SUPPLEMENTARY INFORMATION:**Introduction**

The Privacy Act (5 U.S.C. 552a(e)(4)) requires the Department to publish in the **Federal Register** this notice of a new system of records maintained by the Department. The Department's regulations implementing the Privacy Act are contained in the Code of Federal Regulations (CFR) in 34 CFR part 5b.

The Privacy Act applies to a record about an individual that contains individually identifiable information that is retrieved by a unique identifier associated with the individual, such as a name or social security number. The information about each individual is called a "record," and the system, whether manual or computer-based, is called a "system of records." The Privacy Act requires each agency to publish a notice of a system of records in the **Federal Register** and to prepare a report to OMB whenever the agency publishes a new or altered system of records. Each agency is also required to send copies of the report to the Chair of the Senate Committee on Governmental Affairs and the Chair of the House Committee on Government Reform.

DISCLOSURES TO CONSUMER REPORTING AGENCIES:

Not applicable to this system of records.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISCLOSING OF RECORDS IN THE SYSTEM:**STORAGE:**

The Office of Special Education and Rehabilitative Services (OSERS) maintains all data on a computer mainframe and CD-ROMs. Printed reports containing sensitive data produced from this system are maintained within the locked filing cabinets within the access-restricted Basic State Grants Branch within OSERS Headquarters.

RETRIEVABILITY:

This system will be accessible only to employees of OSERS. Each record in

this system can be retrieved by any of the categories of information listed under the **CATEGORIES OF RECORDS IN THE SYSTEM** section in this notice.

SAFEGUARDS:

Access to this system will require a unique user identification as well as a password to enter the system. Users will be required to change their passwords periodically, and they will not be allowed to repeat old passwords. Any individual attempting to log on who fails is locked out of the system after three attempts. Access after that time requires intervention by the system manager.

The computer system employed by the Department offers a high degree of resistance to tampering and circumvention. This security system limits data access to Department and contract staff on a "need to know" basis and controls individual users' ability to access and alter records within the system.

The location of the server includes safeguards and firewalls, including the physical security of the server room. In addition, the server is located in a secure room, with limited access only through a special pass. Further, all physical access to the site where the server is maintained is controlled and monitored by security personnel who check each individual entering the building for his or her employee or visitor badge.

All printed reports containing sensitive data produced from this system are immediately used for data clearing procedures and then shredded or placed into a confidential security file. The files are maintained within the locked filing cabinets within the access-restricted Basic State Grants Branch within OSERS Headquarters. In addition to these controls, computers are not left on and unattended when users access the database, and sensitive information

is placed out of sight if visitors are present.

Shared output does not contain sensitive information. Aggregated data cannot be used to identify individuals. For individual-level data that are shared with researchers, all identifying information is removed from the file before the data are shared.

In addition, the following guidelines and procedures have been implemented for protecting sensitive data and resources in this system:

- Backup CDs are properly labeled "For Official Use Only—Property of the OSERS Basic State Grants Branch."
- Electronic data (e.g., copies of the database on CDs with identifying information and edit reports with identifying information) are stored in the locked file cabinets in the OSERS Basic State Grants Branch. Management, operational, and technical controls for ensuring the safety of confidential information are detailed within the Case Services System Security Plan.

RETENTION AND DISPOSAL:

Records in this system will be retained in accordance with the National Archives and Records Administration (NARA) General Records Schedule 20, Item 1.c, which provides disposal authorization for electronic files and hard-copy printouts created to monitor system usage. Records will be deleted or destroyed when the agency determines they are no longer needed for administrative, legal, audit, or other operational purposes.
