Definitions:

The “*Number of participants receiving service that was provided by project*” is defined as those participants that were offered services by the project and subsequently received services from the project. This figure *does not* include participants that were offered services by the project but declined them (e.g., due to lack of need, participant refused the service, etc.).

The “*Number of participants referred to another service provider*” is defined as those participants that were offered services by the project but were subsequently referred to another service provider. Note that the Department is not asking projects to report on whether participants actually received services from the service provider or for projects to follow-up with these participants to ensure services were rendered. The Department is only requesting that the projects report on the number of participants that were referred to another service provider.

The Department is asking projects to report on the number of participants, not the number of contacts. For instance, if a participant received a service that was provided by a project multiple times, he/she should only be counted once for the purposes of this report. However, it is possible for a participant to be counted once in each of the two columns for a given service; that is, a participant received a service that was provided by the project and was also referred to another service provider. For example, a participant might have received math tutoring that was provided by the project but was also referred to another service provider for language arts tutoring.
