**Office of Communication and Outreach (OCO)**  
**U.S. Department of Education**

- 1. System Information. Describe the system - include system name, system acronym, and a description of the system, to include scope, purpose and major functions.**

**System Name:** OCO\cVent Event Solutions

**System Acronym:** cVent Event Solutions

The U.S. Department of Education (ED) conducts several events each year. This system contains records on contact persons from organizations and individuals who register for participation in selected training workshops, webinars, hearings, meetings and training sessions and events hosted by ED. The Department has obtained an on-line registration system, cVent Event Solutions, that can handle multiple conferences and meetings and allow attendees and trainees to register on-line for any of these events. Major functions of this system include RSVP/Decline status for attendees, breakout sessions, adding guests, printing name badges and creating custom reports.

- 2. Legal Authority. Cite the legal authority to collect and use this data. What specific legal authorities, arrangements, and/or agreements regulate the collection of information?**

ED has authority through 20 U.S.C. Section 3412(e) (2) to perform public information functions, including the provision, through the use of the latest technologies, of useful information about education and related opportunities to students, parents, and communities.

- 3. Characterization of the Information. What elements of personally identifiable information (PII) are collected and maintained by the system (e.g., name, social security number, date of birth, address, phone number)? What are the sources of information (e.g., student, teacher, employee, university)? How is the information collected (website, paper form, on-line form)? Is the information used to link or cross-reference multiple databases?**

The information being collected is: attendee's name, organization, business email address, business phone number, business address/zipcode and city.

The sources of information are: attendee, speaker, exhibitor, official, education professional, board member and guest.

The information is collected via website from individuals requesting to register for an event sponsored by or in conjunction with the Department of Education.

- 4. Why is the information collected? How is this information necessary to the mission of the program, or contributes to a necessary agency activity? Given the amount and any type of data collected, discuss the privacy risks (internally and/or externally) identified and how they were mitigated.**

The information is collected so that ED can register attendees/guests for training workshops, webinars, hearings, meetings and training sessions. The registration process is necessary to provide accurate attendance count, allow attendees to sign up for breakout sessions/tours/receptions meals and to provide Department of Education meeting organizers with real-time reports. The reports include the contact name, work email address, state, registration count, breakout sessions and any attendee who may need special accommodations.

The type of data collected includes contact information such as business email, business address/phone and attendees' names in order to register them for an event. The software allows for us to create and run several events at the same time. Typically the information disseminated to the attendees includes the invitation, confirmation and agenda emails and other ED outreach events in a community and information (agenda, briefing, hearings documents) deemed pertinent by senior leadership. We also collect addresses in order to understand the demographics of those interested in

ED's program, conferences and events. Although there is a small risk in collecting this data, it has been properly mitigated with security and data handling measures as discussed below.

The Office of Communications and Outreach is responsible for overall leadership for the Department in its communications and outreach activities to engage the general public, as well as a wide variety of education, community, business, parent, academic, student, and other groups, including the media, intergovernmental and interagency organizations, and public advocacy groups, in the President's and Secretary's education agenda.

- 5. Social Security Number (SSN).** If an SSN is collected and used, describe the purpose of the collection, the type of use, and any disclosures. Also specify any alternatives that you considered, and why the alternative was not selected. If system collects SSN, the PIA will require a signature by the Assistant Secretary or designee. If no SSN is collected, no signature is required.

No Social Security Numbers are collected.

- 6. Uses of the Information.** What is the intended use of the information? How will the information be used? Describe all internal and/or external uses of the information. What types of methods are used to analyze the data? Explain how the information is used, if the system uses commercial information, publicly available information, or information from other Federal agency databases.

As stated above, the information is collected so that ED can register attendees/guests for training workshops, webinars, hearings, meetings and training sessions. The registration process is necessary to provide accurate attendance count, allow attendees to sign up for breakout sessions/tours/receptions/meals and to provide our clients with real time reports.

- 7. Internal Sharing and Disclosure.** With which internal ED organizations will the information be shared? What information is shared? For what purpose is the information shared?

This information would be shared with the ED Point of Contact (PC) who requested the on-line registration system and event logistic assistance. The contact list is exported to an MS Excel report as requested. Also, the software allows for name badges/certificates to be created for the attendees.

- 8. External Sharing and Disclosure.** With what external entity will the information be shared (e.g., another agency for a specified programmatic purpose)? What information is shared? For what purpose is the information shared? How is the information shared outside of the Department? Is the sharing pursuant to a Computer Matching Agreement (CMA), Memorandum of Understanding or other type of approved sharing agreement with another agency?

#### **With what external entity will the information be shared?**

The Department of Education Program Offices often share information when they partner with various federal agencies to conduct conferences, meetings and events on education related topics.

#### **What information is shared?**

The information shared could include the attendee contact information, to include the name, organization, work address, work phone number and work email address. All attendees/invitees have the opportunity to 'opt-out' of having their contact information shared.

#### **For what purpose is the information shared?**

The purpose of sharing the attendee's contact information may be used to recognize attendance, provide program updates to send additional invitations, and to provide background on follow-up information.

Additionally, all attendees have the opportunity to 'opt-out' being contacted in the future to receive additional emails and/or to approve/deny having their contact information released.

**How is the information shared outside of the Department?**

The Department of Education Program Offices partner with various federal agencies to conduct conferences, meetings and events on education related topics. The attendees' contact information may be shared with the federal agencies who partner with the Departments in the form of an attendance roster and breakout session attendance in the form of a report.

- 9. Notice. Is notice provided to the individual prior to collection of their information (e.g., a posted Privacy Notice)? What opportunities do individuals have to decline to provide information (where providing the information is voluntary) or to consent to particular uses of the information (other than required or authorized uses), and how individuals can grant consent?**

Yes, notice is provided on the website and attendees will only be added to the on-line registration system database if they self-select to come to the website to register for an event. At the home screen, attendees providing information are notified that they are being added to the contact list and have the option to opt-out receiving additional information. It is our office's policy to include the one standard question for every on-line registration event or conference: "May we contact you in the future for events related to this conference topic?" We also offer an additional question when applicable: "May we release your contact information to those who have attended this event?"

- 10. Web Addresses. List the web addresses (known or planned) that have a Privacy Notice.**

The privacy notice will reside at <https://app.cvent.com/Subscribers/Login.aspx>

- 11. Security. What administrative, technical, and physical security safeguards are in place to protect the PII? Examples include: monitoring, auditing, authentication, firewalls, etc. Has a C&A been completed? Is the system compliant with any federal security requirements?**

OCIO/IA and the Private Safeguards Office reviewed and determined that a Certification and Accreditation is not required. cVent is aware of the importance of security and has implemented the following features:

- Data hosted in top-tier, world-class data center
- Biometric access screening to gain access to cVent servers
- Fire detection and suppression systems
- Fault tolerant, redundant servers
- Data encrypted and transmitted via Secure Socket Layers (SSL) technology
- Hourly backups of customer data stored in different geographic locations
- Full-time staff of physical and network security personnel
- Unique account/username/password access control
- One-way encryption for all passwords
- Account lockout and password expiration
- Proprietary security model

- 12. Privacy Act System of Records.** Is a system of records being created or altered under the Privacy Act, 5 U.S.C. 552a? Is this a Department-wide or Federal Government-wide SORN? If a SORN already exists, what is the SORN Number?

A system of record notice is not needed because the information collected is not retrieved by any personal identifiers. Therefore, a system of record as defined by the Privacy Act is not being created and the reporting requirements of OMB Circular A-130 do not apply.

- 13. Records Retention and Disposition.** Is there a records retention and disposition schedule approved by the National Archives and Records Administration (NARA) for the records created by the system development lifecycle AND for the data collected? If yes – provide records schedule number:

Records are covered under ED 144.a. These records are destroyed when no longer needed for reference purposes, or according to a predetermined time period.
