1-5 are depicted. States are not held accountable for the sixth educational functioning level, High Adult Secondary Education.

^d English Literacy education programs consist of six instructional levels representing a hierarchy of English language skills ranging from beginning English and literacy to advanced language proficiency.

^a Sec. 212(b)(2)(A) of AEFLA identified three core indicators of student performance. The indicators of performance are represented and defined by outcome measures of NRS, which are designed to measure student outcomes.

^b Data reflects whether adults made educational gains (performance measure I) or achieved other outcomes as indicated via performance measures II-V.

^c Adult Basic and Secondary Education programs consist of six instructional levels representing a hierarchy of basic skills ranging from beginning literacy to high school completion. Data from levels 1-5 are depicted. States are not held accountable for the sixth educational functioning level, High Adult Secondary Education.

^d English Literacy education programs consist of six instructional levels representing a hierarchy of English language skills ranging from beginning English and literacy to advanced language proficiency.

^a Sec. 212(b)(2)(A) of AEFLA identified three core indicators of student performance. The indicators of performance are represented and defined by outcome measures of NRS, which are designed to measure student outcomes.

^b Data reflects whether adults made educational gains (performance measure I) or achieved other outcomes as indicated via performance measures II-V.

^c Adult Basic and Secondary Education programs consist of six instructional levels representing a hierarchy of basic skills ranging from beginning literacy to high school completion. Data from levels 1-5 are depicted. States are not held accountable for the sixth educational functioning level, High Adult Secondary Education.

^d English Literacy education programs consist of six instructional levels representing a hierarchy of English language skills ranging from beginning English and literacy to advanced language proficiency.

The percentage of adult learners with (1) a job retention goal at the time of enrollment and (2) an employment goal who obtained work by the end of the first quarter, or three months, after exiting the program and who were employed at the end of the third quarter, or nine months, after program exit.	86	86	4	65	2,000

^a Sec. 212(b)(2)(A) of AEFLA identified three core indicators of student performance. The indicators of performance are represented and defined by outcome measures of NRS, which are designed to measure student outcomes.

^b Data reflects whether adults made educational gains (performance measure I) or achieved other outcomes as indicated via performance measures II-V.

^c Adult Basic and Secondary Education programs consist of six instructional levels representing a hierarchy of basic skills ranging from beginning literacy to high school completion. Data from levels 1–5 are depicted. States are not held accountable for the sixth educational functioning level, High Adult Secondary Education.

^d English Literacy education programs consist of six instructional levels representing a hierarchy of English language skills ranging from beginning English and literacy to advanced language proficiency.

APPENDIX B. THE 12 CONSIDERATIONS IN AWARDING GRANTS SEC. 231(C) OF THE *ADULT EDUCATION AND FAMILY LITERACY ACT (AEFLA)*

The 12 considerations in awarding grants or contracts under Sec. 231(e) of *AEFLA* that the eligible agency must consider are:

“(1) the degree to which the eligible provider will establish measurable goals for participant outcomes;

(2) the past effectiveness of an eligible provider in improving the literacy skills of adults and families, and, after the 1-year period beginning with the adoption of an eligible agency's performance measures under section 212, the success of an eligible provider receiving funding under this subtitle in meeting or exceeding such performance measures, especially with respect to those adults with the lowest levels of literacy;

(3) the commitment of the eligible provider to serve individuals in the community who are most in need of literacy services, including individuals who are low-income or have minimal literacy skills;

(4) whether or not the program—(A) is of sufficient intensity and duration for participants to achieve substantial learning gains; and (B) uses instructional practices, such as phonemic awareness, systematic phonics, fluency, and reading comprehension that research has proven to be effective in teaching individuals to read;

(5) whether the activities are built on a strong foundation of research and effective educational practice;

(6) whether the activities effectively employ advances in technology, as appropriate, including the use of computers;

(7) whether the activities provide learning in real life contexts to ensure that an individual has the skills needed to compete in the workplace and exercise the rights and responsibilities of citizenship;

(8) whether the activities are staffed by well-trained instructors, counselors, and administrators;

(9) whether the activities coordinate with other available resources in the community, such as by establishing strong links with elementary schools and secondary schools, postsecondary educational institutions, one-stop centers, job training programs, and social service agencies;

(10) whether the activities offer flexible schedules and support services (such as child care and transportation) that are necessary to enable individuals, including individuals with disabilities or other special needs, to attend and complete programs;

(11) whether the activities maintain a high-quality information management system that has the capacity to report participant outcomes and to monitor program performance against the eligible agency performance measures; and

(12) whether the local communities have a demonstrated need for additional English literacy programs.”
