

Data Notes
Consolidated State Performance Report

State: SC
School Year: 2015-16
Part: 2

Question Number	Issue Description
2.11	South Carolina changed their methodology for identifying low income students between SY2014-15 and SY2015-16. In SY2014-15, the state's methodology included students who received Medicaid at any time in their life. In SY2015-16, the methodology changed to include students who received Medicaid within three years. This has resulted in an approximately 30% decrease in the number of students in the cohort identified as low income.
