

CONSOLIDATED STATE PERFORMANCE REPORT:

Parts I and II

**for
STATE FORMULA GRANT PROGRAMS
under the
ELEMENTARY AND SECONDARY EDUCATION ACT
As amended by the
No Child Left Behind Act of 2001**

For reporting on
School Year 2008-09

ALABAMA

**PART I DUE FRIDAY, DECEMBER 18, 2009
PART II DUE FRIDAY, FEBRUARY 12, 2010**

**U.S. DEPARTMENT OF EDUCATION
WASHINGTON, DC 20202**

INTRODUCTION

Sections 9302 and 9303 of the Elementary and Secondary Education Act (ESEA), as amended by the No Child Left Behind Act of 2001 (NCLB) provide to States the option of applying for and reporting on multiple ESEA programs through a single consolidated application and report. Although a central, practical purpose of the Consolidated State Application and Report is to reduce "red tape" and burden on States, the Consolidated State Application and Report are also intended to have the important purpose of encouraging the integration of State, local, and ESEA programs in comprehensive planning and service delivery and enhancing the likelihood that the State will coordinate planning and service delivery across multiple State and local programs. The combined goal of all educational agencies—State, local, and Federal—is a more coherent, well-integrated educational plan that will result in improved teaching and learning. The Consolidated State Application and Report includes the following ESEA programs:

- Title I, Part A – Improving Basic Programs Operated by Local Educational Agencies
- Title I, Part B, Subpart 3 – William F. Goodling Even Start Family Literacy Programs
- Title I, Part C – Education of Migratory Children (Includes the Migrant Child Count)
- Title I, Part D – Prevention and Intervention Programs for Children and Youth Who Are Neglected, Delinquent, or At-Risk
- Title II, Part A – Improving Teacher Quality State Grants (Teacher and Principal Training and Recruiting Fund)
- Title III, Part A – English Language Acquisition, Language Enhancement, and Academic Achievement Act
- Title IV, Part A, Subpart 1 – Safe and Drug-Free Schools and Communities State Grants
- Title IV, Part A, Subpart 2 – Safe and Drug-Free Schools and Communities National Activities (Community Service Grant Program)
- Title V, Part A – Innovative Programs
- Title VI, Section 6111 – Grants for State Assessments and Related Activities
- Title VI, Part B – Rural Education Achievement Program
- Title X, Part C – Education for Homeless Children and Youths

The NCLB Consolidated State Performance Report (CSPR) for school year (SY) 2008-09 consists of two Parts, Part I and Part II.

PART I

Part I of the CSPR requests information related to the five ESEA Goals, established in the June 2002 Consolidated State Application, and information required for the Annual State Report to the Secretary, as described in Section 1111(h)(4) of the ESEA. The five ESEA Goals established in the June 2002 Consolidated State Application are:

- **Performance Goal 1: By SY 2013-14, all students will reach high standards, at a minimum attaining proficiency or better in reading/language arts and mathematics.**
- **Performance Goal 2: All limited English proficient students will become proficient in English and reach high academic standards, at a minimum attaining proficiency or better in reading/language arts and mathematics.**
- **Performance Goal 3: By SY 2005-06, all students will be taught by highly qualified teachers.**
- **Performance Goal 4: All students will be educated in learning environments that are safe, drug free, and conducive to learning.**
- **Performance Goal 5: All students will graduate from high school.**

Beginning with the CSPR SY 2005-06 collection, the Education of Homeless Children and Youths was added. The Migrant Child count was added for the SY 2006-07 collection.

PART II

Part II of the CSPR consists of information related to State activities and outcomes of specific ESEA programs. While the information requested varies from program to program, the specific information requested for this report meets the following criteria:

1. The information is needed for Department program performance plans or for other program needs.
2. The information is not available from another source, including program evaluations pending full implementation of required EDFacts submission.
3. The information will provide valid evidence of program outcomes or results.

GENERAL INSTRUCTIONS AND TIMELINES

All States that received funding on the basis of the Consolidated State Application for the SY 2008-09 must respond to this Consolidated State Performance Report (CSPR). Part I of the Report is due to the Department by Friday, December 18, 2009. Part II of the Report is due to the Department by Friday, February 12, 2010. Both Part I and Part II should reflect data from the SY 2008-09, unless otherwise noted.

The format states will use to submit the Consolidated State Performance Report has changed to an online submission starting with SY 2004-05. This online submission system is being developed through the Education Data Exchange Network (EDEN) and will make the submission process less burdensome. Please see the following section on transmittal instructions for more information on how to submit this year's Consolidated State Performance Report.

TRANSMITTAL INSTRUCTIONS

The Consolidated State Performance Report (CSPR) data will be collected online from the SEAs, using the EDEN web site. The EDEN web site will be modified to include a separate area (sub-domain) for CSPR data entry. This area will utilize EDEN formatting to the extent possible and the data will be entered in the order of the current CSPR forms. The data entry screens will include or provide access to all instructions and notes on the current CSPR forms; additionally, an effort will be made to design the screens to balance efficient data collection and reduction of visual clutter.

Initially, a state user will log onto EDEN and be provided with an option that takes him or her to the "SY 2008-09 CSPR". The main CSPR screen will allow the user to select the section of the CSPR that he or she needs to either view or enter data. After selecting a section of the CSPR, the user will be presented with a screen or set of screens where the user can input the data for that section of the CSPR. A user can only select one section of the CSPR at a time. After a state has included all available data in the designated sections of a particular CSPR Part, a lead state user will certify that Part and transmit it to the Department. Once a Part has been transmitted, ED will have access to the data. States may still make changes or additions to the transmitted data, by creating an updated version of the CSPR. Detailed instructions for transmitting the SY 2008-09 CSPR will be found on the main CSPR page of the EDEN web site (<https://EDEN.ED.GOV/EDENPortal/>).

According to the Paperwork Reduction Act of 1965, no persons are required to respond to a collection of information unless it displays a valid OMB control number. The valid OMB control number for this information collection is 1810-0614. The time required to complete this information collection is estimated to average 111 hours per response, including the time to review instructions, search existing data resources, gather the data needed, and complete and review the information collection. If you have any comments concerning the accuracy of the time estimates(s) contact School Support and Technology Programs, 400 Maryland Avenue, SW, Washington DC 20202-6140. Questions about the new electronic CSPR submission process, should be directed to the EDEN Partner Support Center at 1-877-HLPEDEN (1-877-457-3336).

**PART I DUE DECEMBER 18, 2009
5PM EST**

1.1 STANDARDS AND ASSESSMENT DEVELOPMENT

STANDARDS OF ASSESSMENT DEVELOPMENT

This section requests descriptions of the State's implementation of the Elementary and Secondary Education Act, as amended (ESEA) academic content standards, academic achievement standards and assessments to meet the requirements of Section 1111(b)(1) of ESEA.

1.1.1 Academic Content Standards

In the space below, provide a description and timeline of any actions the State has taken or is planning to take to make revisions to or change the State's academic content standards in mathematics, reading/language arts or science. Responses should focus on actions taken or planned since the State's content standards were approved through ED's peer review process for State assessment systems. Indicate specifically in what school year your State expects the changes to be implemented.

If the State has not made or is not planning to make revisions or changes, respond "No revisions or changes to content standards made or planned."

The response is limited to 4,000 characters.

No revisions or changes to content standards made or planned.

Source – Manual input by the SEA using the online collection tool.

1.1.2 Assessments in Mathematics and Reading/Language Arts

In the space below, provide a description and timeline of any actions the State has taken or is planning to take to make revisions to or change the State's assessments and/or academic achievement standards in mathematics or reading/language arts required under Section 1111(b)(3) of ESEA. Responses should focus on actions taken or planned since the State's assessment system was approved through ED's peer review process. Responses also should indicate specifically in what school year your State expects the changes to be implemented.

As applicable, include any assessment (e.g., alternate assessments based on alternate achievement standards, alternate assessments based on modified achievement standards, native language assessments, or others) implemented to meet the assessment requirements under Section 1111(b)(3) of ESEA as well as alternate achievement standards for students with significant cognitive disabilities and modified academic achievement standards for certain students with disabilities implemented to meet the requirements of Section 1111(b)

(3) of ESEA. Indicate specifically in what year your state expects the changes to be implemented.

If the State has not made or is not planning to make revisions or changes, respond "No revisions or changes to assessments and/or academic achievement standards taken or planned."

The response is limited to 8,000 characters.

The State Board approved a proposal on September 10, 2009, to change from the current Alabama High School Graduation Exam to end-of-course exams. The timeline for this transition has yet to be determined.
--

Source – Manual input by the SEA using the online collection tool.

1.1.4 Assessments in Science

If your State's assessments and academic achievement standards in science required under Section 1111(b)(3) of ESEA have been approved through ED's peer review process, provide in the space below a description and timeline of any actions the State has taken or is planning to take to make revisions to or change the State's assessments and/or academic achievement standards in science required under Section 1111(b)(3) of ESEA. Responses should focus on actions taken or planned since the State's assessment system was approved through ED's peer review process. Responses also should indicate specifically in what school year your State expects the changes to be implemented.

As applicable, include any assessment (e.g., alternate assessments based on alternate achievement standards, alternate assessments based on modified achievement standards, native language assessments, or others) implemented to meet the assessment requirements under Section 1111(b)(3) of ESEA as well as alternate achievement standards for students with significant cognitive disabilities and modified academic achievement standards for certain students with disabilities implemented to meet the requirements of Section 1111(b)(3) of ESEA.

If the State has not made or is not planning to make revisions or changes, respond "No revisions or changes to assessments and/or academic achievement standards taken or planned."

If the State's assessments in science required under Section 1111(b)(3) of ESEA have not been approved through ED's peer review process, respond "State's assessments and academic achievement standards in science not yet approved."

The response is limited to 4,000 characters.

No revisions or changes to assessments and/or academic achievement standards taken or planned.
--

Source – Manual input by the SEA using the online collection tool.

1.2 PARTICIPATION IN STATE ASSESSMENTS

This section collects data on the participation of students in the State assessments.

1.2.1 Participation of all Students in Mathematics Assessment

In the table below, provide the number of students enrolled during the State's testing window for mathematics assessments required under Section 1111(b)(3) of ESEA (regardless of whether the students were present for a full academic year) and the number of students who participated in the mathematics assessment in accordance with ESEA. The percentage of students who were tested for mathematics will be calculated automatically.

The student group "children with disabilities (IDEA)" includes children who participated in the regular assessments with or without accommodations and alternate assessments. Do not include former students with disabilities(IDEA). Do not include students only covered under Section 504 of the Rehabilitation Act of 1973.

The student group "limited English proficient (LEP) students" includes recently arrived students who have attended schools in the United States for fewer than 12 months. Do not include former LEP students.

Student Group	# Students Enrolled	# Students Participating	Percentage of Students Participating
All students	397,186		> 97%
American Indian or Alaska Native	3,436		> 97%
Asian or Pacific Islander	4,827		> 97%
Black, non-Hispanic	139,042		> 97%
Hispanic	14,775		> 97%
White, non-Hispanic	233,791		> 97%
Children with disabilities (IDEA)	42,698		> 97%
Limited English proficient (LEP) students	8,945		> 97%
Economically disadvantaged students	215,325		> 97%
Migratory students	685		> 97%
Male	203,124		> 97%
Female	194,052		> 97%

Comments: Errors were made in last years data that were corrected in EDEN but we did not realize tht this did not update the CSPR data. The errors were not manually entered into the CSPR update. It was too late to revise when we learned that EDEN updates were not applied. Current year tested and given a proficiency level do add up for all subjects and grades. Homeless status has been difficult to obtain, thus the missing data. In addition with respect to special education students when their assessment data was entered for 003, 004, 093 all students who took the alternate assessment were included. In the case of 075, 078 and 079 all sub populations are run through an automated query based on the student demographics in the enrollment record, therefore fewer students were counted in the special ed subpopulation who took the alternate assessment becuase their enrollment record did not notate them as being special ed.

Source – The table above is produced through EDFacts. The SEA submits the data in file N/X081 that includes data group 588, category sets A, B, C, D, E, and F, and subtotal 1. If the SEA has additional racial/ethnic groups or combinations of racial/ethnic groups in its accountability plan under NCLB, the SEA will report the above data for those groups through the online collection tool.

1.2.2 Participation of Students with Disabilities in Mathematics Assessment

In the table below, provide the number of children with disabilities (IDEA) participating during the State's testing window in mathematics assessments required under Section 1111(b)(3) of ESEA (regardless of whether the children were present for a full academic year) by the type of assessment. The percentage of children with disabilities (IDEA) who participated in the mathematics assessment for each assessment option will be calculated automatically. The total number of children with disabilities (IDEA) participating will also be calculated automatically.

The data provided below should include mathematics participation data from all students with disabilities as defined under the Individuals with Disabilities Education Act(IDEA). Do not include former students with disabilities (IDEA). Do not include students only covered under Section 504 of the Rehabilitation Act of 1973.

Type of Assessment	# Children with Disabilities (IDEA) Participating	Percentage of Children with Disabilities (IDEA) Participating, Who Took the Specified Assessment
Regular Assessment without Accommodations	26,440	62.6
Regular Assessment with Accommodations	12,269	29.0
Alternate Assessment Based on Grade-Level Achievement Standards		
Alternate Assessment Based on Modified Achievement Standards		
Alternate Assessment Based on Alternate Achievement Standards	3,532	8.4
Total	42,241	

Comments: Alternate Assessment Based on Grade-Level Achievement Standards and Alternate Assessment Based on Modified Achievement Standards should be a zero. There wasn't a zero entry listed in the Eden file since the file specs did not mention they were required. In addition with respect to special education students when their assessment data was entered for 003, 004, 093 all students who took the alternate assessment were included. In the case of 075, 078 and 079 all sub populations are run through an automated query based on the student demographics in the enrollment record, therefore fewer students were counted in the special ed subpopulation who took the alternate assessment because their enrollment record did not notate them as being special ed.

1.2.3 Participation of All Students in the Reading/Language Arts Assessment

This section is similar to 1.2.1 and collects data on the State's reading/language arts assessment.

Student Group	# Students Enrolled	# Students Participating	Percentage of Students Participating
All students	397,186		>97%
American Indian or Alaska Native	3,436		>97%
Asian or Pacific Islander	4,827		>97%
Black, non-Hispanic	139,042		>97%
Hispanic	14,775		>97%
White, non-Hispanic	233,791		>97%
Children with disabilities (IDEA)	42,698		>97%
Limited English proficient (LEP) students	8,945		>97%
Economically disadvantaged students	215,325		>97%
Migratory students	685		>97%
Male	203,124		>97%
Female	194,052		>97%

Comments: First year English Language Learners [LEP] ie LEP1 coded students take their English Language Proficiency Test do not receive a proficiency Level but receive credit for being assessed in reading. In addition with respect to special education students when their assessment data was entered for 003, 004, 093 all students who took the alternate assessment were included. In the case of 075, 078 and 079 all sub populations are run through an automated query based on the student demographics in the enrollment record, therefore fewer students were counted in the special ed subpopulation who took the alternate assessment because their enrollment record did not notate them as being special ed.

Source – The same file specification as 1.2.1 is used, but with data group 589 instead of 588.

1.2.4 Participation of Students with Disabilities in Reading/Language Arts Assessment

This section is similar to 1.2.2 and collects data on the State's reading/language arts assessment.

The data provided should include reading/language arts participation data from all students with disabilities as defined under the Individuals with Disabilities Education Act (IDEA). Do not include former students with disabilities (IDEA). Do not include students only covered under Section 504 of the Rehabilitation Act of 1973.

Type of Assessment	# Children with Disabilities (IDEA) Participating	Percentage of Children with Disabilities (IDEA) Participating, Who Took the Specified Assessment
Regular Assessment without Accommodations	26,458	62.6
Regular Assessment with Accommodations	12,252	29.0
Alternate Assessment Based on Grade-Level Achievement Standards		
Alternate Assessment Based on Modified Achievement Standards		
Alternate Assessment Based on Alternate Achievement Standards	3,535	8.4
Total	42,245	

Comments: Alternate Assessment Based on Grade-Level Achievement Standards and Alternate Assessment Based on Modified Achievement Standards should be a zero. There wasn't a zero entry listed in the Eden file since the file specs did not mention they were required. In addition with respect to special education students when their assessment data was entered for 003, 004, 093 all students who took the alternate assessment were included. In the case of 075, 078 and 079 all sub populations are run through an automated query based on the student demographics in the enrollment record, therefore fewer students were counted in the special ed subpopulation who took the alternate assessment because their enrollment record did not notate them as being special ed.

1.2.5 Participation of All Students in the Science Assessment

This section is similar to 1.2.1 and collects data on the State's science assessment.

Student Group	# Students Enrolled	# Students Participating	Percentage of Students Participating
All students	164,025	156,269	95.3
American Indian or Alaska Native	1,492	1,432	96.0
Asian or Pacific Islander	2,022	1,930	95.4
Black, non-Hispanic	57,435	54,495	94.9
Hispanic	5,516	5,287	95.8
White, non-Hispanic	97,064	92,775	95.6
Children with disabilities (IDEA)	17,548	15,218	86.7
Limited English proficient (LEP) students	2,965	2,796	94.3
Economically disadvantaged students	84,983	80,784	95.1
Migratory students	271	259	95.6
Male	83,476	79,304	95.0
Female	80,544	76,964	95.6

Comments: In addition with respect to special education students when their assessment data was entered for 003, 004, 093 all students who took the alternate assessment were included. In the case of 075, 078 and 079 all sub populations are run through an automated query based on the student demographics in the enrollment record, therefore fewer students were counted in the special ed subpopulation who took the alternate assessment because their enrollment record did not notate them as being special ed.

Source – Manual input by the SEA using the online collection tool.

1.2.6 Participation of Students with Disabilities in Science Assessment

This section is similar to 1.2.2 and collects data on the State's science assessment.

The data provided should include science participation results from all students with disabilities as defined under the Individuals with Disabilities Education Act (IDEA). Do not include former students with disabilities (IDEA). Do not include students only covered under Section 504 of the Rehabilitation Act of 1973.

Type of Assessment	# Children with Disabilities (IDEA) Participating	Percentage of Children with Disabilities (IDEA) Participating, Who Took the Specified Assessment
Regular Assessment without Accommodations	8,836	53.6
Regular Assessment with Accommodations	6,382	38.7
Alternate Assessment Based on Grade-Level Achievement Standards		
Alternate Assessment Based on Modified Achievement Standards		
Alternate Assessment Based on Alternate Achievement Standards	1,272	7.7
Total	16,490	
Comments: These total were listed in the X093 state level file. We are not sure why they did not come across into the CSPR, so we manually entered them. In addition with respect to special education students when their assessment data was entered for 003, 004, 093 all students who took the alternate assessment were included. In the case of 075, 078 and 079 all sub populations are run through an automated query based on the student demographics in the enrollment record, therefore fewer students were counted in the special ed subpopulation who took the alternate assessment because their enrollment record did not notate them as being special ed.		

Source – Manual input by the SEA using the online collection tool.

1.3 STUDENT ACADEMIC ACHIEVEMENT

This section collects data on student academic achievement on the State assessments.

1.3.1 Student Academic Achievement in Mathematics

In the format of the table below, provide the number of students who received a valid score on the State assessment(s) in mathematics implemented to meet the requirements of Section 1111(b)(3) of ESEA (regardless of whether the students were present for a full academic year) and for whom a proficiency level was assigned, and the number of these students who scored at or above proficient, in grades 3 through 8 and high school. The percentage of students who scored at or above proficient is calculated automatically.

The student group "children with disabilities (IDEA)" includes children who participated, and for whom a proficiency level was assigned in the regular assessments with or without accommodations and alternate assessments. Do not include former students with disabilities (IDEA). The student group "limited English proficient (LEP) students" does include recently arrived students who have attended schools in the United States for fewer than 12 months. Do not include former LEP students.

1.3.1.1 Student Academic Achievement in Mathematics -Grade 3

Grade 3	# Students Who Received a Valid Score and for Whom a Proficiency Level Was Assigned	# Students Scoring at or Above Proficient	Percentage of Students Scoring at or Above Proficient
All students	59,113	46,812	79.2
American Indian or Alaska Native	447	379	84.8
Asian or Pacific Islander	748	680	90.9
Black, non-Hispanic	20,480	14,018	68.4
Hispanic	2,715	1,994	73.4
White, non-Hispanic	34,442	29,515	85.7
Children with disabilities (IDEA)	6,190	2,892	46.7
Limited English proficient (LEP) students	2,141	1,488	69.5
Economically disadvantaged students	34,244	24,662	72.0
Migratory students	124	89	71.8
Male	30,220	23,518	77.8
Female	28,893	23,294	80.6
Comments: In addition with respect to special education students when their assessment data was entered for 003, 004, 093 all students who took the alternate assessment were included. In the case of 075, 078 and 079 all sub populations are run through an automated query based on the student demographics in the enrollment record, therefore fewer students were counted in the special ed subpopulation who took the alternate assessment because their enrollment record did not notate them as being special ed.			

Source – Initially populated from EDFacts. See Attachment D: CSPR & EDFacts Data Crosswalk. If the SEA has additional racial/ethnic groups or combinations of racial/ethnic groups in its accountability plan under NCLB, the SEA will report the above data for those groups through the online collection tool.

1.3.2.1 Student Academic Achievement in Reading/Language Arts -Grade 3

Grade 3	# Students Who Received a Valid Score and for Whom a Proficiency Level Was Assigned	# Students Scoring at or Above Proficient	Percentage of Students Scoring at or Above Proficient
All students	58,925	50,398	85.5
American Indian or Alaska Native	447	388	86.8
Asian or Pacific Islander	730	688	94.2
Black, non-Hispanic	20,432	15,876	77.7
Hispanic	2,651	2,073	78.2
White, non-Hispanic	34,386	31,130	90.5
Children with disabilities (IDEA)	6,152	2,868	46.6
Limited English proficient (LEP) students	2,055	1,516	73.8
Economically disadvantaged students	34,126	27,230	79.8
Migratory students	119	91	76.5
Male	30,121	24,662	81.9
Female	28,804	25,736	89.4

Comments: Current year number tested and given a proficiency level do add up for all subjects and grades as well as ethnicity vs all students. There is a variation from last year. Errors were made in last years data that were corrected in EDEN but we did not realize tht this did not update the CSPR data. The errors were not manually entered into the CSPR update. It was too late to revise when we learned that EDEN updates were not applied. In addition with respect to special education students when their assessment data was entered for 003, 004, 093 all students who took the alternate assessment were included. In the case of 075, 078 and 079 all sub populations are run through an automated query based on the student demographics in the enrollment record, therefore fewer students were counted in the special ed subpopulation who took the alternate assessment becuae their enrollment record did not notate them as being special ed.

Source – Initially populated from EDFacts. See Attachment D: CSPR & EDFacts Data Crosswalk. If the SEA has additional racial/ethnic groups or combinations of racial/ethnic groups in its accountability plan under NCLB, the SEA will report the above data for those groups through the online collection tool.

1.3.3.1 Student Academic Achievement in Science -Grade 3

Grade 3	# Students Who Received a Valid Score and for Whom a Proficiency Level Was Assigned	# Students Scoring at or Above Proficient	Percentage of Students Scoring at or Above Proficient
All students			
American Indian or Alaska Native			
Asian or Pacific Islander			
Black, non-Hispanic			
Hispanic			
White, non-Hispanic			
Children with disabilities (IDEA)			
Limited English proficient (LEP) students			
Economically disadvantaged students			
Migratory students			
Male			
Female			
Comments: Alabama only administered science assessment in grades 5, 7, and 11.			

Source – Manual input by the SEA using the online collection tool. If the SEA has additional racial/ethnic groups or combinations of racial/ethnic groups in its accountability plan under NCLB, the SEA will report the above data for those groups through the online CSPR collection tool.

1.3.1.2 Student Academic Achievement in Mathematics -Grade 4

Grade 4	# Students Who Received a Valid Score and for Whom a Proficiency Level Was Assigned	# Students Scoring at or Above Proficient	Percentage of Students Scoring at or Above Proficient
All students	58,479	46,109	78.8
American Indian or Alaska Native	451	373	82.7
Asian or Pacific Islander	673	620	92.1
Black, non-Hispanic	20,230	13,852	68.5
Hispanic	2,464	1,766	71.7
White, non-Hispanic	34,432	29,315	85.1
Children with disabilities (IDEA)	6,253	2,504	40.0
Limited English proficient (LEP) students	1,641	1,036	63.1
Economically disadvantaged students	33,431	23,899	71.5
Migratory students	118	82	69.5
Male	29,875	22,995	77.0
Female	28,604	23,114	80.8

Comments: Current year number tested and given a proficiency level do add up for all subjects and grades as well as ethnicity vs all students. There is a variation from last year. Errors were made in last years data that were corrected in EDEN but we did not realize tht this did not update the CSPR data. The errors were not manually entered into the CSPR update. It was too late to revise when we learned that EDEN updates were not applied. In addition with respect to special education students when their assessment data was entered for 003, 004, 093 all students who took the alternate assessment were included. In the case of 075, 078 and 079 all sub populations are run through an automated query based on the student demographics in the enrollment record, therefore fewer students were counted in the special ed subpopulation who took the alternate assessment becuase their enrollment record did not notate them as being special ed.

Source – Initially populated from EDFacts. See Attachment D: CSPR & EDFacts Data Crosswalk. If the SEA has additional racial/ethnic groups or combinations of racial/ethnic groups in its accountability plan under NCLB, the SEA will report the above data for those groups through the online collection tool.

1.3.2.2 Student Academic Achievement in Reading/Language Arts -Grade 4

Grade 4	# Students Who Received a Valid Score and for Whom a Proficiency Level Was Assigned	# Students Scoring at or Above Proficient	Percentage of Students Scoring at or Above Proficient
All students	58,455	50,478	86.4
American Indian or Alaska Native	453	407	89.8
Asian or Pacific Islander	651	612	94.0
Black, non-Hispanic	20,249	15,773	77.9
Hispanic	2,410	1,908	79.2
White, non-Hispanic	34,465	31,577	91.6
Children with disabilities (IDEA)	6,256	3,035	48.5
Limited English proficient (LEP) students	1,562	1,082	69.3
Economically disadvantaged students	33,411	26,809	80.2
Migratory students	115	91	79.1
Male	29,863	24,861	83.2
Female	28,592	25,617	89.6

Comments: Current year number tested and given a proficiency level do add up for all subjects and grades as well as ethnicity vs all students. There is a variation from last year. Errors were made in last years data that were corrected in EDEN but we did not realize tht this did not update the CSPR data. The errors were not manually entered into the CSPR update. It was too late to revise when we learned that EDEN updates were not applied. In addition with respect to special education students when their assessment data was entered for 003, 004, 093 all students who took the alternate assessment were included. In the case of 075, 078 and 079 all sub populations are run through an automated query based on the student demographics in the enrollment record, therefore fewer students were counted in the special ed subpopulation who took the alternate assessment becuase their enrollment record did not notate them as being special ed.

Source – Initially populated from EDFacts. See Attachment D: CSPR & EDFacts Data Crosswalk. If the SEA has additional racial/ethnic groups or combinations of racial/ethnic groups in its accountability plan under NCLB, the SEA will report the above data for those groups through the online collection tool.

1.3.3.2 Student Academic Achievement in Science -Grade 4

Grade 4	# Students Who Received a Valid Score and for Whom a Proficiency Level Was Assigned	# Students Scoring at or Above Proficient	Percentage of Students Scoring at or Above Proficient
All students			
American Indian or Alaska Native			
Asian or Pacific Islander			
Black, non-Hispanic			
Hispanic			
White, non-Hispanic			
Children with disabilities (IDEA)			
Limited English proficient (LEP) students			
Economically disadvantaged students			
Migratory students			
Male			
Female			
Comments: Alabama only administered science assessments in grades 5, 7, and 11			

Source – Manual input by the SEA using the online collection tool. If the SEA has additional racial/ethnic groups or combinations of racial/ethnic groups in its accountability plan under NCLB, the SEA will report the above data for those groups through the online CSPR collection tool.

1.3.1.3 Student Academic Achievement in Mathematics -Grade 5

Grade 5	# Students Who Received a Valid Score and for Whom a Proficiency Level Was Assigned	# Students Scoring at or Above Proficient	Percentage of Students Scoring at or Above Proficient
All students	57,765	46,009	79.6
American Indian or Alaska Native	507	442	87.2
Asian or Pacific Islander	680	634	93.2
Black, non-Hispanic	20,205	13,981	69.2
Hispanic	2,264	1,664	73.5
White, non-Hispanic	33,898	29,118	85.9
Children with disabilities (IDEA)	6,316	2,396	37.9
Limited English proficient (LEP) students	1,304	793	60.8
Economically disadvantaged students	32,740	23,718	72.4
Migratory students	105	78	74.3
Male	29,612	22,845	77.2
Female	28,151	23,164	82.3

Comments: In addition with respect to special education students when their assessment data was entered for 003, 004, 093 all students who took the alternate assessment were included. In the case of 075, 078 and 079 all sub populations are run through an automated query based on the student demographics in the enrollment record, therefore fewer students were counted in the special ed subpopulation who took the alternate assessment because their enrollment record did not notate them as being special ed.

1.4 SCHOOL AND DISTRICT ACCOUNTABILITY

This section collects data on the Adequate Yearly Progress (AYP) status of schools and districts.

1.4.1 All Schools and Districts Accountability

In the table below, provide the total number of public elementary and secondary schools and districts in the State, including charters, and the total number of those schools and districts that made AYP based on data for the SY 2008-09. The percentage that made AYP will be calculated automatically.

Entity	Total #	Total # that Made AYP in SY 2008-09	Percentage that Made AYP in SY 2008-09
Schools	1,376	1,193	86.7
Districts	132	129	97.7
Comments:			

Source – The table above is produced through ED Facts. The SEA submits the data in N/X103 for data group 32.

1.4.2 Title I School Accountability

In the table below, provide the total number of public Title I schools by type and the total number of those schools that made AYP based on data for the SY 2008-09 school year. Include only public Title I schools. Do not include Title I programs operated by local educational agencies in private schools. The percentage that made AYP will be calculated automatically.

Title I School	# Title I Schools	# Title I Schools that Made AYP in SY 2008-09	Percentage of Title I Schools that Made AYP in SY 2008-09
All Title I schools	855	761	89.0
Schoolwide (SWP) Title I schools	768	687	89.4
Targeted assistance (TAS) Title I schools	87	74	85.1
Comments:			

Source – The table above is produced through ED Facts. The SEA submits the data in N/X129 for data group 22 and N/X103 for data group 32.

1.4.3 Accountability of Districts That Received Title I Funds

In the table below, provide the total number of districts that received Title I funds and the total number of those districts that made AYP based on data for SY 2008-09. The percentage that made AYP will be calculated automatically.

# Districts That Received Title I Funds	# Districts That Received Title I Funds and Made AYP in SY 2008-09	Percentage of Districts That Received Title I Funds and Made AYP in SY 2008-09
128	125	97.7
Comments:		

Source – Initially populated from ED Facts. See Attachment D: CSPR & ED Facts Data Crosswalk.

Note: DG 582 is not collected from the SEA, rather it comes from the Title I funding data.

1.4.4 Title I Schools Identified for Improvement

1.4.4.1 List of Title I Schools Identified for Improvement

In the following table, provide a list of Title I schools identified for improvement, corrective action, or restructuring under Section 1116 for the SY 2009-10 based on the data from SY 2008-09. For each school on the list, provide the following:

- District Name
- District NCES ID Code
- School Name
- School NCES ID Code
- Whether the school met the proficiency target in reading/language arts as outlined in the State's Accountability Plan
- Whether the school met the participation rate target for the reading/language arts assessment
- Whether the school met the proficiency target in mathematics as outlined in the State's Accountability Plan
- Whether the school met the participation rate target for the mathematics assessment
- Whether the school met the other academic indicator for elementary/middle schools (if applicable) as outlined in the State's Accountability Plan

- Whether the school met the graduation rate for high schools (if applicable) as outlined in the State's Accountability Plan
- Improvement status for SY <> (Use one of the following improvement status designations: School Improvement û Year 1, School Improvement û Year 2, Corrective Action, Restructuring Year 1 (planning), or Restructuring Year 2 (implementing))
- Whether (yes or no) the school is or is not a Title I school (This column must be completed by States that choose to list all schools in improvement. Column is optional for States that list only Title I schools.)
- Whether (yes or no) the school was provided assistance through 1003(a).
- Whether (yes or no) the school was provided assistance through 1003 (g).

See attached for blank template that can be used to enter school data.

Download template: [Question 1.4.4.1 \(Get MS Excel Viewer\)](#)

Source – Manual entry by SEA into the online collection tool.

¹ The school improvement statuses are defined in LEA and School Improvement Non-Regulatory Guidance. This document may be found on the Department's Web page at <http://www.ed.gov/policy/elsec/guid/schoolimprovementguid.doc>.

1.4.4.3 Corrective Action

In the table below, for schools in corrective action, provide the number of schools for which the listed corrective actions under ESEA were implemented in SY 2008-09 (based on SY 2007-08 assessments under Section 1111 of ESEA).

Corrective Action	# of Title I Schools in Corrective Action in Which the Corrective Action was Implemented in SY 2008-09
Required implementation of a new research-based curriculum or instructional program	17
Extension of the school year or school day	
Replacement of staff members relevant to the school's low performance	
Significant decrease in management authority at the school level	2
Replacement of the principal	2
Restructuring the internal organization of the school	
Appointment of an outside expert to advise the school	1
Comments: *Significant decrease in management authority at the school level was accomplished by assigning executives at the District level to oversee the academic progress on these school campuses.	

1.4.4.4 Restructuring – Year 2

In the table below, for schools in restructuring – year 2 (implementation year), provide the number of schools for which the listed restructuring actions under ESEA were implemented in SY 2008-09 (based on SY 2007-08 assessments under Section 1111 of ESEA).

Restructuring Action	# of Title I Schools in Restructuring in Which Restructuring Action Is Being Implemented
Replacement of all or most of the school staff (which may include the principal)	2
Reopening the school as a public charter school	
Entering into a contract with a private entity to operate the school	1
Take over the school by the State	
Other major restructuring of the school governance	
Comments: Replacing principals was the more significant intervention in these schools.	

In the space below, list specifically the "other major restructuring of the school governance" action(s) that were implemented.

The response is limited to 8,000 characters.

No Districts chose this "other major restructuring."

1.4.5 Districts That Received Title I Funds Identified for Improvement

1.4.5.1 List of Districts That Received Title I Funds and Were Identified for Improvement

In the following table, provide a list of districts that received Title I funds and were identified for improvement or corrective action under Section 1116 for the SY 2009-10 based on the data from SY 2008-09. For each district on the list, provide the following:

- District Name
- District NCES ID Code
- Whether the district met the proficiency target in reading/language arts as outlined in the State's Accountability Plan
- Whether the district met the participation rate target for the reading/language arts assessment
- Whether the district met the proficiency target in mathematics as outlined in the State's Accountability Plan
- Whether the school met the participation rate target for the mathematics assessment
- Whether the district met the other academic indicator for elementary/middle schools (if applicable) as outlined in the State's Accountability Plan

- Whether the district met the graduation rate for high schools (if applicable) as outlined in the State's Accountability Plan
- Improvement status for SY 2009-10 (Use one of the following improvement status designations: Improvement or Corrective Action)
- Whether the district is a district that received Title I funds. Indicate "Yes" if the district received Title I funds and "No" if the district did not receive Title I funds. (This column **must be completed by States that choose to list all districts or all districts in improvement. This column is optional for States that list only** districts in improvement that receive Title I funds.)

See attached for blank template that can be used to enter district data.

Download template: [Question 1.4.5.1 \(Get MS Excel Viewer\)](#)

Source – Manual entry by SEA into the online collection tool.

² The district improvement statuses are defined in LEA and School Improvement Non-Regulatory Guidance. This document may be found on the Department's Web page at <http://www.ed.gov/policy/elsec/guid/schoolimprovementguid.doc>.

1.4.5.2 Actions Taken for Districts That Received Title I Funds and Were Identified for Improvement

In the space below, briefly describe the measures being taken to address the achievement problems of districts identified for improvement or corrective action. Include a discussion of the technical assistance provided by the State (e.g., the number of districts served, the nature and duration of assistance provided, etc.).

The response is limited to 8,000 characters.

Alabama had no districts identified for district improvement in 2008-09. The State Support Team, made up of master teachers and administrators, worked with all districts concentrating on comprehensive school improvement strategies and leadership initiatives, and then focused support to these districts from state-trained district-level school improvement specialists. The state attributes these actions, as well as an increased sense of urgency at district levels, to this success.

1.4.5.3 Corrective Action

In the table below, for districts in corrective action, provide the number of districts in corrective action in which the listed corrective actions under ESEA were implemented in SY 2008-09 (based on SY 2007-08 assessments under Section 1111 of ESEA).

Corrective Action	# of Districts receiving Title I funds in Corrective Action in Which Corrective Action was Implemented in SY 2008-09
Implementing a new curriculum based on State standards	0
Authorized students to transfer from district schools to higher performing schools in a neighboring district	0
Deferred programmatic funds or reduced administrative funds	0
Replaced district personnel who are relevant to the failure to make AYP	0
Removed one or more schools from the jurisdiction of the district	0
Appointed a receiver or trustee to administer the affairs of the district	0
Restructured the district	0
Abolished the district (list the number of districts abolished between the end of SY 2007-08 and beginning of SY 2008-09 as a corrective action)	0
Comments: Alabama had no districts identified for district improvement, corrective action, or restructuring in 2008-09.	

1.4.7 Appeal of AYP and Identification Determinations

In the table below, provide the number of districts and schools that appealed their AYP designations based on SY 2008-09 data and the results of those appeals.

	# Appealed Their AYP Designations	# Appeals Resulted in a Change in the AYP Designation
Districts	0	0
Schools	3	3
Comments: Three schools in three different districts asked for a reconsideration of their 2008-09 improvement status. All three were reviewed and were given an all-clear on their AYP status determinations.		

Date (MM/DD/YY) that processing appeals based on SY 2008-09 data was complete	09/10/09
---	----------

1.4.8 School Improvement Status

In the section below, "Schools in Improvement" means Title I schools identified for improvement, corrective action, or restructuring under Section 1116 of ESEA for SY 2008-09.

1.4.8.1 Student Proficiency for Schools Receiving Assistance Through Section 1003(a) and 1003(g) Funds

The table below pertains only to schools that received assistance through section 1003(a) and/or 1003(g) funds during SY 2008-09.

Instructions for States that during SY 2008-09 administered assessments required under section 1116 of ESEA after fall 2008 (i.e., non fall-testing states):

- In the SY 2008-09 column, provide the total number and percentage of students in schools receiving School Improvement funds in SY 2008-09 who were:
 - Proficient in mathematics as measured by your State's assessments required under section 1111(b)(3) of ESEA that were administered in SY 2008-09.
 - Proficient in reading/language arts as measured by your State's assessments required under section 1111(b)(3) of ESEA in SY 2008-09.
 - In SY 2007-08 column, provide the requested data for the same schools whose student proficiency data are reported for SY 2008-09.

States that in SY 2008-09 administered assessments required under section 1116 of ESEA during fall 2008 (i.e., fall-testing states):

- In the SY 2008-09 column, provide the total number and percentage of students in schools receiving School Improvement funds in SY 2008-09 who were:
 - Proficient in mathematics as measured by your State's assessments required under section 1111(b)(3) of ESEA that were administered in fall 2009.
 - Proficient in reading/language arts as measured by your State's assessments required under section 1111(b)(3) of ESEA that were administered in fall 2009.
 - In the SY 2007-08 column, provide the requested data for the same schools whose student proficiency data are reported in the SY 2008-09 column.

Category	SY 2008-09	SY 2007-08
Total number of students who completed the mathematics assessment and for whom proficiency level was assigned and were enrolled in schools that received assistance through Section 1003(a) and/or 1003(g) funds in SY 2008-09		
Total number of students who were proficient or above in mathematics in schools that received assistance through Section 1003(a) and/or 1003(g) funds in SY 2008-09		
Percentage of students who were proficient or above in mathematics in schools that received assistance through Section 1003(a) and/or 1003(g) funds in SY 2008-09		
Total number of students who completed the reading/language arts assessment and for whom proficiency level was assigned and were enrolled in schools that received assistance through Section 1003(a) and/or 1003(g) funds in SY 2008-09		
Total number of students who were proficient or above in reading/language arts in schools that received assistance through Section 1003(a) and/or 1003(g) funds in SY 2008-09		
Percentage of students who were proficient in reading/language arts in schools that received assistance through Section 1003(a) and/or 1003(g) funds in SY 2008-09		
Comments: Eden files X075, X078, and X132 have been successfully submitted into the Eden system. We do not know why the data has not been pulled into the CSPR. Will comment further when the CSPR reopens		

Source – Manual input by the SEA using the online collection tool.

1.4.8.2 School Improvement Status and School Improvement Assistance

In the table below, indicate the number of schools receiving assistance through section 1003(a) and/or 1003(g) funds during SY 2008-09 that:

- Made adequate yearly progress
- Exited improvement status
- Did not make adequate yearly progress

Category	# of Schools
Number of schools receiving assistance through Section 1003(a) and/or 1003(g) funds during SY 2008-09 that made adequate yearly progress based on testing in SY 2008-09	
Number of schools receiving assistance through Section 1003(a) and/or 1003(g) funds during SY 2008-09 that exited improvement status based on testing in SY 2008-09	28
Number of schools receiving assistance through Section 1003(a) and/or 1003(g) funds during SY 2008-09 that did not make adequate yearly progress based on testing in SY 2008-09	

Source – Manual input by the SEA using the online collection tool.

1.4.8.3 Effective School Improvement Strategies

In the table below, indicate the effective school improvement strategies used that were supported through Section 1003(a) and/or 1003(g) funds.

For fall-testing States, responses for this item would be based on assessments administered in fall 2009. For all other States the responses would be based on assessments administered during SY 2008-09.

Column 1	Column 2	Column 3	Column 4	Column 5	Column 6	Column 7
Effective Strategy or Combination of Strategies Used (See response options in "Column 1 Response Options Box" below.) If your State's response includes a "5" (other strategies), identify the specific strategy(s) in Column 2.	Description of "Other Strategies" This response is limited to 500 characters.	Number of schools in which the strategy (s) was used	Number of schools that used the strategy(s), made AYP, and exited improvement status based on testing after the schools received this assistance	Number of schools that used the strategy(s), made AYP based on testing after the schools received this assistance, but did not exit improvement status	Most common other Positive Outcome from the Strategy (See response options in "Column 6 Response Options Box" below)	Description of "Other Positive Outcome" if Response for Column 6 is "D" This response is limited to 500 characters.
1	Strategies were not used in isolation: 1)professional technical assistance focused on SBR pedagogy linked to district and state partnerships including the Southern Regional Education Board provided essential professional learning for teachers and school leadership teams. Strategies combined are 1,2,3, and 4.	76	28	25	A	
2	Strategies were not used in isolation: 1)professional technical assistance focused on SBR pedagogy linked to district and state partnerships including the Southern Regional Education Board provided essential professional learning for teachers and school leadership teams. 4	Strategies were not used in isolation: 1)professional technical assistance focused on SBR pedagogy linked to district and state partnerships including the Southern Regional Education Board provided essential professional learning for teachers and school leadership teams. Strategies combined are 1,2,3, and 4.	76	28	25	A	

Comments: (The state applied Strategies 1,2,3,and 4 to all 76 schools. Strategies were repeated in order to clear the computer program business rule that is keeping this page from appearing "finished.") Evidenced-based strategies are combined: professional technical assistance focused on SBR pedagogy linked to district and state partnerships including the Southern Regional Education Board provided essential professional learning for teachers and school leadership teams. The state believes that applying a combination of strategies focused on school curriculum and culture deficiencies identified by districts, school faculties, and experienced State Support Team members has resulted in a steadily declining number of schools identified for improvement. Trained professionals network to deliver technical assistance sessions and intense embedded follow-up. The key is definitely the follow-up -in order to help these struggling schools enlarge their own capacity to correct curriculum alignment and pacing, improve school culture, or build a strong teaching and leadership team.

Column 1 Response Options Box

1 = Provide customized technical assistance and/or professional development that is designed to build the capacity of LEA and school staff to improve schools and is informed by student achievement and other outcome-related measures.

2= Utilize research-based strategies or practices to change instructional practice to address the academic achievement problems that caused the school to be identified for improvement, corrective action, or restructuring.

3 = Create partnerships among the SEA, LEAs and other entities for the purpose of delivering technical assistance, professional development, and management advice.

4 = Provide professional development to enhance the capacity of school support team members and other technical assistance providers who are part of the Statewide system of support and that is informed by student achievement and other outcome-related measures.

5 = Implement other strategies determined by the SEA or LEA, as appropriate, for which data indicate the strategy is likely to result in improved teaching and learning in schools identified for improvement, corrective action, or restructuring.

6 = Combination 1: Schools using a combination of strategies from above. Please use Column 2 to indicate which of the above strategies comprise this combination.

7 = Combination 2: Schools using a combination of strategies from above. Please use Column 2 to indicate which of the above strategies comprise this combination.

8 = Combination 3: Schools Using a combination of strategies from above. Please use Column 2 to indicate which of the above strategies comprise this combination.

Column 6 Response Options Box

A = Improvement by at least five percentage points in two or more AYP reporting cells

B = Increased teacher retention

C = Improved parental involvement

D = Other

Source – Manual input by the SEA using the online collection tool.

1.4.8.4 Sharing of Effective Strategies

In the space below, describe how your State shared the effective strategies identified in item 1.4.8.3 with its LEAs and schools. Please exclude newsletters and handouts in your description.

This response is limited to 8,000 characters.

Districts with Title I schools eligible for 1003(a) funds were notified electronically through Alabama's Electronic Grant Application Process (www.alsde.edu). Along with the availability of funds, Title I 1003(a) Budget Details Pages in e-GAP suggested research-based strategies in eight categories: Staff; Technology; Instruction Materials; Staff Development; Intervention; Supplemental Support Related to curriculum; and Increasing Parental Involvement. Districts chose from a variety of strategies under each heading and the activities were detailed in Action Steps tied to funds on the Improvement Planning side of e-GAP. Regional State Support Team Coaches and Peers (master teachers) interacted with all improvement schools in their assigned areas.

Schools eligible for 1003(g) funds were offered a menu of school improvement resources specifically geared to either urban middle schools or rural high schools -the majority of high-risk schools identified through multiple data sources. Strategies included: participating in ARI-PAL (Project for Adolescent Literacy); and quarterly meetings with school leadership teams, along with numerous opportunities for job-embedded professional development. Joint professional learning sessions with the eight middle schools participating in the Urban Consolidated Schools Project provided ample opportunities for sharing across districts. The seven rural high schools elected to participate in an umbrella of offerings designed to improve academics and school culture while increasing the graduation rate. High Schools That Work, out of the Southern Regional Education Board (SREB), served as the catalyst for total school reform. In addition, these programs provided high quality professional learning for all seven high schools: Positive Behavior Support (PBIS); Teach 21 (21ST Century Classrooms); and Graduation Acceleration (Coaches at each school). Data was shared between all the 1003(g) eligible schools through the SDE networking meetings.

Source – Manual input by the SEA using the online collection tool.

1.4.8.5 Use of Section 1003(a) and (g) School Improvement Funds

1.4.8.5.1 Section 1003(a) State Reservations

In the space provided, enter the percentage of the FY 2008 (SY 2008-09) Title I, Part A allocation that the SEA reserved in accordance with Section 1003(a) of ESEA and §200.100(a) of ED's regulations governing the reservation of funds for school improvement under Section 1003(a) of ESEA: 4.0 %

Comments: Ninety-five percent of the four percent (\$8,178,645.00) was allocated to districts with Title I schools in improvement.

Source – Manual input by the SEA using the online collection tool.

1.4.8.5.2 Section 1003(a) and 1003(g) Allocations to LEAs and Schools

For SY 2008-09 there is no need to upload a spreadsheet to answer this question in the CSPR.

1.4.8.5.2 will be answered automatically using data submitted to EDFacts in Data Group 694, School improvement funds allocation table, from File Specification N/X132. You may review data submitted to EDFacts using the report named "Section 1003(a) and 1003(g) Allocations to LEAs and Schools -CSPR 1.4.8.5.2 (EDEN012)" from the EDFacts Reporting System.

1.4.8.5.3 Use of Section 1003(g)(8) Funds for Evaluation and Technical Assistance

Section 1003(g)(8) of ESEA allows States to reserve up to five percent of Section 1003(g) funds for administration and to meet the evaluation and technical assistance requirements for this program. In the space below, identify and describe the specific Section 1003(g) evaluation and technical assistance activities that your State conducted during SY 2008-09.

This response is limited to 8,000 characters.

Evaluation: Alabama contracted with the Southeast Regional Educational Lab (SERVE) at the University of North Carolina at Greensboro to provide an outside perspective on progress at 1003(g) middle and high schools. SERVE was to tracked data through the following measurable outcomes in a report due to the state in December 2009, including for example: the number and percentage of students scoring proficient in reading/language arts as measured by state assessments for grades 3-8; the number of middle schools whose students make improvement by participating in the Adolescent Literacy Project; and in high schools, gains in students passing the Graduation exam thus increasing the graduation rate.

Technical Assistance: Regional school improvement coaches were supported so they could more completely serve the eight 1003(g) middle schools and the seven high schools in all endeavors related to the grant, for example, ensuring that the school's Continuous Improvement Plan folded seamlessly into the SREB school improvement plan(High Schools That Work; Southern Regional Education Board). All staff associated with this fund were afforded multiple opportunities to attend in-depth, high-quality, consultant-led learning sessions focusing on a "train-the-trainer" model to build their capacity to support low-performing schools.

Source – Manual input by the SEA using the online collection tool.

1.4.8.6 Actions Taken for Title I Schools Identified for Improvement Supported by Funds Other than Those of Section 1003(a) and 1003(g).

In the space below, describe actions (if any) taken by your State in SY 2008-09 that were supported by funds other than Section 1003(a) and 1003(g) funds to address the achievement problems of schools identified for improvement, corrective action, or restructuring under Section 1116 of ESEA.

The response is limited to 8,000 characters.

School technical assistance is channeled through the State Support Team composed of Regional School Improvement Coaches and Peers/Master Teachers. Support includes building capacity for school improvement processes at the district level where training is provided to central office personnel and district leaders on: implementing and monitoring Continuous Improvement Plans (CIPs); interpreting data to drive instruction; conducting effective walk-throughs; using benchmark assessments; looking at growth through longitudinal data; utilizing strategic teaching techniques; and assisting with LEA-driven plans for Corrective Action/Restructuring. These activities are supported in part from State At-Risk Funds allocated by the state legislature.

Source – Manual input by the SEA using the online collection tool.

1.4.9 Public School Choice and Supplemental Educational Services

This section collects data on public school choice and supplemental educational services.

1.4.9.1 Public School Choice

This section collects data on public school choice. FAQs related to the public school choice provisions are at the end of this section.

1.4.9.1.2 Public School Choice – Students

In the table below, provide the number of students who were eligible for public school choice, the number of eligible students who applied to transfer, and the number who transferred under the provisions for public school choice under Section 1116 of ESEA. The number of students who were eligible for public school choice should include:

1. All students currently enrolled in a school Title I identified for improvement, corrective action or restructuring.
2. All students who transferred in the current school year under the public school choice provisions of Section 1116, and
3. All students who previously transferred under the public school choice provisions of Section 1116 and are continuing to transfer for the current school year under Section 1116.

The number of students who applied to transfer should include:

1. All students who applied to transfer in the current school year but did not or were unable to transfer.
2. All students who transferred in the current school year under the public school choice provisions of Section 1116; and
3. All students who previously transferred under the public school choice provisions of Section 1116 and are continuing to transfer for the current school year under Section 1116.

For any of the respective student counts, States should indicate in the Comment section if the count does not include any of the categories of students discussed above.

	# Students
Eligible for public school choice	38,506
Applied to transfer	664
Transferred to another school under the Title I public school choice provisions	594

1.4.9.1.3 Funds Spent on Public School Choice

In the table below, provide the total dollar amount spent by LEAs on transportation for public school choice under Section 1116 of ESEA.

	Amount
Dollars spent by LEAs on transportation for public school choice	\$

1.4.9.1.4 Availability of Public School Choice Options

In the table below provide the number of LEAs in your State that are unable to provide public school choice to eligible students due to any of the following reasons:

1. All schools at a grade level in the LEA are in school improvement, corrective action, or restructuring.
2. LEA only has a single school at the grade level of the school at which students are eligible for public school choice.
3. LEA's schools are so remote from one another that choice is impracticable.

	# LEAs
LEAs Unable to Provide Public School Choice	6

FAQs about public school choice:

- a. How should States report data on Title I public school choice for those LEAs that have open enrollment and other choice programs? For those LEAs that implement open enrollment or other school choice programs in addition to public school choice under Section 1116 of ESEA, the State may consider a student as having applied to transfer if the student meets the following:
 - Has a "home" or "neighborhood" school (to which the student would have been assigned, in the absence of a school choice program) that receives Title I funds and has been identified, under the statute, as in need of improvement, corrective action, or restructuring; and
 - Has elected to enroll, at some point since July 1, 2002 (the effective date of the Title I choice provisions), and after the home school has been identified as in need of improvement, in a school that has not been so identified and is attending that school; and
 - Is using district transportation services to attend such a school.

In addition, the State may consider costs for transporting a student meeting the above conditions towards the funds spent by an LEA on transportation for public school choice if the student is using district transportation services to attend the non-identified school.

- b. How should States report on public school choice for those LEAs that are not able to offer public school choice? In the count of LEAs that are not able to offer public school choice (for any of the reasons specified in 1.4.9.1.4), States should include those LEAs that are unable to offer public school choice at one or more grade levels. For instance, if an LEA is able to provide public school choice to eligible students at the elementary level but not at the secondary level, the State should include the LEA in the count. States should also include LEAs that are not able to provide public school choice at all (i.e., at any grade level). States should provide the reason(s) why public school choice was not possible in these LEAs at the grade level(s) in the Comment section. In addition, States may also include in the Comment section a separate count just of LEAs that are not able to offer public school choice at any grade level.

For LEAs that are not able to offer public school choice at one or more grade levels, States should count as eligible for public school choice (in 1.4.9.1.2) all students who attend identified Title I schools regardless of whether the LEA is able to offer the students public school choice.

3 Adapted from OESE/OII policy letter of August 2004. The policy letter may be found on the Department's Web page at <http://www.ed.gov/policy/elsec/guid/stateletters/choice/choice081804.html>.

1.4.9.2 Supplemental Educational Services

This section collects data on supplemental educational services.

1.4.9.2.2 Supplemental Educational Services – Students

In the table below, provide the number of students who were eligible for, who applied for, and who received supplemental educational services under Section 1116 of ESEA.

	# Students
Eligible for supplemental educational services	26,672
Applied for supplemental educational services	7,498
Received supplemental educational services	5,872
Comments: In the summer of 2008, Alabama was granted a Waiver by the USED to allow districts to choose the initial intervention in "first year" Title I School Improvement schools with the intent to promote supplemental educational services (SES). Through this waiver, three districts with a total of four "Year 1" schools qualified to participate and offered students a year of free after-school tutoring. At the end of the year, participation percentages had ranged from 21% of eligible students taking advantage of SES to a high of 54%. All the schools made their AYP goals and entered a "delay" status, the last stage before progressing out of improvement.	

Source – Initially populated from EDFacts. See Attachment D: CSPR & EDFacts Data Crosswalk.

1.4.9.2.3 Funds Spent on Supplemental Educational Services

In the table below, provide the total dollar amount spent by LEAs on supplemental educational services under Section 1116 of ESEA.

	Amount
Dollars spent by LEAs on supplemental educational services	\$
Comments: Will comment when the CSPR reopens	

1.5 TEACHER QUALITY

This section collects data on "highly qualified" teachers as the term is defined in Section 9101(23) of ESEA.

1.5.1 Core Academic Classes Taught by Teachers Who Are Highly Qualified

In the table below, provide the number of core academic classes for the grade levels listed, the number of those core academic classes taught by teachers who are highly qualified, and the number taught by teachers who are not highly qualified. The percentage of core academic classes taught by teachers who are highly qualified and the percentage taught by teachers who are not highly qualified will be calculated automatically. Below the table are FAQs about these data.

School Type	Number of Core Academic Classes (Total)	Number of Core Academic Classes Taught by Teachers Who Are Highly Qualified	Percentage of Core Academic Classes Taught by Teachers Who Are Highly Qualified	Number of Core Academic Classes Taught by Teachers Who Are NOT Highly Qualified	Percentage of Core Academic Classes Taught by Teachers Who Are NOT Highly Qualified
All classes	195,777	185,449	94.7	10,328	5.3
All elementary classes	124,030	121,076	97.6	2,954	2.4
All secondary classes	71,747	64,373	89.7	7,374	10.3
No response.					

Do the data in Table 1.5.1 above include classes taught by special education teachers who provide direct instruction core academic subjects?

Data table includes classes taught by special education teachers who provide direct instruction core academic subjects.

Yes

If the answer above is no, please explain below. The response is limited to 8,000 characters.

No response.

Does the State count elementary classes so that a full-day self-contained classroom equals one class, or does the State use a departmentalized approach where a classroom is counted multiple times, once for each subject taught?

The response is limited to 8,000 characters.

Departmentalized approach.

FAQs about highly qualified teachers and core academic subjects:

- a. *What are the core academic subjects? English, reading/language arts, mathematics, science, foreign languages, civics and government, economics, arts, history, and geography [Title IX, Section 9101(11)]. While the statute includes the arts in the core academic subjects, it does not specify which of the arts are core academic subjects; therefore, States must make this determination.*
- b. *How is a teacher defined? An individual who provides instruction in the core academic areas to kindergarten, grades 1 through 12, or ungraded classes, or individuals who teach in an environment other than a classroom setting (and who maintain daily student attendance records) [from NCES, CCD, 2001-02]*
- c. *How is a class defined? A class is a setting in which organized instruction of core academic course content is provided to one or more students (including cross-age groupings) for a given period of time. (A course may be offered to more than one class.) Instruction, provided by one or more teachers or other staff members, may be delivered in person or via a different medium. Classes that share space should be considered as separate classes if they function as separate units for more than 50% of the time [from NCES Non-fiscal Data Handbook for Early Childhood, Elementary, and Secondary Education, 2003].*
- d. *Should 6th-, 7th-, and 8th-grade classes be reported in the elementary or the secondary category? States are responsible for determining whether the content taught at the middle school level meets the competency requirements for elementary or secondary instruction. Report classes in grade 6 through 8 consistent with how teachers have been classified to determine their highly qualified status, regardless of whether their schools are configured as elementary or middle schools.*
- e. *How should States count teachers (including specialists or resource teachers) in elementary classes? States that count self-contained classrooms as one class should, to avoid over-representation, also count subject-area specialists (e.g., mathematics or music teachers) or resource teachers as teaching one class. On the other hand, States using a departmentalized approach to instruction where a self-contained classroom is counted multiple times (once for each subject taught) should also count subject-area specialists or resource teachers as teaching multiple classes.*
- f. *How should States count teachers in self-contained multiple-subject secondary classes? Each core academic subject taught for which students are receiving credit toward graduation should be counted in the numerator and the denominator. For example, if the same teacher teaches English, calculus, history, and science in a self-contained classroom, count these as four classes in the denominator. If the teacher is Highly Qualified to teach English and history, he/she would be counted as Highly Qualified in two of the four subjects in the numerator.*
- g. *What is the reporting period? The reporting period is the school year. The count of classes must include all semesters, quarters, or terms of the school year. For example, if core academic classes are held in summer sessions, those classes should be included in the count of core academic classes. A state determines into which school year classes fall.*

1.5.2 Reasons Core Academic Classes Are Taught by Teachers Who Are Not Highly Qualified

In the tables below, estimate the percentages for each of the reasons why teachers who are not highly qualified teach core academic classes. For example, if 900 elementary classes were taught by teachers who are not highly qualified, what percentage of those 900 classes falls into each of the categories listed below? If the three reasons provided at each grade level are not sufficient to explain why core academic classes at a particular grade level are taught by teachers who are not highly qualified, use the row labeled "other" and explain the additional reasons. The total of the reasons is calculated automatically for each grade level and must equal 100% at the elementary level and 100% at the secondary level.

Note: Use the numbers of core academic classes taught by teachers who are not highly qualified from 1.5.1 for both elementary school classes (1.5.2.1) and for secondary school classes (1.5.2.2) as your starting point.

	Percentage
Elementary School Classes	
Elementary school classes taught by certified general education teachers who did not pass a subject-knowledge test or (if eligible) have not demonstrated subject-matter competency through HOUSSE	74.4
Elementary school classes taught by certified special education teachers who did not pass a subject-knowledge test or have not demonstrated subject-matter competency through HOUSSE	25.2
Elementary school classes taught by teachers who are not fully certified (and are not in an approved alternative route program)	0.4
Other (please explain in comment box below)	0.0
Total	100.0

The response is limited to 8,000 characters.

	Percentage
Secondary School Classes	
Secondary school classes taught by certified general education teachers who have not demonstrated subject-matter knowledge in those subjects (e.g., out-of-field teachers)	78.4
Secondary school classes taught by certified special education teachers who have not demonstrated subject-matter competency in those subjects	17.8
Secondary school classes taught by teachers who are not fully certified (and are not in an approved alternative route program)	3.8
Other (please explain in comment box below)	0.0
Total	100.0

The response is limited to 8,000 characters.

1.5.3 Poverty Quartiles and Metrics Used

In the table below, provide the number of core academic classes for each of the school types listed and the number of those core academic classes taught by teachers who are highly qualified. The percentage of core academic classes taught by teachers who are highly qualified will be calculated automatically. The percentages used for high-and low-poverty schools and the poverty metric used to determine those percentages are reported in the second table. Below the tables are FAQs about these data.

This means that for the purpose of establishing poverty quartiles, some classes in schools where both elementary and secondary classes are taught would be counted as classes in an elementary school rather than as classes in a secondary school in 1.5.3. This also means that such a 12th grade class would be in different category in 1.5.3 than it would be in 1.5.1.

NOTE: No source of classroom-level poverty data exists, so States may look at school-level data when figuring poverty quartiles. Because not all schools have traditional grade configurations, and because a school may not be counted as both an elementary and as a secondary school, States may include as elementary schools all schools that serve children in grades K through 5 (including K through 8 or K through 12 schools).

School Type	Number of Core Academic Classes (Total)	Number of Core Academic Classes Taught by Teachers Who Are Highly Qualified	Percentage of Core Academic Classes Taught by Teachers Who Are Highly Qualified
Elementary Schools			
High Poverty Elementary Schools	29,251	28,490	97.4
Low-poverty Elementary Schools	35,721	35,065	98.2
Secondary Schools			
High Poverty secondary Schools	15,884	13,623	85.8
Low-Poverty secondary Schools	23,087	21,571	93.4

1.5.4 In the table below, provide the poverty quartiles breaks used in determining high-and low-poverty schools and the poverty metric used to determine the poverty quartiles. Below the table are FAQs about the data collected in this table.

	High-Poverty Schools (more than what %)	Low-Poverty Schools (less than what %)
Elementary schools	81.5	47.0
Poverty metric used	Will comment when the CSPR reopens	
Secondary schools	75.1	47.6
Poverty metric used	Will comment when the CSPR reopens	

FAQs on poverty quartiles and metrics used to determine poverty

- What is a "high-poverty school"? Section 1111(h)(1)(C)(viii) defines "high-poverty" schools as schools in the top quartile of poverty in the State.
- What is a "low-poverty school"? Section 1111(h)(1)(C)(viii) defines "low-poverty" schools as schools in the bottom quartile of poverty in the State.
- How are the poverty quartiles determined? Separately rank order elementary and secondary schools from highest to lowest on your percentage poverty measure. Divide the list into four equal groups. Schools in the first (highest group) are high-poverty schools. Schools in the last group (lowest group) are the low-poverty schools. Generally, States use the percentage of students who qualify for the free or reduced-price lunch program for this calculation.
- Since the poverty data are collected at the school and not classroom level, how do we classify schools as either elementary or secondary for this purpose? States may include as elementary schools all schools that serve children in grades K through 5 (including K through 8 or K through 12 schools) and would therefore include as secondary schools those that exclusively serve children in grades 6 and higher.

1.6 TITLE III AND LANGUAGE INSTRUCTIONAL PROGRAMS

This section collects annual performance and accountability data on the implementation of Title III programs.

1.6.1 Language Instruction Educational Programs

In the table below, place a check next to each type of language instruction educational programs implemented in the State, as defined in Section 3301(8), as required by Sections 3121(a)(1), 3123(b)(1), and 3123(b)(2).

Table 1.6.1 Definitions:

1. **Types of Programs = Types of programs described in the subgrantee's local plan (as submitted to the State or as implemented) that is closest to the descriptions in http://www.ncela.gwu.edu/files/uploads/5/Language_Instruction_Educational_Programs.pdf.**
2. **Other Language = Name of the language of instruction, other than English, used in the program.**

Check Types of Programs	Type of Program	Other Language
No	Dual language	
No	Two-way immersion	
No	Transitional bilingual programs	
No	Developmental bilingual	
No	Heritage language	
Yes	Sheltered English instruction	
Yes	Structured English immersion	
Yes	Specially designed academic instruction delivered in English (SDAIE)	
Yes	Content-based ESL	
Yes	Pull-out ESL	
No Response	Other (explain in comment box below)	

The response is limited to 8,000 characters.

1.6.2 Student Demographic Data

1.6.2.1 Number of ALL LEP Students in the State

In the table below, provide the unduplicated number of ALL LEP students in the State who meet the LEP definition under Section 9101(25).

- Include newly enrolled (recent arrivals to the U.S.) and continually enrolled LEP students, whether or not they receive services in a Title III language instruction educational program
- Do not include Former LEP students (as defined in Section 200.20(f)(2) of the Title I regulation) and monitored Former LEP students (as defined under Section 3121(a)(4) of Title III) in the ALL LEP student count in this table.

Number of ALL LEP students in the State	21,068
Comments:	

1.6.2.2 Number of LEP Students Who Received Title III Language Instruction Educational Program Services

In the table below, provide the unduplicated number of LEP students who received services in Title III language instructional education programs.

	#
LEP students who received services in a Title III language instruction educational program in grades K through 12 for this reporting year.	20,481
Comments:	

Source – The SEA submits the data in file N/X116 that contains data group ID 648, category set A.

1.6.2.3 Most Commonly Spoken Languages in the State

In the table below, provide the five most commonly spoken languages, other than English, in the State (for all LEP students, not just LEP students who received Title III Services). The top five languages should be determined by the highest number of students speaking each of the languages listed.

Language	# LEP Students
Spanish; Castilian	17,626
Korean	576
Vietnamese	443
Arabic	373
Chinese	202

Report additional languages with significant numbers of LEP students in the comment box below.

The response is limited to 8,000 characters.

1.6.3 Student Performance Data

This section collects data on LEP student English language proficiency, as required by Sections 1111(h)(4)(D) and 3121(a)(2).

1.6.3.1.1 All LEP Students Tested on the State Annual English Language Proficiency Assessment

In the table below, please provide the number of ALL LEP students tested on annual State English language proficiency assessment (as defined in 1.6.2.1).

	#
Number tested on State annual ELP assessment	19,474
Number not tested on State annual ELP assessment	1,594
Total	21,068
Comments: Based on a recommendation from our FY08 Title III Federal Monitoring, Alabama determined that we needed to have one means of pulling ELL data. Prior to this determination we used a separate process for obtaining data required for ELL. To streamline the data collection we are currently using the state collection process. During the transition year (2008-2009) our data reflect inconsistencies. These inconsistencies will stabilize during the 2009-2010 school year. Training has been provided to local districts on data collection and we are providing four verification checkpoints to ensure that these data are accurate.	

1.6.3.1.2 ALL LEP Student English Language Proficiency Results

	#
Number proficient or above on State annual ELP assessment	6,984
Percent proficient or above on State annual ELP assessment	36.0
Comments:	

1.6.3.2.1 Title III LEP Students Tested on the State Annual English Language Proficiency (ELP) Assessment

In the table below, provide the number of Title III LEP students tested on annual State English language proficiency assessment.

	#
Number tested on State annual ELP assessment	18,050
Number not tested on State annual ELP assessment	2,163
Total	20,213
Comments: Based on a recommendation from our FY08 Title III Federal Monitoring, Alabama determined that we needed to have one means of pulling ELL data. Prior to this determination we used a separate process for obtaining data required for ELL. To streamline the data collection we are currently using the state collection process. During the transition year (2008-2009) our data reflect inconsistencies. These inconsistencies will stabilize during the 2009-2010 school year. Training has been provided to local districts on data collection and we are providing four verification checkpoints to ensure that these data are accurate.	
In the table below, provide the number of Title III Students who took the State annual ELP assessment for the first time and whose progress cannot be determined. Report this number ONLY if the State did not include these students in establishing AMAO1/making progress target and did not include them in the calculations for AMAO1/making progress(# and % making progress).	
	#
Number of Title III LEP with one data point whose progress can not be determined and whose results were not included in the calculation for AMAO1.	4,930

1.6.3.2.2

Table 1.6.3.2.2 Definitions:

1. **Annual Measureable Achievement Objectives (AMAOs) = State targets for the percent of students making progress and attaining proficiency.**
2. **Making Progress = Number of Title III LEP students that met the definition of Making Progress as defined by the State and submitted to ED in the State Consolidated Application (CSA), or as amended.**
3. **ELP Attainment = Number of Title III LEP students that meet the State defined English language proficiency submitted to ED in the State Consolidated Application (CSA), or as amended.**
4. **Results = Number and percent of Title III LEP students that met the State definition of Making Progress and the number and percent that met the State definition of Attainment of English language proficiency.**

In the table below, provide the State targets for the number and percentage of States making progress and attaining English proficiency for this reporting period. Additionally, provide the results from the annual State English language proficiency assessment for Title III-served LEP students who participated in a Title III language instruction educational program in grades K through 12. If your State uses cohorts, provide us with the range of targets, (i.e., indicate the lowest target among the cohorts, e.g., 10% and the highest target among a cohort, e.g., 70%).

	Results		Targets	
	#	%	#	%
Making progress	14,767	59.8		
ELP attainment	6,629	26.9		
Comments: Alabama has sent the Growth Targets in a chart to our Program Officer Millie Bentley-Memom.				

1.6.3.6 Title III Served Monitored Former LEP (MFLEP) Students

This section collects data on the performance of former LEP students as required by Sections 3121(a)(4) and 3123(b)(8).

1.6.3.6.1 Title III Served MFLEP Students by Year Monitored

In the table below, report the unduplicated count of monitored former LEP students during the two consecutive years of monitoring, which includes both MFLEP students in AYP grades and in non-AYP grades.

Monitored Former LEP students include:

- Students who have transitioned out of a language instruction educational program funded by Title III into classrooms that are not tailored for LEP students.
- Students who are no longer receiving LEP services and who are being monitored for academic content achievement for 2 years after the transition.

Table 1.6.3.6.1 Definitions:

1. **# Year One = Number of former LEP students in their first year of being monitored.**
2. **# Year Two = Number of former LEP students in their second year of being monitored.**
3. **Total = Number of monitored former LEP students in year one and year two. This is automatically calculated.**

# Year One	# Year Two	Total
2,337	1,860	4,197
Comments:		

1.6.3.6.2 In the table below, report the number of MFLEP students who took the annual mathematics assessment. Please provide data only for those students who transitioned into classrooms not designed for LEP students and who no longer received services under Title III in this reporting year. These students include both students who are monitored former LEP students in their first year of monitoring, and those in their second year of monitoring.

Table 1.6.3.6.2 Definitions:

1. **# Tested = State-aggregated number of MFLEP students who were tested in mathematics in all AYP grades.**
2. **# At or Above Proficient = State-aggregated number of MFLEP students who scored at or above proficient on the State annual mathematics assessment.**
3. **% Results = Automatically calculated based on number who scored at or above proficient divided by the number tested.**
4. **# Below proficient = State-aggregated number of MFLEP students in grades used for NCLB accountability determinations (3 through 8 and once in high school) who did not score proficient on the State NCLB mathematics assessment. This will be automatically calculated.**

# Tested	# At or Above Proficient	% Results	# Below Proficient
4,196	3,748	89.3	448
Comments:			

1.6.3.6.3 Monitored Former LEP (MFLEP) Students Results for Reading/Language Arts

In the table below, report the number of MFLEP students who took the annual mathematics assessment. Please provide data only for those students who transitioned into classrooms not designed for LEP students and who no longer received services under Title III in this reporting year. These students include both students who are monitored former LEP students in their first year of monitoring, and those in their second year of monitoring.

Table 1.6.3.6.3 Definitions:

1. **# Tested = State-aggregated number of MFLEP students who were tested in reading/language arts in all AYP grades.**
2. **# At or Above Proficient = State-aggregated number of MFLEP students who scored at or above proficient on the State annual reading/language arts assessment.**
3. **% Results = Automatically calculated based on number who scored at or above proficient divided by the total number tested.**
4. **# Below proficient = State-aggregated number MFLEP students who did not score proficient on the State annual reading/language arts assessment. This will be automatically calculated.**

# Tested	# At or Above Proficient	% Results	# Below Proficient
4,196	3,980	94.8	216

Comments:

1.6.3.6.4 Monitored Former LEP (MFLEP) Students Results for Science

In the table below, report results for monitored former LEP students who took the annual science assessment. Please provide data only for those students who transitioned into classrooms not designed for LEP students and who no longer received services under Title III in this reporting year. These students include both students who are monitored former LEP students in their first year of monitoring, and those in their second year of monitoring.

Table 1.6.3.6.4 Definitions:

1. **# Tested = State-aggregated number of MFLEP students who were tested in science.**
2. **# At or Above Proficient = State-aggregated number of MFLEP students who scored at or above proficient on the State annual science assessment.**
3. **% Results = Automatically calculated based on number who scored at or above proficient divided by the total number tested.**
4. **# Below proficient = State-aggregated number MFLEP students who did not score proficient on the State annual science assessment. This will be automatically calculated.**

# Tested	# At or Above Proficient	% Results	# Below Proficient
2,111	1,814	85.9	297
Comments:			

1.6.4 Title III Subgrantees

This section collects data on the performance of Title III subgrantees.

1.6.4.1 Title III Subgrantee Performance

In the table below, report the number of Title III subgrantees meeting the criteria described in the table. Do not leave items blank. If there are zero subgrantees who met the condition described, put a zero in the number (#) column. Do not double count subgrantees by category.

Note: Do not include number of subgrants made under Section 3114(d)(1) from funds reserved for education programs and activities for immigrant children and youth. (Report Section 3114(d)(1) subgrants in 1.6.5.1 ONLY.)

	#
# -Total number of subgrantees for the year	51
# -Number of subgrantees that met all three Title III AMAOs	26
# -Number of subgrantees who met AMAO 1	30
# -Number of subgrantees who met AMAO 2	45
# -Number of subgrantees who met AMAO 3	50
# -Number of subgrantees that did not meet any Title III AMAOs	0
# -Number of subgrantees that did not meet Title III AMAOs for two consecutive years (SYs 2007-08 and 2008-09)	10
# -Number of subgrantees implementing an improvement plan in SY 2008-09 for not meeting Title III AMAOs	10
# -Number of subgrantees who have not met Title III AMAOs for four consecutive years (SYs 2005-06, 2006-07, 2007-08, and 2008-09)	0
Comments: The SEA verifies that they have zero subgrantees who have not meet AMAOs for 4 consecutive years.	

1.6.4.2 State Accountability

In the table below, indicate whether the State met all three Title III AMAOs.

Note: Meeting all three Title III AMAOs means meeting each State-set target for each objective: Making Progress, Attaining Proficiency, and Making AYP for the LEP subgroup. This section collects data that will be used to determine State AYP, as required under Section 6161.

State met <u>all</u> three Title III AMAOs	<u>Yes</u>
Comments:	

1.6.4.3 Termination of Title III Language Instruction Educational Programs

This section collects data on the termination of Title III programs or activities as required by Section 3123(b)(7).

Were any Title III language instruction educational programs or activities terminated for failure to reach program goals?	No
If yes, provide the number of language instruction educational programs or activities for immigrant children and youth terminated.	
Comments:	

1.6.5 Education Programs and Activities for Immigrant Students

This section collects data on education programs and activities for immigrant students.

1.6.5.1 Immigrant Students

In the table below, report the unduplicated number of immigrant students enrolled in schools in the State and who participated in qualifying educational programs under Section 3114(d)(1).

Table 1.6.5.1 Definitions:

1. **Immigrant Students Enrolled = Number of students who meet the definition of immigrant children and youth under Section 3301(6) and enrolled in the elementary or secondary schools in the State.**
2. **Students in 3114(d)(1) Program = Number of immigrant students who participated in programs for immigrant children and youth funded under Section 3114(d)(1), using the funds reserved for immigrant education programs/activities. This number should not include immigrant students who receive services in Title III language instructional educational programs under Sections 3114(a) and 3115(a).**
3. **3114(d)(1)Subgrants = Number of subgrants made in the State under Section 3114(d)(1), with the funds reserved for immigrant education programs/activities. Do not include Title III Language Instruction Educational Program (LIEP) subgrants made under**

Sections 3114(a) and 3115(a) that serve immigrant students enrolled in them.

# Immigrant Students Enrolled	# Students in 3114(d)(1) Program	# of 3114(d)(1) Subgrants
4,607	1,430	7

If state reports zero (0) students in programs or zero (0) subgrants, explain in comment box below. The response is limited to 8,000 characters.

Source – Initially populated from ED Facts. See Attachment D: CSPR & ED Facts Data Crosswalk.

1.6.6 Teacher Information and Professional Development

This section collects data on teachers in Title III language instruction education programs as required under Section 3123(b)(5).

1.6.6.1 Teacher Information

This section collects information about teachers as required under Section 3123 (b)(5).

In the table below, report the number of teachers who are working in the Title III language instruction educational programs as defined under Section 3301(8) and reported in 1.6.1 (Types of language instruction educational programs) even if they are not paid with Title III funds.

Note: Section 3301(8) û The term æLanguage instruction educational program' means an instruction course û (A) in which a limited English proficient child is placed for the purpose of developing and attaining English proficiency, while meeting challenging State academic content and student academic achievement standards, as required by Section 1111(b)(1); and (B) that may make instructional use of both English and a child's native language to enable the child to develop and attain English proficiency and may include the participation of English proficient children if such course is designed to enable all participating children to become proficient in English and a second language.

	#
Number of all certified/licensed teachers currently working in Title III language instruction educational programs.	1,504
Estimate number of additional certified/licensed teachers that will be needed for Title III language instruction educational programs in the next 5 years*.	206

Explain in the comment box below if there is a zero for any item in the table above. The response is limited to 8,000 characters.

* This number should be the total additional teachers needed for the next 5 years, not the number needed for each year. Do not include the number of teachers currently working in Title III English language instruction educational programs.

1.6.6.2 Professional Development Activities of Subgrantees Related to the Teaching and Learning of LEP Students

In the tables below, provide information about the subgrantee professional development activities that meet the requirements of Section 3115(c)(2).

Table 1.6.6.2 Definitions:

1. **Professional Development Topics = Subgrantee activities for professional development topics required under Title III.**
2. **#Subgrantees = Number of subgrantees who conducted each type of professional development activity. A subgrantee may conduct more than one professional development activity. (Use the same method of counting subgrantees, including consortia, as in 1.6.1.1 and 1.6.4.1.)**
3. **Total Number of Participants = Number of teachers, administrators and other personnel who participated in each type of the professional development activities reported.**
4. **Total = Number of all participants in professional development (PD) activities**

Type of Professional Development Activity	# Subgrantees	
Instructional strategies for LEP students	109	
Understanding and implementation of assessment of LEP students	0	
Understanding and implementation of ELP standards and academic content standards for LEP students	69	
Alignment of the curriculum in language instruction educational programs to ELP standards	66	
Subject matter knowledge for teachers	0	
Other (Explain in comment box)	44	
Participant Information	# Subgrantees	# Participants
PD provided to content classroom teachers	51	8,374
PD provided to LEP classroom teachers	46	1,007
PD provided to principals	47	524
PD provided to administrators/other than principals	48	404
PD provided to other school personnel/non-administrative	42	918
PD provided to community based organization personnel	18	140
Total	252	11,367

The response is limited to 8,000 characters.

Second Language Acquisition

1.6.7 State Subgrant Activities

This section collects data on State grant activities.

1.6.7.1 State Subgrant Process

In the table below, report the time between when the State receives the Title III allocation from ED, normally on July 1 of each year for the upcoming school year, and the time when the State distributes these funds to subgrantees for the intended school year. Dates must be in the format MM/DD/YY.

Table 1.6.7.1 Definitions:

1. **Date State Received Allocation = Annual date the State receives the Title III allocation from US Department of Education (ED).**
2. **Date Funds Available to Subgrantees = Annual date that Title III funds are available to approved subgrantees.**
3. **# of Days/\$\$ Distribution = Average number of days for States receiving Title III funds to make subgrants to subgrantees beginning from July 1 of each year, except under conditions where funds are being withheld.**

Example: State received SY 2008-09 funds July 1, 2008, and then made these funds available to subgrantees on August 1, 2008, for SY 2008-09 programs. Then the "# of days/\$\$ Distribution" is 30 days.

Date State Received Allocation	Date Funds Available to Subgrantees	# of Days/\$\$ Distribution
7/10/08	10/1/08	53
Comments: The fiscal year of the State of Alabama is October 1 through September 30. The # of Days/\$\$ Distribution is calculated from the time funds are available (October 1) and the first distribution to an LEA.		

1.6.7.2 Steps To Shorten the Distribution of Title III Funds to Subgrantees

In the comment box below, describe how your State can shorten the process of distributing Title III funds to subgrantees. The response is limited to 8,000 characters.

Data required to make the allocations to the LEA is available before the funds are made available to LEA's. Consequently, it is a short time before they request reimbursement for expenditures. The first request for FY 2009 Title III funds was made in November 2008.

1.7 PERSISTENTLY DANGEROUS SCHOOLS

In the table below, provide the number of schools identified as persistently dangerous, as determined by the State, by the start of the school year. For further guidance on persistently dangerous schools, refer to Section B "Identifying Persistently Dangerous Schools" in the Unsafe School Choice Option Non-Regulatory Guidance, available at: <http://www.ed.gov/policy/elsec/guid/unsafeschoolchoice.pdf>.

	#
Persistently Dangerous Schools	
Comments: No schools in the state of Alabama are Persistently Dangerous for the 2008-2009 school year.	

1.8 GRADUATION RATES AND DROPOUT RATES

This section collects graduation and dropout rates.

1.8.1 Graduation Rates

In the table below, provide the graduation rates calculated using the methodology that was approved as part of the State's accountability plan for the previous school year (SY 2007-08). Below the table are FAQs about the data collected in this table.

Student Group	Graduation Rate
All Students	85.5
American Indian or Alaska Native	91.8
Asian or Pacific Islander	95.0
Black, non-Hispanic	81.0
Hispanic	80.2
White, non-Hispanic	87.9
Children with disabilities (IDEA)	60.9
Limited English proficient	79.1
Economically disadvantaged	81.1
Migratory students	94.0
Male	80.5
Female	90.7

Comments: Alabama showed an increase in the graduation rate of more than 10% for our Migratory students. Our graduation rate increased from 75% to 94%. Some of the contributing factors for this increase is that the State of Alabama has placed an emphasis on all students graduating. Everyone working with high school students has made a greater effort to keep all students in school from attendance incentives, phone calls home, and words of encouragement. Also some of the school systems that have migrant programs have also placed a greater emphasis on helping students graduate. They have provided classes at night, provided classes on line, flexible time in the computer labs, tutorial help for struggling students and summer school programs are offered in which Migrant students are strongly encouraged to participate. Again the state as a whole is working harder on credit recovery programs for those students who either come to us with or have any partial credits. The Alabama migrant population has and is benefiting from the entire State of Alabama's focus on helping our students graduate and increasing the graduation rate for every student.

Source – Initially populated from EDFacts. See Attachment D: CSPR & EDFacts Data Crosswalk. If the SEA has additional racial/ethnic groups or combinations of racial/ethnic groups in its accountability plan under NCLB, the SEA will report the above data for those groups through the online CSPR collection tool.

FAQs on graduation rates:

- a. *What is the graduation rate? Section 200.19 of the Title I regulations issued under the No Child Left Behind Act on December 2, 2002, defines graduation rate to mean:*
 - The percentage of students, measured from the beginning of high school, who graduate from public high school with a regular diploma (not including a GED or any other diploma not fully aligned with the State's academic standards) in the standard number of years; or,
 - Another more accurate definition developed by the State and approved by the Secretary in the State plan that more accurately measures the rate of students who graduate from high school with a regular diploma; and
 - Avoids counting a dropout as a transfer.
- b. *What if the data collection system is not in place for the collection of graduate rates? For those States that are reporting transitional graduation rate data and are working to put into place data collection systems that will allow the State to calculate the graduation rate in accordance with Section 200.19 for all the required subgroups, please provide a detailed progress report on the status of those efforts.*

The response is limited to 8,000 characters.

1.8.2 Dropout Rates

In the table below, provide the dropout rates calculated using the annual event school dropout rate for students leaving a school in a single year determined in accordance with the National Center for Education Statistic's (NCES) Common Core of Data (CCD) for the previous school year (SY 2007-08). Below the table is a FAQ about the data collected in this table.

Student Group	Dropout Rate
All Students	
American Indian or Alaska Native	
Asian or Pacific Islander	
Black, non-Hispanic	
Hispanic	
White, non-Hispanic	
Children with disabilities (IDEA)	
Limited English proficient	
Economically disadvantaged	
Migratory students	
Male	
Female	
Comments:	

FAQ on dropout rates:

What is a dropout? A dropout is an individual who: 1) was enrolled in school at some time during the previous school year; and 2) was not enrolled at the beginning of the current school year; and 3) has not graduated from high school or completed a State-or district-approved educational program; and 4) does not meet any of the following exclusionary conditions: a) transfer to another public school district, private school, or State-or district-approved educational program (including correctional or health facility programs); b) temporary absence due to suspension or school-excused illness; or c) death.

1.9 EDUCATION FOR HOMELESS CHILDREN AND YOUTHS PROGRAM

This section collects data on homeless children and youths and the McKinney-Vento grant program.

In the table below, provide the following information about the number of LEAs in the State who reported data on homeless children and youths and the McKinney-Vento program. The totals will be will be automatically calculated.

	#	# LEAs Reporting Data
LEAs without subgrants	97	97
LEAs with subgrants	35	35
Total	132	132
Comments:		

1.9.1 All LEAs (with and without McKinney-Vento subgrants)

The following questions collect data on homeless children and youths in the State.

1.9.1.1 Homeless Children And Youths

In the table below, provide the number of homeless children and youths by grade level enrolled in public school at any time during the regular school year. The totals will be automatically calculated:

Age/Grade	# of Homeless Children/Youths Enrolled in Public School in LEAs Without Subgrants	# of Homeless Children/Youths Enrolled in Public School in LEAs With Subgrants
Age 3 through 5 (not Kindergarten)	11	360
K	243	1,063
1	212	1,071
2	209	1,062
3	205	1,056
4	197	950
5	118	948
6	122	801
7	124	776
8	101	708
9	61	757
10	58	605
11	47	492
12	38	444
Ungraded	N<10	17
Total	1,749	11,110
Comments:		

1.9.1.2 Primary Nighttime Residence of Homeless Children and Youths

In the table below, provide the number of homeless children and youths by primary nighttime residence enrolled in public school at any time during the regular school year. The primary nighttime residence should be the student's nighttime residence when he/she was identified as homeless. The totals will be automatically calculated.

	# of Homeless Children/Youths -LEAs Without Subgrants	# of Homeless Children/Youths -LEAs With Subgrants
Shelters, transitional housing, awaiting foster care	64	944
Doubled-up (e.g., living with another family)	1,605	9,464
Unsheltered (e.g., cars, parks, campgrounds, temporary trailer, or abandoned buildings)	38	368
Hotels/Motels	42	334
Total	1,749	11,110
Comments:		

1.9.2 LEAs with McKinney-Vento Subgrants

The following sections collect data on LEAs with McKinney-Vento subgrants.

1.9.2.1 Homeless Children and Youths Served by McKinney-Vento Subgrants

In the table below, provide the number of homeless children and youths by grade level who were served by McKinney-Vento subgrants during the regular school year. The total will be automatically calculated.

Age/Grade	# Homeless Children/Youths Served by Subgrants
Age 3 through 5 (not Kindergarten)	338
K	901
1	884
2	911
3	851

1.9.2.2 Subgroups of Homeless Students Served

In the table below, please provide the following information about the homeless students served during the regular school year.

	# Homeless Students Served
Unaccompanied youth	174
Migratory children/youth	150
Children with disabilities (IDEA)	1,056
Limited English proficient students	414
Comments:	

Source – Initially populated from EDFacts. See Attachment D: CSPR & EDFacts Data Crosswalk.

1.9.2.3 Educational Support Services Provided by Subgrantees

In the table below, provide the number of subgrantee programs that provided the following educational support services with McKinney-Vento funds.

	# McKinney-Vento Subgrantees That Offer
Tutoring or other instructional support	25
Expedited evaluations	6
Staff professional development and awareness	21
Referrals for medical, dental, and other health services	20
Transportation	18
Early childhood programs	15
Assistance with participation in school programs	24
Before-, after-school, mentoring, summer programs	22
Obtaining or transferring records necessary for enrollment	15
Parent education related to rights and resources for children	21
Coordination between schools and agencies	22
Counseling	16
Addressing needs related to domestic violence	14
Clothing to meet a school requirement	28
School supplies	33
Referral to other programs and services	23
Emergency assistance related to school attendance	15
Other (optional – in comment box below)	0
Other (optional – in comment box below)	0
Other (optional – in comment box below)	0

The response is limited to 8,000 characters.

Source – Manual input by SEA into the online collection tool.

1.9.2.4 Barriers To The Education Of Homeless Children And Youth

In the table below, provide the number of subgrantees that reported the following barriers to the enrollment and success of homeless children and youths.

	# Subgrantees Reporting
Eligibility for homeless services	6
School Selection	6
Transportation	10
School records	7
Immunizations	10
Other medical records	2
Other Barriers – in comment box below	0

The response is limited to 8,000 characters.

1.9.2.5 Academic Progress of Homeless Students

The following questions collect data on the academic achievement of homeless children and youths served by McKinney-Vento subgrants.

1.9.2.5.1 Reading Assessment

In the table below, provide the number of homeless children and youths served who were tested on the State ESEA reading/language arts assessment and the number of those tested who scored at or above proficient. Provide data for grades 9 through 12 only for those grades tested for ESEA.

Grade	# Homeless Children/Youths Served by McKinney-Vento Taking Reading Assessment Test	# Homeless Children/Youths Served by McKinney-Vento Who Scored At or Above Proficient

1.10 MIGRANT CHILD COUNTS

This section collects the Title I, Part C, Migrant Education Program (MEP) child counts which States are required to provide and may be used to determine the annual State allocations under Title I, Part C. The child counts should reflect the reporting period of September 1, 2008 through August 31, 2009. This section also collects a report on the procedures used by States to produce true, accurate, and valid child counts.

To provide the child counts, each SEA should have sufficient procedures in place to ensure that it is counting only those children who are eligible for the MEP. Such procedures are important to protecting the integrity of the State's MEP because they permit the early discovery and correction of eligibility problems and thus help to ensure that only eligible migrant children are counted for funding purposes and are served. If an SEA has reservations about the accuracy of its child counts, it must inform the Department of its concerns and explain how and when it will resolve them under Section 1.10.3.4 Quality Control Processes.

Note: In submitting this information, the Authorizing State Official must certify that, to the best of his/her knowledge, the child counts and information contained in the report are true, reliable, and valid and that any false Statement provided is subject to fine or imprisonment pursuant to 18 U.S.C. 1001.

FAQs on Child Count:

How is "out-of-school" defined? Out-of-school means youth up through age 21 who are entitled to a free public education in the State but are not currently enrolled in a K-12 institution. This could include students who have dropped out of school, youth who are working on a GED outside of a K-12 institution, and youth who are "here-to-work" only. It does not include preschoolers, who are counted by age grouping.

How is "ungraded" defined? Ungraded means the children are served in an educational unit that has no separate grades. For example, some schools have primary grade groupings that are not traditionally graded, or ungraded groupings for children with learning disabilities. In some cases, ungraded students may also include special education children, transitional bilingual students, students working on a GED through a K-12 institution, or those in a correctional setting. (Students working on a GED outside of a K-12 institution are counted as out-of-school youth.)

1.10.1 Category 1 Child Count

In the table below, enter the unduplicated statewide number by age/grade of eligible migrant children age 3 through 21 who, within 3 years of making a qualifying move, resided in your State for one or more days during the reporting period of September 1, 2008 through August 31, 2009. This figure includes all eligible migrant children who may or may not have participated in MEP services. Count a child who moved from one age/grade level to another during the reporting period only once in the highest age/grade that he/she attained during the reporting period. The unduplicated statewide total count is calculated automatically.

Do not include:

- Children age birth through 2 years
- Children served by the MEP (under the continuation of services authority) after their period of eligibility has expired when other services are not available to meet their needs
- Previously eligible secondary-school children who are receiving credit accrual services (under the continuation of services authority).

Age/Grade	12-Month Count of Eligible Migrant Children Who Can be Counted for Funding Purposes

1.10.1.1 Category 1 Child Count Increases/Decreases

In the space below, explain any increases or decreases from last year in the number of students reported for Category 1 greater than 10 percent.

The response is limited to 8,000 characters.

As is happening all over the country more of our migrant families are choosing not to moving but to settle out of the migrant lifestyle. Thus they are no longer considered migrant. Other families that are moving are securing jobs that are not considered to be "migrant jobs" such as construction, and restaurant work. They are still moving from state to state just taking different jobs. In many cases the non migrant jobs pay better. Also in our area many of the farms are family owned and in this economic climate they are not hiring as many additional workers. They must to do most of the work themselves in order to get by.

1.10.2 Category 2 Child Count

In the table below, enter by age/grade the unduplicated statewide number of eligible migrant children age 3 through 21 who, within 3 years of making a qualifying move, were served for one or more days in a MEP-funded project conducted during either the summer term or during intersession periods that occurred within the reporting period of September 1, 2008 through August 31, 2009. Count a child who moved from one age/grade level to another during the reporting period only once in the highest age/grade that he/she attained during the reporting period. Count a child who moved to different schools within the State and who was served in both traditional summer and year-round school intersession programs only once. The unduplicated statewide total count is calculated automatically.

Do not include:

- Children age birth through 2 years
- Children served by the MEP (under the continuation of services authority) after their period of eligibility has expired when other services are not available to meet their needs
- Previously eligible secondary-school children who are receiving credit accrual services (under the continuation of services authority).

1.10.2.1 Category 2 Child Count Increases/Decreases

In the space below, explain any increases or decreases from last year in the number of students reported for Category 2 greater than 10 percent.

The response is limited to 8,000 characters.

As is happening all over the country more of our migrant families are choosing not to moving but to settle out of the migrant lifestyle. Thus they are no longer considered migrant. Other families that are moving are securing jobs that are not considered to be "migrant jobs" such as construction, and restaurant work. They are still moving from state to state just taking different jobs. In many cases the non migrant jobs pay better. Also in our area many of the farms are family owned and in this economic climate they are not hiring as many additional workers. They must to do most of the work themselves in order to get by.

1.10.3 Child Count Calculation and Validation Procedures

The following question requests information on the State's MEP child count calculation and validation procedures.

1.10.3.1 Student Information System

In the space below, respond to the following questions: What system(s) did your State use to compile and generate the Category 1 and Category 2 child count for this reporting period (e.g., NGS, MIS 2000, COEStar, manual system)? Were child counts for the last reporting period generated using the same system(s)? If the State's category 2 count was generated using a different system from the category 1 count, please identify each system.

The response is limited to 8,000 characters.

The state of Alabama used the MIS2000 data system to compile and generate the Category 1 and Category 2 child count for this reporting period. MIS2000 was also used for the last reporting period.

1.10.3.2 Data Collection and Management Procedures

In the space below, respond to the following questions: How was the child count data collected? What data were collected? What activities were conducted to collect the data? When were the data collected for use in the student information system? If the data for the State's category 2 count were collected and maintained differently from the category 1 count, please describe each set of procedures.

The response is limited to 8,000 characters.

Alabama is divided into 3 regions for the purpose of data collection and quality control. Each region has a coordinator who visits each program as part of the state's quality control plan and collects/reviews each new Certificate of Eligibility with the local staff. During this same visit any withdrawals and/or school transfers are collected. The regional coordinator takes the information back to home base where the new data and updates are entered. This is done on a monthly or as needed basis. The COE document upon completion contains the following data: School District Name: The school district name is entered at the top of the COE. COE Identification Number: The COE ID # is generated by the MIS2000 system when the COE is entered by one of the three regional coordinators. Withdrawal Date: When the child listed on a COE withdraws from the local school system, the MEP staff enters the withdrawal date on the original COE. The regional coordinator then enters the withdrawal date on the MIS2000 database. The regional coordinators contact the local MEP staff for updates regarding migrant students who have withdrawn or changed schools. Worker Information: Worker's First, Middle Initial, Last Name, Gender, and Current Address of Worker/Family Child Data: First, Middle Initial, Last Name, an MIS2000 assigned ID number (which stays with the student upon all enrollments in Alabama), Ethnicity, Gender, Date of Birth, Date of Birth Verification, Birthplace, School Name, Grade, Enroll Date, Enroll Type, and Interrupted Education (Yes or No) Eligibility Data: The school district the child(ren)/family moved to and from, the qualifying arrival date and residency date of the children/family, information on whether the child moved with or to join the worker or on his/her own as an emancipated youth, the relationship of the child to the worker, checks to identify whether the worker came to obtain or seek, temporary or seasonal agricultural or fishing employment, the name of the qualifying activity, and the reason the work is considered temporary. Parent/Guardian Consent: The parent/guardian signs and dates the COE, after FERPA has been explained to him/her, authorizing the school district and the State Educational Agency to release, transfer, and/or receive the child's education and health records to/from other school districts, educational agencies, and other pertinent agencies. Eligibility Data Certification: The recruiter signs the COE certifying that the children listed on the COE are eligible for MEP services based upon the information provided. The signature attests that "to the best of the recruiter's knowledge, the information is true, reliable, and valid. The recruiter then submits the completed COE to the local MEP designee for a signature certifying the same statement as the recruiter. Summer School/Intersession: The local MEP staffs provide a description and the dates of the migrant summer programs. The local MEP staff submits a list of all students who attend the migrant summer program. A school history line is entered on the MIS2000 with the dates of summer attendance for each child who attends. The local MEP staffs also provide a list of the services the students receive during the summer programs. These services are entered on the MIS2000.

In the space below, describe how the child count data are inputted, updated, and then organized by the student information system for child count purposes at the State level

The response is limited to 8,000 characters.

The regional coordinators regularly enter and update all data. The MIS2000 system technicians build reports which organize the data needed for annual reporting. The two reports used are: Table C-7 12 Month Count by District (Category 1) and Table C-7 Summer Count by District (Category 2). These are both unduplicated counts. The tables are run "by district" in order to have further checks for accuracy. The MIS2000 is used for migrant data entry in Alabama. There are three regional migrant coordinators who enter migrant data for their assigned regions of the state and are the only persons who enter and update migrant data on the MIS2000 data system. The regional coordinators enter data weekly. The state of Alabama requires each school system to have Employment/Agricultural surveys completed on new students who enter their systems. The local MEP recruiters for systems who have funded programs and the state recruiter for those systems without funded programs use these "Employment Survey" forms to find potential migrant students. The families are visited face-to-face to determine eligibility. If the family is eligible based on MEP guidelines, a COE is completed with the family and children information required on the COE. Eligibility Data Verification and Certification: The recruiter completes the COE and signs the COE certifying that the children listed on the COE are eligible for MEP services based upon the information provided. The signature attests that

"to the best of the recruiter's knowledge, the information is true, reliable, and valid. " The recruiter checks the COE for completeness and then submits the completed COE to the local MEP designee for a check and completeness and a signature certifying the same statement as the recruiter. After the local MEP designee has signed and dated the COE, it is submitted for approval to the state MEP committee. The state MEP committee checks the COE for completeness, and eligibility. If the COE is complete and accurate and the eligibility is approved, the regional coordinator enters the COE into the MIS2000 system and the COE is returned to the local system for filing. If the COE is not approved due to lack of completeness or eligibility questions or issues, it is returned to the system for more information or corrections. If the COE is not approved due to eligibility issues, it is returned to the local MEP with the reason. The yearly verification process to determine that the children/family is still in the area and in the school system combines a combination of the following methods: Use of face-to-face visits with the family by the local migrant staff Verifying that the student is still enrolled in school by use of school records especially by checking the state student tracking system used by all the schools STI which contains enrollment and withdrawal records. COE Eligibility Data Verification and Certification: The recruiter completes the COE and signs the COE certifying that the child(ren) listed on the COE are eligible for MEP services based upon the information provided. The signature attests that "to the best of the recruiter's knowledge, the information is true, reliable, and valid". The recruiter then submits the completed COE to the local MEP designee for a signature certifying the same statement as the recruiter. After the local MEP designee has signed and dated the COE, it is submitted for approval to the state MEP committee. The state MEP committee, made up of the state director, the state recruiter, and all three of the regional coordinators, checks the COE completeness and eligibility. If the COE is complete and the eligibility is approved, the regional coordinator enters the COE into the MIS2000 system and the COE is returned to the local system for filing. If the COE is not approved due to lack of completeness or eligibility questions or issues, it is returned to the local system for more information or corrections. If the COE is not approved due to eligibility issues, it is returned to the local MEP with the reason.

If the data for the State's category 2 count were collected and maintained differently from the category 1 count, please describe each set of procedures.

The response is limited to 8,000 characters.

The State of Alabama's Category 2 data IS NOT collected differently from the Category 1 count.

1.10.3.3 Methods Used To Count Children

In the space below, respond to the following question: How was each child count calculated? Please describe the compilation process and edit functions that are built into your student information system(s) specifically to produce an accurate child count. In particular, describe how your system includes and counts only:

- children who were between age 3 through 21;
- children who met the program eligibility criteria (e.g., were within 3 years of a last qualifying move, had a qualifying activity);
- children who were resident in your State for at least 1 day during the eligibility period (September 1 through August 31);
- children who—in the case of Category 2—received a MEP-funded service during the summer or intersession term; and
- children once per age/grade level for each child count category.

The response is limited to 8,000 characters.

Alabama uses Management Services for Education Data (MSeD) for our data collection. The data system we use is called the MIS2000 system. The purpose of MIS2000 is to collect all data relevant to the MEP in Alabama from the schools and districts that serve the students and to compile it into a single database at the state level so that unduplicated counts can be produced for the CSPR. MIS2000 has all data from all sites throughout the state. The system has a search procedure, the potential to duplicate reports, and the merge student procedure to work together to purge duplicate student records. A single unduplicated count for the state is produced from a database that itself should be free of duplicates after using the three tools mentioned above. Producing unduplicated counts for districts or regions requires that each student be assigned to a single district or region for purposes of compiling a count for each. The MIS2000 system will determine the student's eligibility by using the following criteria: The child count will produce a number and list of students who have an enroll date, funding date, qualifying arrival date, or withdrawal date between the start date and end date desired. The yearly verification process to determine that the children/family is still in the area and in the school system combines the following methods: 1) Use of fact to face visits with the family by the local migrant staff and 2) verifying that the student is still enrolled in school by use of the school records, especially by checking the state student tracking system (STI) which is used by all the schools in the state. The STI contains enrollment and withdrawal records for all students in the state. The STI and MIS2000 list of migrants is verified in the fall and in the spring to ensure that only eligible migrant students are coded as migrant on the STI database. The following is the procedure that MS2000 uses to determine if a student is Category 1 Category 1 -Students must meet each of the following criteria to be counted on this report.

- 1.)EnrollDate FundingDate LQMDate ResDate or WithdrawDate is between the StartDate and EndDate (Student has activity during the date range.)
- 2.)LQM3Date is greater than the StartDate (Student's LQM was within 3 years of the StartDate.)
- 3.)TwentySecondBDay is greater than the StartDate (Student turns 22 after the StartDate.)
- 4.)ThirdBDay is less than the EndDate (Student turns 3 before the EndDate.)

If your State's category 2 count was generated using a different system from the category 1 count, please describe each system separately.

The response is limited to 8,000 characters.

The MS2000 data system used the following criteria when determining a students category 2 status-Category 2 -Students must meet each of the following to be counted on this report.

- 1.) EnrollDate Funding Date LQMDate ResDate or WithdrawDate is between the StartDate and EndDate (Student has activity during the date range.)
- 2.)LQM3Date is greater than the StartDate (Student's LQM was within 3 years of the Startdate.)
- 3.)TwentySecondBDay is greater than the StartDate (Student turns 22 after the StartDate.)
- 4.)ThirdBDay is less than the EndDate (Student turns 3 before the EndDate.)
- 5.)EnrollType is S or SU (Student's enrollment has a Summer enrollment type.)

For students in Category 2 the local MEP staff provides a report each semester and at the end of the summer with a list of all supplemental services that were provided for each migrant child. The regional coordinator enters these services into the supplemental services tab on MIS2000. The "Supplemental Services" report can be printed for each system indicating the services received by a child for any time frame.

Also, to prevent duplicate records, the regional coordinator searches MIS2000 for any student with a new COE before entering the student/family data. The student can be searched by last name, first name, date of birth, or parent's name before entering. If the student is on the MIS2000, he/she will be entered keeping the same identification number as previously assigned. A "duplicate" student report can be generated on MIS2000 which will list any potential duplicate students. If the regional coordinator, after consulting with the local MEP staff, determines that a student has previously been entered and is entered again with a new MIS2000 assigned identification number, the two records are merged into one record maintaining the originally assigned number.

1.10.3.4 Quality Control Processes

In the space below, respond to the following question: What steps are taken to ensure your State properly determines and verifies the eligibility of each child included in the child counts for the reporting period of September 1 through August 31 before that child's data are included in the student information system(s)?

The response is limited to 8,000 characters.

District recruiters are trained by the state and then receive updated training on a regular basis. The local recruiter has the first responsibility to complete a COE accurately after determining that a family may be eligible. The district coordinator reviews the COE for completeness, and then it is submitted to the regional coordinator who reviews the COE to verify tentative eligibility. Official eligibility is decided by the State MEP Committee. If there are questions, more information is requested, and the COE is reviewed by the State Migrant Specialist in consultation with all regional coordinators. COEs submitted by the state recruiters are reviewed for approval at this time as well. The regional coordinators randomly select a percentage (5%) of new COEs to conduct re-interviews for quality control annually. They report their findings to the state director. Alabama's COE is a standard COE that is used state wide. Training is provided for local MEP recruiters annually at the state level and at the local level as need, when new recruiters are hired. The state of Alabama requires that all recruiters receive training before beginning recruitment. The State of Alabama has adopted a recruitment tool entitled "The Recruiter's Manual for the Identification and Recruitment of Migrant Students." Each recruiter has a copy of the manual and has been trained on its contents. Any new recruiters are provided a copy of the manual and training on its use. Some of the Topics covered at training sessions include the following: Qualities of a good recruiter, Employment Surveys collection procedures and use, how to interview, filling out the COE, keeping records, determining priority for services, types of services that can be provided to the migrant students, recruiting safety, quality control/re-interviewing issues, and qualifying agricultural and fishing activities The recruiter signs the COE certifying that the children listed on the COE are eligible for MEP services based upon the information provided. The signature attests that "to the best of the recruiter's knowledge, the information is true, reliable, and valid. The recruiter then submits the completed COE to the district MEP designee for a signature certifying the same statement as the recruiter. After the local MEP designee has signed and dated the COE, it is submitted for approval by the state MEP committee. The state recruiter, the three regional migrant coordinators, and the state migrant director make up the approval committee. The state MEP committee checks the COE for completeness and eligibility. If the COE is approved, the regional coordinator enters the COE into the MIS2000 database and the COE is returned to the appropriate MEP personnel at the local level for filing.

In the space below, describe specifically the procedures used and the results of any re-interview processes used by the SEA during the reporting period to test the accuracy of the State's MEP eligibility determinations. In this description, please include the number of eligibility determinations sampled, the number for which a test was completed, and the number found eligible.

The response is limited to 8,000 characters.

The re-interview process is explained below: (First paragraph is response to CSPR I 08-09 question)

Our quality control plan requires that we re-interview 5% of our new COEs for the year. For this time frame (08-09) there were 337 new COEs for consideration. Of the 337 new COEs 25 were selected for re-interviewing. (Which was more than the 5% required) Of the 25 re-interview only 1 was found to be ineligible.

One of the Regional Migrant Coordinators puts the numbers 1-20 on pieces of paper and draws out the numbers one at the time. For Example is # 8 is the first number drawn then 8 is the first number on the list of Random numbers used to choose families to be re-interviewed. This process is continued until all the numbers are drawn and a random list of twenty numbers is completed.

Each RMC runs a report from MIS2000 called "Verification of Student Data". This is a list of families enrolled in the Migrant Program since the last re-interview was conducted. The families on this list are numbered 1-20. If there are more than 20 families on the list, the numbering starts over 1-20 until all the families have a number.

The number 1-20 are used because 5% (1 out of 20) of all families enrolled in the migrant program during the year are re-interviewed. The RMC will count the number of families on the list and take 5% of that number to determine the number of families to be re-interviewed. For instance, if there are 56 families on the Verification list then 3 families are chosen to be re-interviewed. The list of random numbers is then used to select the families to be re-interviewed. For examples is # 8 is the first number on the list then any family that has a number 8 beside their name is chosen for to be re-interviewed. If a family has moved, the next random number is chosen until the RMC has chosen 5% of the families. Sometimes families cannot be located and another family must be chosen. These are chosen in same manner as a family who has moved.

After the families are chosen, a copy of the COE is made so that the RMC can verify the information on the COE during the re-interview. The questions for the re-interview process were developed by the State Migrant Contract Team which consists of the 3 regional migrant coordinators, the state migrant recruiter and the state migrant coordinator. The team looked at several documents from other states as well as what law requires and developed our questionnaire utilizing these sources.

Re-interviewing is usually done during the spring. An exception is made when a system has a large number of students enrolling during a short time such as during the summer. In several of our system the children come during the summer and leave before the first of the year; therefore, re-interviewing in these systems must be done during the summer months or there is no quality control for them.

The RMC for each area of the state conducts the re-interviews with the help of the state migrant recruiter who translates for the RMC.

These people were trained to conduct re-interviews during the first re-interview process. Re-interviews are conducted face-to-face. The telephone is used only in cases when face-to-face interviews cannot be conducted, i.e. when the parents work during the day and cannot be reached until night.

After the re-interviews are completed, the team looks at the results and makes a final decision as to the eligibility of the family. The results are filed in the office of the RMC and a report is sent to the state coordinator. If a family is found in-eligible, then they are removed from the

MIS2000 data base, immediately after the eligibility determination if made by the committee.

The response is limited to 8,000 characters.

Each Regional Migrant Coordinator is responsible for the accuracy of the data she enters. The MIS2000 provides "Snap Reports" to check for accuracy of data entered. The coordinators check the MIS2000 reports as data is entered on a report to check for accuracy of data entry. Some of the reports checked on MIS2000 include the following: District Verifications which list each student in each system End of Eligibility reports to determine when a student is not longer eligible for the migrant program Verifying COE data to check for accuracy of COE information entered Supplemental Services list to indicate which students are receiving services Student Performance report to check for accuracy of LEP status, testing information, special education, graduation status, dropout status Immunization report to determine which students do not have immunization dates on the database Priority for Service reports to print list of Priority I and II students. The coordinators check the MIS2000 reports as data is entered on a report to check for accuracy. Some reports are printed monthly, others by school terms as needed. The Regional Migrant Coordinators (RMC) prints a District Verification of eligible students for the beginning of the school year, at the beginning of term 2, and at the beginning of the summer. The District Verification is checked to ensure that no student is on the list whose eligibility has ended before each of the three terms. The end of eligibility can be verified by printing an End of Eligibility Report from MIS2000. Also, migrant students are withdrawn on MIS2000 when they reach the age of 22. The MIS2000 has a "red" date indicating end of eligibility which assists with data entry and withdrawals. As the RMC visits the district staff on a monthly basis, the information is collected on any students who have withdrawn from the system based upon information from STI (state tracking system). Regional migrant coordinators provide a list of eligible students to the local staff at the beginning of the school year. The local staff assists with verifying that the students are still in the district and that they are listed in the correct grade levels and at the correct schools. The RMC will utilize the MIS2000 District Verification of eligible students and the STI list of students who are enrolled in school at the 20 day SDE count and again before testing in the spring to ensure that only students who are eligible are listed on the MIS2000 District Verification and on the STI. The yearly verification process to determine that the children/family is still in the area and in the school system combines the following methods: 1) Use of face-to-face visits with the family by the local migrant staff and verifying that the student is still enrolled in school by the use of school records, especially by checking the state student tracking system which is used by all the schools in the state. The STI system contains enrollment and withdrawal records for all students in the state. The STI and MIS2000 list of migrant students is verifying in the fall and in the spring to ensure that only eligible migrant students are coded as migrant on the STI database.

In the space below, respond to the following question: What final steps are taken by State staff to verify the child counts produced by your student information system(s) are accurate counts of children in Category 1 and Category 2 prior to their submission to ED?

The response is limited to 8,000 characters.

Alabama runs reports "by district and unduplicated" to look at individual sites to uncover any irregularities. We verify the criteria used in building the reports which give us our child counts. Discrepancies in the reports are corrected if and when errors are found. For example, if a date of birth is wrong, it is corrected on the MIS2000 database. If a grade level is wrong, it is corrected on the MIS2000 database. Sometimes these errors are found and corrections are made after a report is submitted. All efforts are made to enter the data correctly. For example, a report can be generated on MIS2000 to indicate the End of Eligibility so that students can be withdrawn appropriately when the EOE occurs. Also, there is a report to indicate which students turn age 22; so that they can be withdrawn on the day he/she turns age 22. For the purposes checking the data for and running of the Child Count 1 and 2 reports to be reported to ED that person would be the State Department of Education Migrant Coordinator and for the running of reports on a daily basis for the purpose of day to day monitoring of the student data base that would be the Regional Migrant Coordinators

In the space below, describe those corrective actions or improvements that will be made by the SEA to improve the accuracy of its MEP eligibility determinations in light of the prospective re-interviewing results.

The response is limited to 8,000 characters.

The State of Alabama already has in place a series of steps for reviewing new COEs and re-interviewing families which have been recently recruited. There is a committee established (made up of 3 regional coordinators, one state recruiter, and the State Migrant Specialist) to review difficult eligibility and either approve or disapprove the COE's in question. This gives support to our local recruiters. We also plan to conduct further state-wide random re-interviewing.

In the space below, discuss any concerns about the accuracy of the reported child counts or the underlying eligibility determinations on which the counts are based.

The response is limited to 8,000 characters.

The State of Alabama is confident that you child counts are accurate. We trust that the processes and checks we have in place and have described above are accurate to the best of our ability
