## 1 INTRODUCTION

2 This document establishes Department of Education (ED) standards for Identity,  
3 Credential, and Access Management (ICAM).

4 This Standard complies with Office of Management and Budget (OMB) Directive  
5 M-19-17, Enabling Mission Delivery through Improved Identity, Credential, and Access  
6 Management:

7 *Each agency shall define and maintain a single comprehensive ICAM policy,*  
8 *process, and technology solution roadmap, consistent with agency authorities and*  
9 *operational mission needs.*

10 OMB M-19-17 also states:

11 *To ignite adoption of this new mindset around ICAM capability deployment across*  
12 *the Federal Government, each agency must harmonize its enterprise-wide approach*  
13 *to governance, architecture, and acquisition.*

### 14 1.1 Purpose

15 This document sets the ED standards needed for ED to comply with the above  
16 requirements for governance, architecture, and acquisition. In doing so, it supersedes any  
17 prior documentation establishing such standards.

### 18 1.2 Background

19 The National Institute of Standards and Technology (NIST) defines ICAM as the  
20 following:

21 *Programs, processes, technologies, and personnel used to create trusted digital*  
22 *identity representations of individuals and non-person entities (NPEs), bind those*  
23 *identities to credentials that may serve as a proxy for the individual or NPE in access*  
24 *transactions, and leverage the credentials to provide authorized access to an*  
25 *agency's resources.*

26 According to OMB M-19-17:

27 *Agencies shall establish capabilities aligned to Federal ICAM Architecture and*  
28 *Continuous Diagnostics and Mitigation (CDM) requirements that enable the*  
29 *continuous vetting and evaluation of fitness of personnel subject to HSPD-12.*

30 Advances in technology enable more digital and business transactions which provide the  
31 opportunity to improve service delivery. ED continues to modernize and consolidate  
32 Information Technology (IT) infrastructure and services to improve efficiency,  
33 effectiveness, security, and customer experiences. New challenges have emerged along

1 with these advances, such as data breaches exposing controlled unclassified information  
2 (CUI); e.g., passwords and Personally Identifiable Information (PII), in particular. Identity  
3 management has become even more critical to ED's successful delivery of services.

4 To ensure secure and efficient operations, ED must be able to identify, credential, monitor,  
5 and manage identities that access federal resources, such as data, information systems,  
6 facilities, and secured areas. ED must conduct identity proofing, establish enterprise digital  
7 identities, and adopt sound processes for authentication and access control. The  
8 implementation of these processes significantly affects the security, privacy, and delivery  
9 of the ED mission; and enhances the trust and safety of digital transactions with the  
10 American public.

11 The ED Enterprise ICAM (referred to as ED ICAM) transformation is part of a larger  
12 government wide mandate to implement ICAM security disciplines. This will enable the  
13 right individual to access the right resources, at the right time, for the right reasons. The  
14 ED ICAM program includes policy, processes, technologies, and personnel. Together, they  
15 identify, credential, monitor, and manage user access to information and information  
16 systems for ED.

### 17 **1.3 Scope**

18 The standards established in this document apply to all employees, contractors, and users  
19 authorized to access ED information systems.

### 20 **1.4 Risk Acceptance/Policy Exceptions**

21 Deviations from the Department policies, Instructions, Standards, Procedures or Memos  
22 must be approved and documented through the Department's Risk Acceptance process.  
23 Deviations that introduce additional risks to the enterprise must be submitted through the  
24 Department Risk Acceptance Form (RAF) and must be approved by the ED CISO (as  
25 delegated). Requests must justify the reason for the deviation(s)/exception(s) as well as the  
26 compensating security controls implemented to secure the device or information, if  
27 applicable. Policy deviations that do not introduce additional risks do not need to be  
28 submitted through the Department RAF but will need to be approved by the Department  
29 CISO (as delegated).

## 30 **2 STANDARDS**

31 ED complies with the requirements for governance, architecture, and acquisition by  
32 adherence to the following standards.

### 33 **2.1 Governance**

1 ICAM requires an enterprise-wide approach to harmonize governance, architecture, and  
2 acquisition and to ensure an efficient and effective implementation. To accomplish this;  
3 ED established an ICAM Program Office for the enterprise, as described below.

- 4 • Manage, administer, maintain, and continually improve the program to meet  
5 regulatory requirements.
- 6 • Lead and synchronize ICAM implementation activities for all of ED.
- 7 • Define, implement, and govern; the policy, processes, and technology solutions; to  
8 deliver enterprise ICAM capabilities to all of ED.
- 9 • Be responsible for daily operations, maintenance, and integration support; of ICAM  
10 shared services for managing digital identities, credentials, and access; to ED  
11 systems and applications.

12 *ACS Departmental Directive OCIO: 3-112* describes the governance structure the Secretary  
13 of ED delegates to ensure full compliance with the Federal IT Acquisition Reform Act  
14 (FITARA). The ED ICAM Program Office complies with this mandate as described  
15 below.

- 16 1. The ICAM Stakeholder Group gathers technical requirements
  - 17 a. Includes IT Principal Office Coordinators (IT POC), Information System  
18 Owners (ISO) and Information System Security Officers (ISSO); to  
19 coordinate implementation, management, and maintenance of ICAM  
20 capabilities.
  - 21 b. Ensures ICAM processes, procedures, and technology solutions meet  
22 agency requirements for delivery.
- 23 2. Planning and Investment Review Working Group (PIRWG), described in *ED IT*  
24 *Investment Management Process Guide*, settles issues submitted by the ICAM  
25 Stakeholder Group
- 26 3. FITARA Implementation Working Group (FIWG), described in *FITARA*  
27 *Implementation Working Group (FIWG) Charter*, further settles issues, if needed

28 The ED ICAM Program Office will outline performance expectations; including security  
29 and privacy risk management; throughout the identity lifecycle for the enterprise. These  
30 performance expectations must support the President's Management Agenda (PMA) Cross  
31 Agency Priority goals and align with the Government-wide Federal Identity, Credential,  
32 and Access Management (FICAM) Architecture and Continuous Diagnostics and  
33 Mitigation (CDM) requirements.

34 As outlined in NIST Special Publication (SP) 800-63-3, principal offices and other ED  
35 components must incorporate Digital Identity Risk Management into their existing  
36 processes when working with ICAM integrations. ED ICAM integrations require an  
37 Interconnection Security Agreement (ISA)/ Memorandum of Understanding (MOU)

1 document. The ISA/MOU must be completed in compliance with the requirements set  
2 forth in NIST SP 800-47.

### 3 **2.2 Architecture**

4 The ED ICAM Program Office must establish solutions for ICAM services; and maintain a  
5 technology solution roadmap for the enterprise. ED ICAM solutions must adhere to the  
6 following:

- 7 • Align with the FICAM architecture; based on the FICAM Roadmap and  
8 Implementation Guidance
- 9 • Align with CDM requirements
- 10 • Align with applicable federal policies, standards, playbooks, and guidelines
- 11 • Publish in the ICAM service catalog

12 All ED principal offices and other ED components must use the following:

- 13 • ED ICAM shared services to fulfill their ICAM requirements. Any exception to  
14 using ED ICAM shared services must be approved using the waiver process.
- 15 • ED ICAM shared services; for credentialing and identity proofing public consumers  
16 who require access to ED digital services.
- 17 • ED ICAM is the authoritative source for managing the digital identity lifecycle of  
18 all person identities. This includes all categories of ED personnel; as well as public  
19 citizens who require access to ED online services.
- 20 • ED ICAM is the authoritative source for managing the digital identity lifecycle of  
21 all Non-Person Entities (NPE). This includes service accounts and automated  
22 technologies, such as Robotic Process Automation tools and Artificial Intelligence.  
23 EIMS ensures the digital identity is distinguishable, auditable, and consistently  
24 managed.

25 All ED systems or applications that store, maintain, or consume user accounts; must do the  
26 following.

- 27 • Integrate with the ED ICAM to manage the digital identity lifecycle; and to enable  
28 compliance auditing and reporting.
- 29 • Establish processes to manage access control. Revoke access privileges when no  
30 longer authorized. Revoke or destroy credentials in a timely manner; to prevent  
31 unauthorized access to information systems.

32 All ED systems or applications that require authentication must use one of the approved  
33 enterprise authentication services as appropriate for the system use cases.

- 34 • Enterprise Active Directory for ED's domain for end user office automation  
35 services

- 1 • ED's privileged access system for privileged access
- 2 • ED ICAM access management services for all web and mobile application access,
- 3 including internal users and public citizens
- 4 • Login.gov for externally facing (internet facing) authentication requirements.
- 5

6 All ED principal offices and other ED components must require the use of Homeland  
7 Security Presidential Directive (HSPD)-12 compliant credentials by all federal employees  
8 and contractors. These credentials include, but are not limited to, the following.

- 9 • Personal Identity Verification Credential (PIV).
- 10 • Personal Identity Verification Interoperable Credential (PIV-I).
- 11 • Derived PIV (PIV-D)
- 12 • Emergency PIV Alternative (PIV-A)

13 The HSPD-12 credentials serve as the primary means of identification and authentication to  
14 federal information systems, federally controlled facilities, and other secured areas.

15 As technology evolves, ED ICAM will review or approve agency specific implementation  
16 of additional credential solutions (e.g., different authenticators). These credential solutions  
17 must meet the intent of HSPD-12 and align with NIST guidelines and government wide  
18 ICAM requirements, such as mobile and cloud identity.

19 All ED principal offices and other ED components must require and implement the use of  
20 the PIV credential digital signature capability for internal and external business.

21 All ED principal offices and other ED components must ensure use of the PIV credential  
22 for physical access to federal facilities<sup>1</sup> and secured areas is implemented in accordance  
23 with Department Physical Security policy

## 24 **2.3 Acquisition**

25 IT products and tools procured that require user authentication must comply with one of the  
26 following.

- 27 • Support PIV or other HSPD-12 compliant credentials.
- 28 • Integrate with ED ICAM shared services that enable HSPD-12 compliant
- 29 authentication through commercially available open standards.

---

<sup>1</sup> 48 CFR 2.101 (Title 48, Federal Acquisition Regulations System; Chapter 1, Federal Acquisition Regulation; Subchapter A, General; Part 2, Definitions of Words and Terms; Subpart 2.1, Definitions)

- 1 All contracts requiring contractors to have access to federally controlled facilities, or  
2 information systems, must include requirements to comply with HSPD-12 and Federal  
3 Information Processing Standards Publication (FIPS) 201-2. This standard is based on  
4 OPM requirements and the Federal Acquisition Regulation (FAR), 48 Code of FR § 4.13.
- 5 Products and services acquired to further HSPD-12 or ICAM implementations must be  
6 compliant with the following.
- 7 • OMB policy
  - 8 • NIST standards
  - 9 • General Services Administration (GSA) Approved Products List
  - 10 • CDM Approved Products List (when applicable)

1 **3 APPENDIX A: ACRONYMS**

2	<b>CISO</b>	Chief Information Security Officer
3	<b>COR</b>	Contracting Officer’s Representative
4	<b>CDM</b>	Continuous Diagnostics and Mitigation
5	<b>CUI</b>	Controlled Unclassified Information
6	<b>FICAM</b>	Federal Identity, Credential, and Access Management
7	<b>FIPS</b>	Federal Information Processing Standards Publication
8	<b>FITARA</b>	Federal IT Acquisition Reform Act
9	<b>FIWG</b>	FITARA Implementation Working Group
10	<b>HSPD</b>	Homeland Security Presidential Directive
11	<b>ICAM</b>	Identity, Credential, and Access Management
12	<b>ISO</b>	Information System Owner
13	<b>ISSO</b>	Information Systems Security Officer
14	<b>NIST</b>	National Institute of Standards and Technology
15	<b>NPE</b>	Non-person entity
16	<b>OMB</b>	Office of Management and Budget
17	<b>PII</b>	Personally Identifiable Information
18	<b>PIRWG</b>	Planning and Investment Review Working Group
19	<b>POC</b>	IT principal office coordinators
