

**Terms of Local Flexibility  
Demonstration Agreement for Student-Centered Funding Authorized by  
Section 1501 of the ESEA**

**PUERTO RICO DEPARTMENT OF EDUCATION**

**PURPOSE**

These are the terms of Puerto Rico Department of Education's (PRDE's) Local Flexibility Demonstration Agreement for Student-Centered Funding under section 1501 of the Elementary and Secondary Education Act of 1965 (ESEA), as amended by the Every Student Succeeds Act (ESSA), to support PRDE in consolidating eligible Federal funds, as defined in ESEA section 1501(l)(1), with State and local funds to create a single school funding system based on weighted per-pupil allocations for students from low-income families, Spanish learners, and otherwise disadvantaged students.

**EFFECTIVE DATE AND TERM**

These terms are effective as of July 1, 2018, for a period of up to three years. PRDE may terminate this agreement at any time after providing notice to the U.S. Department of Education (Department). The Department may terminate this agreement for noncompliance pursuant to ESEA section 1501(h). This agreement may be renewed upon agreement of both parties pursuant to ESEA section 1501(k).

**ACTIVITIES**

In exchange for flexibility from the requirements under Title I, Part A; Title II; and Title III of the ESEA, except for the specific requirements listed below, PRDE agrees to implement its student-centered funding system described in Appendix A, including the assurances contained in the appendix, and consistent with all of the requirements in section 1501 of the ESEA.

In addition to implementing its student-centered funding system in accordance with all the requirements in section 1501 of the ESEA, PRDE agrees to:

- 1) Demonstrate that each high-poverty school receives, in the first year of the demonstration agreement—
  - more per-pupil funding, including from Federal, State, and local sources, for low-income students than such funding received for low-income students in the year prior to entering into a demonstration agreement under this section; and
  - at least as much per-pupil funding, including from Federal, State, and local sources, for Spanish learners as such funding received for Spanish learners in the year prior to entering into a demonstration agreement under this section.
  
- 2) Annually demonstrate to the Secretary that, as compared to the previous year, no high-poverty school, as defined in ESEA section 1501(l)(2), served by the local educational agency (LEA) received—

- Less per-pupil funding, including from Federal, State, and local sources, for low-income students; or
  - Less per-pupil funding, including from Federal, State, and local sources, for Spanish learners.
- 3) Annually make public and report to the Secretary the per-pupil expenditures (including actual personnel expenditures that include staff salary differentials for years of employment, and actual non-personnel expenditures) of State and local education funds and eligible Federal funds for each school served by the LEA, disaggregated by each quartile of students attending the school based on student level of poverty and by each major racial or ethnic group in the school for the preceding fiscal year.
  - 4) Annually make public the total number of students enrolled in each school served by the LEA and the number of students enrolled in each such school disaggregated by:
    - Economically disadvantaged students;
    - Students from major racial and ethnic groups;
    - Children with disabilities; and
    - Spanish learners.
  - 5) Annually implement the standards and assessment requirements in ESEA section 1111(b) and the accountability requirements in ESEA section 1111(c).
  - 6) If PRDE has schools identified by the State for comprehensive or targeted support and improvement under ESEA section 1111(c) and (d), ensure that such schools implement support and improvement plans required in ESEA section 1111(d).
  - 7) Annually meet the requirements of ESEA section 1118 with respect to maintenance of effort, supplement not supplant, and comparability.
  - 8) Annually meet the requirements for providing equitable services to eligible private school students, their teachers, and families under ESEA section 1117 and to eligible private school students, their teachers, and other educational personnel under ESEA section 8501.
  - 9) Continue to meet the requirements of all applicable Federal civil rights laws.
  - 10) Continue to meet the requirements of any Federal program, in whole or in part, whose funds the LEA has not consolidated and allocated through its student-centered funding system (e.g., distribute any Federal funds not allocated through the student-centered funding system based on the ESEA statutory requirements).
  - 11) Annually identify those schools that would otherwise receive Title I, Part A funds (Title I schools).

- 12) Address disparities that result in low-income students and minority students in Title I schools being taught at higher rates than other students by inexperienced, ineffective, or out-of-field teachers pursuant to ESEA section 1112(b)(2).
- 13) Annually meet the local report card requirements, including reporting actual per-pupil expenditures by schools, pursuant to ESEA section 1111(h)(2) (subject to the timeframe established by the [June 28, 2017 Dear Colleague letter](#)).
- 14) Meet the reporting requirements in ESEA section 3121.
- 15) Meet the requirements regarding annual parental notifications to parents of Spanish learners in ESEA section 1112(e)(3) and section 1112(e)(4).
- 16) Comply with all ESEA State-level requirements, including those executed at the LEA level, such as implementing the statewide entrance and exit procedures for Spanish learners, which the State is required to implement under section 3113(b)(2) and using the Migrant Student Information Exchange (MSIX).
- 17) If the LEA wishes to change the student-centered funding system by adding any future discretionary grants awarded during the pendency of the flexibility, it must also adhere to the scope and objectives under which the award was received.
- 18) Cooperate with the Department in the evaluation of the implementation of the local flexibility demonstration agreement and the impact of such agreement on improving the equitable distribution of State and local funding and increasing student achievement.
- 19) Submit in writing to the Department any requests for amendments to the student-centered funding system prior to implementing any such changes.

**Appendix A: Approved Application for a Local Flexibility  
Demonstration Agreement for Student-Centered Funding Authorized by Section 1501 of  
the ESEA**

# Application for a Local Flexibility Demonstration Agreement for Equitable Per-pupil Funding

**U.S. Department of Education**  
**Issued: February 8, 2018**

OMB Number: 1810-0734  
Expiration Date: August 31, 2018

**Paperwork Burden Statement** According to the Paperwork Reduction Act of 1995, no persons are required to respond to a collection of information unless such collection displays a valid OMB control number. The valid OMB control number for this information collection is OMB CONTROL # 1810-0734. The time required to complete this information collection is estimated to average 56 hours per response, including the time to review instructions, search existing data resources, gather the data needed, and complete and review the information collection. If you have any comments concerning the accuracy of the time estimate(s) or suggestions for improving this collection, please write to: U.S. Department of Education, Washington, DC 20202-4537. If you have comments or concerns regarding the status of your individual submission of this collection, write directly to: Office of Elementary and Secondary Education, U.S. Department of Education, 400 Maryland Ave., S.W., Washington, DC 20202-3118.

**United States Department of Education**  
OFFICE OF ELEMENTARY AND SECONDARY EDUCATION

Dear Applicant:

Thank you for your interest in the demonstration program authorized in Title I, Part E, Section 1501 of the Elementary and Secondary Education Act of 1965 (ESEA), as amended by the Every Student Succeeds Act (ESSA), entitled “Flexibility for Equitable Per-pupil Funding.”

ESEA section 1501 authorizes the U.S. Secretary of Education to enter into local flexibility demonstration agreements with local educational agencies (LEAs) under which such agencies may consolidate eligible Federal education funds with State and local funds in accordance with certain requirements in order to develop a student-centered funding system based on weighted per-pupil allocations for low-income and otherwise disadvantaged students. Under a local flexibility demonstration agreement, an LEA may use the Federal funds allocated through its system flexibly, provided it meets the purposes of each Federal education program supported by the consolidated Federal funds, including serving students from low-income families, English learners, migratory children, and children who are neglected, delinquent, or at risk, as applicable.

Please note that no funds have been appropriated to support a local flexibility demonstration agreement. Accordingly, the U.S. Department of Education (Department) will not award any funds through this announcement. Rather, it will provide the flexibility to consolidate eligible Federal funds with State and local education funding in order to create a student-centered funding system based on weighted per-pupil allocations, with accompanying flexibility in the use of Federal education funds, as described in your application. The Department may initially award this flexibility for not more than 50 LEAs for a period of three years. The Department expects to first award this flexibility for use during the 2018-2019 school year. An LEA may indicate on its application whether the flexibility will be used beginning in the 2018-2019 school year, or used in a subsequent school year, in which case 2018-2019 would be a planning year.

If you have any questions about the program after reviewing the application package, please contact my team at [WeightedFundingPilot@ed.gov](mailto:WeightedFundingPilot@ed.gov).

Sincerely,

Jason Botel  
Principal Deputy Assistant Secretary,  
Delegated the Authority to Perform the Functions  
and Duties of the Assistant Secretary for  
Elementary and Secondary Education

## Introduction

Title I, Part E, section 1501 of the Elementary and Secondary Education Act of 1965 (ESEA), as amended by the Every Student Succeeds Act (ESSA), authorizes the U.S. Secretary of Education (Secretary) to enter into local flexibility demonstration agreements with local educational agencies (LEAs) for a term of not more than three years (with the ability to renew the agreement) to consolidate eligible Federal funds with State and local funds in order for such agencies to develop and implement a single student-centered funding system based on weighted per-pupil allocations that meets the requirements of ESEA section 1501(d).

For an LEA that enters into a local flexibility demonstration agreement, the Secretary is authorized to waive those provisions of the ESEA that would otherwise prevent the LEA from using eligible Federal funds as part of such an agreement. Relieving an LEA from certain ESEA requirements in this manner would enable the LEA to use the Federal funds allocated through its student-centered funding system flexibly, provided it meets the purposes of each Federal education program supported by the consolidated Federal funds, including serving students from low-income families, English learners, migratory children, and children who are neglected, delinquent, or at risk, as applicable.

## Definitions

- **Eligible Federal Funds:** “Eligible Federal funds” means any funds received by an LEA under the following Federal education programs:
  - Title I, Part A: Improving basic programs operated by LEAs
  - Title I, Part C: Education of migratory children
  - Title I, Part D, Subpart 2: Local prevention and intervention programs for children and youth who are neglected, delinquent, or at risk
  - Title II: Preparing, training, and recruiting high-quality teachers, principals, or other school leaders
  - Title III: Language instruction for English learners and immigrant students
  - Title IV, Part A: Student support and academic enrichment grants
  - Title V, Part B: Rural education initiative
- **High Poverty Schools:** A “high-poverty school” means a school that is in the highest two quartiles of schools served by an LEA, based on the percentage of enrolled students from low-income families.

## Requirements of the System

An LEA that enters into a local flexibility demonstration agreement with the Secretary may consolidate eligible Federal funds with State and local funds in order to create a student-centered funding system based on weighted per-pupil allocations. According to ESEA section 1501(d)(2), an LEA’s student-centered funding system based on weighted per-pupil allocations must:

- Allocate State and local education funds and eligible Federal funds to the school level based on the number of students in a school and a formula using per-pupil weighted amounts;
- Allocate to schools a significant percentage of all the LEA’s State and local education funds and eligible Federal funds, which shall be agreed upon during the application process;

- Use weights or allocation amounts that allocate substantially more funding to English learners, students from low-income families, and students with any other characteristics associated with educational disadvantage chosen by the LEA than to other students;
- Ensure that each high-poverty school, in the first year of the local flexibility demonstration agreement, receives from State and local education funds and eligible Federal funds, when compared to the year prior to entering into the local flexibility demonstration agreement:
  - More per-pupil funding for low-income students; and
  - At least as much per-pupil funding for English learners.
- Include all school-level actual personnel expenditures for instructional staff (including staff salary differentials for years of employment) and actual non-personnel expenditures in the calculation of the funds allocated under the system to schools.

## **Flexibility**

Pursuant to ESEA section 1501(b)(2), the Secretary is authorized to waive, for an LEA that enters into a local flexibility demonstration agreement, any provision of the ESEA that would otherwise prevent the LEA from using eligible Federal funds as part of the agreement. Accordingly, except as enumerated below, the Secretary will waive all of the LEA-level Federal requirements of eligible programs whose funds an LEA consolidates with State and local funds in its student-centered funding system, provided the LEA meets the purposes of each such Federal education program including serving students from low-income families, English learners, migratory children, and children who are neglected, delinquent, or at risk, as applicable.

Similar to the requirements for consolidating Federal, State and local funds in a schoolwide program school under ESEA section 1114, an LEA that enters into a local flexibility demonstration agreement may consolidate State, local and eligible Federal funds and then allocate those funds to all its schools, ensuring that its Title I schools receive their fair share of funds through the student-centered funding system as required under ESEA section 1118(b)(2). The LEA would not need to identify individual services as supplementary nor maintain separate fiscal accounting records, by program, that identify the specific activities supported by Federal funds. Instead, the LEA may use its consolidated Federal funds without regard to meeting the specific requirements of each Federal program whose funds are consolidated in the LEA's student-centered funding system, provided the LEA demonstrates the consolidated Federal funds allocated through the system, as a whole, address the purposes of each such Federal program.

If an LEA consolidates funds from a competitive grant awarded under an eligible Federal program in its student-centered funding system, the LEA must continue to carry out the scope and objectives, at a minimum, at the level described in the LEA's approved application under which the funds were awarded. When possible, in applying for a competitive grant, an LEA would indicate in its application that some or all of the funds would be used to support its local flexibility demonstration agreement.

## **Responsibilities of an LEA Entering Into a Local Flexibility Demonstration Agreement**

ESEA section 1501 requires an LEA that enters into a local flexibility demonstration agreement to continue to meet certain requirements. Under section 1501(d)(1)(I), such an LEA must meet the requirements of ESEA section 1118, which requires an LEA that receives Title I, Part A funds to:

- Maintain fiscal effort;
- Use Title I, Part A funds to supplement not supplant State and local funds consistent with section 1118(b)(2); and
- Ensure that Title I schools receive services comparable to those provided in non-Title I schools.

Because these requirements apply, an LEA must continue to identify participating Title I schools, based on the percentage of low-income students under ESEA section 1113(a)-(b) and the amount of Title I, Part A funds, in the aggregate, the LEA allocates through its student-centered funding. However, the LEA need not comply with the allocation requirements under ESEA section 1113(c)(1)-(2), because Title I, Part A funds would be consolidated in the LEA's student-centered funding system.

ESEA section 1501(d)(1)(I) also requires an LEA that enters into a demonstration flexibility agreement to continue to meet the requirements of ESEA sections 1117 and 8501, which require an LEA to provide equitable services to eligible private school students, their teachers and families. Accordingly, before implementing its student-centered funding system in accordance with its local flexibility demonstration agreement, an LEA must determine the amount of funds from each Federal program whose funds it consolidates in its system that must be reserved in order to provide equitable services under that program. Then, in consultation with appropriate private school officials, the LEA determines what services to provide under each program.

Lastly, ESEA section 1501(d)(1)(J) requires an LEA that enters into a local flexibility demonstration agreement to meet the requirements of all applicable Federal civil rights laws. Those laws include Title VI of the Civil Rights Act of 1964, Title IX of the Education Amendments of 1972, Section 504 of the Rehabilitation Act of 1973, Title II of the Americans with Disabilities Act, and requirements under the Individuals with Disabilities Education Act.

The flexibility afforded by a local flexibility demonstration agreement applies to the Federal funds allocated to schools through an LEA's student-centered funding system. As a result, the flexibility does not apply for eligible Federal funds *not* allocated through the system nor to district-level uses of Federal funds. ESEA State-level requirements also continue to apply.

In addition, there are several requirements that the Secretary has determined an LEA approved under this authority must continue to meet, though the following is not an exhaustive list. An LEA that enters into a local flexibility demonstration agreement must continue to implement the standards and assessment requirements in ESEA section 1111(b) and the accountability requirements in ESEA section 1111(c). Moreover, such an LEA that has schools identified by the State for comprehensive or targeted support and improvement under ESEA section 1111(c) and (d) must ensure that such schools implement appropriate interventions. Similarly, the LEA must address disparities that result in low-income students and minority students in Title I schools being taught at higher rates than other students by inexperienced, ineffective or out-of-field teachers pursuant to ESEA section 1112(b)(2). Also, the LEA must meet the local report card requirements, including reporting actual per-pupil expenditures by school, pursuant to ESEA section 1111(h)(2) (subject to the timeframe established by the June 28, 2017 Dear Colleague Letter (see: <https://www2.ed.gov/policy/elsec/leg/essa/perpupilreqltr.pdf>)).

An LEA with a local flexibility demonstration agreement is expected to include all schools in the LEA when allocating funds through its student-centered funding system. An LEA should follow State and local law regarding whether a public charter school is included as a school within the LEA.

## Consultation

Under ESEA section 1501(d)(1)(G), each LEA must assure that it developed and will implement the local flexibility demonstration agreement in consultation with teachers, principals, other school leaders (including charter school leaders in an LEA that has charter schools), administrators of Federal programs impacted by the agreement, parents, community leaders, and other relevant stakeholders. For an LEA that is continuously engaging with stakeholder groups regarding the development or implementation of a student-centered funding system, such engagement constitutes consultation for purposes of providing this assurance. An LEA must ensure that all required stakeholder groups are included in consultation.

## Continued Demonstration

ESEA section 1501(e) requires that each LEA with an approved local flexibility demonstration agreement must annually:

- Demonstrate to the Secretary that, as compared to the previous fiscal year, no high-poverty school received from eligible Federal, State and local sources through the LEA's student-centered funding system—
  - Less per-pupil funding for low-income students; or
  - Less per-pupil funding for English learners;
- Report to the Secretary and make public its per-pupil expenditures, including actual personnel expenditures that include staff salary differentials for years of employment and actual non-personnel expenditures, for each school served by the LEA, disaggregated by each quartile of students attending the school based on student level of poverty and by each major racial or ethnic group in the school, for the previous fiscal year; and
- Make public the total number of students enrolled in each school served by the LEA and the number of students enrolled in each school disaggregated by each major racial and ethnic group, students from low-income families, English learners, and children with disabilities.

## Completing and Submitting an Application

Each LEA must address all of the requirements identified below in its application for a local flexibility demonstration agreement. An LEA must use the template below, although an LEA may supplement certain responses where indicated with additional information or data in an attachment(s). For an LEA requesting to implement this flexibility beginning in the 2018-2019 school year, this application is due to the U.S. Department of Education (Department) by **March 12, 2018**. For an LEA requesting to implement this flexibility beginning in the 2019-2020 school year, this application is due by July 15, 2018. The Department may accept additional applications for this flexibility in the future on dates to be announced. Applicants should send complete applications to [WeightedFundingPilot@ed.gov](mailto:WeightedFundingPilot@ed.gov).

## **Application Review**

Each substantive question in the application will be scored as a “strong,” “sufficient” or “insufficient” response. Point values for each question are included in the relevant section. An applicant scoring zero points on a response would be considered incomplete and therefore ineligible for the flexibility without changes to its application, contingent upon the number of complete applications received and/or awards made at the time of resubmission.

## **Program Evaluation**

From the amount reserved for evaluation activities under ESEA section 8601, the Secretary, acting through the Director of the Institute of Education Sciences, will, in consultation with the Office of Elementary and Secondary Education, evaluate the implementation of the local flexibility demonstration agreements and the impact of such agreements on improving the equitable distribution of State and local funding and increasing student achievement. LEAs operating under a local flexibility demonstration agreement pursuant to ESEA section 1501 must cooperate with such offices in service of the evaluation.

## Instructions

*Each LEA must provide descriptions and other information that address each requirement listed below for the programs included in its application to enter into a local flexibility demonstration agreement.*

### **Title I, Part E: Application for Local Flexibility Demonstration Agreement**

- 1) Please indicate the school year for which the LEA requests to first use the authority to consolidate and use local, State and eligible Federal funds in a student-centered funding system. Please check the box below that applies. Note that the Secretary may approve an LEA for a period of not more than three years. The agreement may be renewed by the Secretary for additional three-year terms.

School Year 2018-2019

Other: School Year \_\_\_\_\_

2) (ESEA section 1501(d)(1)(A)) Describe the student-centered funding system based on weighted per-pupil allocations, including –

- a The weights used to allocate funds within such system. Please complete Table I or attach information regarding the weights to be used to allocate funds within your system. (Rows may be added to the table as necessary.)

*Points: strong = 8 points; sufficient = 4 points; insufficient = 0 points*

PRDE’s student-centered funding system will establish a base per student amount that is required to educate a general education student (i.e. one without special circumstances or needs) and then, applying weights, or additional funding, to that amount, depending on individual students’ characteristics, such as low-income, English language learners and other weighted student groups. Below, PRDE presents the weights that will be used to allocate funds within our student-centered funding system. A student that does not falls on any of the proposed weighted groups will receive a base per pupil allocation. On top of the base allocation, a Spanish learner will receive additional 94% and a low-income student will receive an additional 53%. If a student is a combination of both groups, that student will receive an additional 147% on top of the base that a regular child will be allocated.

**Table I: School Funding System Weights**

<b>Weighted Group</b>	<b>Description of the Weighted Group</b>	<b>Weight</b>
English Learners	PRDE identifies Spanish as the main language instructed, therefore, the correct description to this weighted group would be Spanish Learners (SL)*	1.94
Low-Income Students	Students economically disadvantaged are defined as those whose family nucleus receive less	1.53

\* The language of instruction in PRDE is Spanish. Therefore, instead of English Language Proficiency (ELP), students are identified as Spanish Learners (SL). SL are students who are unable to communicate fluently or learn effectively in Spanish, who often come from non-Spanish-speaking homes and backgrounds, and who typically require specialized or modified instruction in both the Spanish language and in their academic courses.

*Other Educationally Disadvantaged Students:*<sup>1</sup>

<b>Weighted Group</b>	<b>Description of the Weighted Group</b>	<b>Weight</b>
PRDE will not include <i>Other Educationally Disadvantaged Students</i> for purposes of the WSF.	N/A	N/A

<sup>1</sup> “Other Educationally Disadvantaged Students” are students with any other characteristics associated with educational disadvantage chosen by the LEA pursuant to ESEA section 1501(d)(2)(A)(ii), which may include students with disabilities. If your student-centered funding system includes more than two groups of educationally disadvantaged students, please add additional rows to the table. If fewer than two, please leave row(s) blank.

*Other Weighted Student Groups:<sup>2</sup>*

<b>Weighted Group</b>	<b>Description of the Weighted Group</b>	<b>Weight</b>
Grade Span – Primary	Students attending school level from K to 8 <sup>th</sup> grade	1.31
Grade Span – All Levels	Students attending schools where 2 or more levels are offered.	1.18
Rural	Students attending schools with the geodata of urban and rural zones defined by the U.S. Census Bureau.	1.20

b. How the system will meet the requirements of ESEA section 1501(d)(2). In order to meet the requirements of ESEA section 1501(d)(2), please describe how the system will do the following:

- (1) Use weights or allocation amounts that allocate substantially more funding to English learners, students from low-income families, and students with any other characteristics associated with educational disadvantage chosen by the LEA, than to other students;

*Points: strong = 10 points; sufficient = 5 points; insufficient = 0 points*

As previously presented, the weights used to demonstrate the Fund’s distributions within the system showed both the Spanish Learners students and the Low-Income Family students with the highest percentages of weight in the PRDE formula. This fact will ensure those students will receive the highest amounts of the fund distribution and this will transcend into more funding for the specific needs these students demonstrate. The Spanish learner student represent a 94% of the formula weight, and the low-income student represent a 53% of weight; however, we’re also including considerable weights to the Primary (31%) and All Levels (18%) Grade spans and rural students (20%). These weights ensure the disadvantaged groups we’re considering in the formula will increase the funds their schools will receive by their respective weights assigned per student. For example, a school will receive 94% additional funds for each SL student enrolled in a school to a non-SL student.

A student that does not falls on any of the proposed weighted groups will receive the base per pupil allocation. On top of the base allocation, a Spanish learner will receive additional 94% and a low-income student will receive additional 53%. If a student is a combination of both groups, that student will receive a total of 147% (53% + 94%) weight on top of the base allocation. If this student is a Primary, Spanish Learner and Low-Income Family student, then the combination of this profile will end up assigning this child additional 178% (53% + 94% + 31%). If this child is only a Primary student, it will receive additional 31% on top of the base allocation.

- (2) Ensure that each high-poverty school receives, in the first year of the demonstration agreement, more per-pupil funding from Federal, State and local sources for low-income students and at least as much per-pupil funding for English learners as the school received the year immediately preceding the first year of the demonstration agreement.

*Points: strong = 10 points; sufficient = 5 points; insufficient = 0 points*

PRDE will ensure more per-pupil funding from Federal, State and local sources are assigned to those schools by identifying those that are in the highest two quartiles, based on the percentage of students from low-income families that are enrolled and by assigning a base funding for all students as well as additional funding for the targeted economically disadvantaged students. By targeting economically disadvantaged students, a well-developed formula renews attention to the relationship between economic disadvantage and achievement. At this moment, given the precarious circumstances left by hurricanes Irma and María, combined with the challenging economic and fiscal situation, the PRDE is undergoing a restructuring process and as a result schools are being closed/consolidated and students are being moved into different schools. As you may understand, we don't have accurate nor complete data on active schools and enrollment data for the per pupil analysis that must be performed to answer the question and complete the required chart.

If, as a result of implementing this new strategy of funding allocation, a school seems to receive less funds that it actually receives, PRDE will take all the necessary measures to arrange a budget adjustment to ensure that the school maintains an equal or largest budget per pupil assignment.

---

<sup>2</sup> “Other Weighted Student Groups” are student groups in addition to those otherwise listed for whom the LEA will provide a weighted allocation, if any. If your student-centered funding system includes more than two Other Weighted Student Groups, please add additional rows to the table. If fewer than two, please leave row(s) blank.

- (3) Be used to allocate to schools a significant percentage, which shall be agreed upon by the LEA and the Department during the application process, of all the LEA's State and local education funds and eligible Federal funds, including, pursuant to ESEA section 1501(d)(2)(B), demonstrating how:
- (a) The percentage is sufficient to carry out the purposes of the demonstration agreement and to meet the requirements of ESEA section 1501(d); and
  - (b) The State and local education funds and eligible Federal funds *not* allocated through the system do not undermine or conflict with the requirements of the demonstration agreement.

*Points: strong = 10 points; sufficient = 5 points; insufficient = 0 points*

PRDE is strongly committed to continue efforts to provide excellent educational services to all the population served in Puerto Rico. As we continue to develop strong, improved strategies to adopt modern and more effective ways to manage our Funds, we are only including in this application both state and local as well as eligible federal Funds received that ensure our students will receive the maximum Funds they need to overcome any disadvantage. The new weights on the formula, highlighted above, focus on the students with the greatest needs. For the allocation purposes, PRDE has included, only those Funds that are directly associated with the educational services we provide to our children. Expenses such as SEA's payrolls, Travel Expenses for Administrative personnel, Professional Services not associated with students were excluded from this calculation to ensure that the amount presented fairly demonstrates the funds needed to continue providing essential educational services to the students, besides the administrative costs associated with the services provided.

The total percentage from each funding (state: 49, Title I, Part A: 53, Title II, Part A: 55 and Title III, Part A: 92) referenced is sufficient to carry out the purposes of the demonstration agreement and to meet the requirements of ESEA section 1501(d). The 49 percentage represent the total state and local funds that PRDE project to allocate to schools for the basic instruction. The remaining 51% of the state funds will be distributed for special education program purposes, student's nutrition program, occupational and technical education and general services, which includes transportation services and stipends to parents, school maintenance and administrative personnel. The percentages from Title I and II constitute the funds that PRDE will distribute to schools for the basic instruction and other educational activities based on the particular needs of the schools. The Title III percentage represents the total allocable amount from the award that PRDE receives to provide supplemental services to enhance language instructional programs to serve Spanish/ English Learners. On the other side, there are federal, state and local funds not included in the percentages for this application that have other purposes such as to provide services associated to Special Education and related services, Occupational and Technical Education, School Lunch program and transportation, among others that are described below.

As previously mentioned, Special Education state funds are utilized to pay for payroll of service assistants, special education teachers, transportation services and payments to parents, IT infrastructure for special education purposes, complaints procedures, investigations and resolutions; consulting services, therapies and others. The federal funds that are assigned to

PRDE from the Individuals with Disabilities Education Act (IDEA), are used to supplement the direct services for students before mentioned, including equipment and materials; for technical assistance consulting services and professional development. These services are provided according to the students Individualized Educational Program (IEP).

In the case of Occupational and Technical Education, the funds are used to pay for vocational education specialized teachers, equipment, materials and consulting services for the program purposes.

After establishing PRDE's general distribution and uses of funds (according to each program/grant), we will explain how we will guarantee that sufficient funds are assigned to schools, among other important aspects of this pilot student-centered project, benefiting the different subgroups.

PRDE will perform a preliminary exercise utilizing the estimated expenditures and the projected funds that will be awarded from local, state and eligible federal funds for the distribution that will be made through the proposed system. This exercise will aim PRDE to project that the percentage set is sufficient to carry out the purposes of the demonstration agreement and to meet the requirements of ESEA section 1501(d). If the projection does not demonstrate that the percentage is appropriate to carry out all activities of the demonstration agreement described in the before mentioned section, PRDE will assign more funds to meet the amount needed to develop this project. If PRDE is unable to carry out the purposes of this agreement, PRDE will evaluate if the student-center pilot can be implemented during 2018-2019 fiscal year or if additional determinations have to be made.

To assure that state and local funds and eligible federal funds not allocated through the system do not undermine or conflict with the requirements of the demonstration agreement in any way, the Federal Affairs Secretariat will oversight and monitor the implementation of this pilot program. Each program coordinator will ensure that the funds not separated to be consolidated and distributed to schools, don't shatter or affect the requirements established. In addition, the monitoring unit will be in charge of follow up visits and desk monitoring to schools and of submitting reports with any information or areas of concern to the Federal Affairs Director about this matter. If the reports display any kind of conflict or problems with the demonstration agreement, the PRDE management will be in charge of taking the necessary determinations to immediately correct or address the identified area of improvement.

- (4) Include all school-level actual personnel expenditures for instructional staff (including staff salary differentials for years of employment) and actual non-personnel expenditures in the calculation of the LEA's State and local education funds and eligible Federal funds when calculating the significant portion of funds to be allocated to the school level.

*Points: strong = 10 points; sufficient = 5 points; insufficient = 0 points*

The school-level expenditures allocated through our formula include only the services offered to ensure the basic educational services program such as teachers, professionals involved in direct contact with our students and every cost related to keep them highly-

trained and capable to perform their duty, student transportation services, Science, Technology, Engineering and Mathematics (STEM) Programs, implemented to enhance the academic quality of our served population, child nutrition services, among others.

In addition, as mentioned in the answer for the previous question, the system for school level that PRDE proposes include all actual personnel and non- personnel expenditures in the calculation of the significant portion of (state, local and eligible Federal) funds to be allocated, excluding the additional 51% breakdown related to the educational services explained.

Accordingly, to meet with this requirement, PRDE will ensure that it will apply the formula and rely only on the result of the formula in allocating the funds that go through the system, specifically to the school-level. The proposed formula takes into consideration all eligible funds to be allocated according to the students' needs and proposed weights. PRDE will directly apply the student-centered funding formula outlined in our plan to meet this requirement.

PRDE will assure that each school receives, at a minimum, the funds, or resources based on the amount of funds, the school generates through the formula developed. PRDE won't allocate personnel based on a number of full-time-equivalent staff members using a student-to-staff ratio. Instead, PRDE is determining the funds that are available to the schools based on the student-centered funding formula for the portion of funds that go through the formula. As stated before, if PRDE realizes that it will not be in position to comply with this requirement or any other mandatory requisite, PRDE will evaluate if it's possible to implement the student-center formula for next year or if other determinations must be taken.

- (5) After allocating funds through the system, charge schools for the per-pupil expenditures of State and local education funds and eligible Federal funds, including actual personnel expenditures (including staff salary differentials for years of employment) for instruction staff and actual non-personnel expenditures.  
*Points: strong = 6 points; sufficient = 3 points; insufficient = 0 points*

Under agreement between the Department of Education of Puerto Rico and the Federal Department of Education, in 2004, PRDE implemented a series of measures to improve the recordkeeping of the revenues and disbursement accounting of federal and state funds. Among the measures implemented, the Department of Education changed its financial system and launched the "Financial Information System of the Department of Education" (SIFDE, for its acronym in Spanish). The Finance Division developed a procedures manual where it specified the critical steps to properly record PRDE's accounting transactions.

SIFDE is designed to create an appropriate audit trail of the disbursements and transactions of each federal program and in general of the use of those funds. The system allows the Department of Education to track obligations at all levels within the period of availability, (i.e. community schools, districts, regions).

SIFDE allows the PRDE to budget the funds granted at a specific level of expenditure object (i.e. state or federal fund, expenditure object, school code, availability period, and spending account) and not only at the macro level. This characteristic represents an internal control in which SIFDE allows the Program and/or Area to limit spending strictly to what was approved in the budget of the Work Plans and/or Projects. In addition, SIFDE is designed to improve the management of funds at the school level, specifically, to reduce the time that elapses between disbursement and the application of funds to the Federal Government. The SIFDE system allows the accounting staff perform accounting checks, in order to validate the data recorded in the system.

Under the options that the US Department of Education recommended to eligible entities applying for this flexibility within the FAQ published (for instruction staff and actual non-personnel expenditures), PRDE chose to implement the method described as follows. PRDE will pick a date near the beginning of the school year and calculate actual personnel and non-personnel costs for the entire year as of that date. PRDE would compare those actual costs to the amount each school was charged during the budget process and make the necessary adjustments appropriately. Those adjustments must suffice for the remainder of the school year.

In our case, the preliminary date that PRDE has chosen is the third week of September because we project that we will have the certified enrollment data. This data is necessary in order to be able to make the corresponding allocation of funds, taking into account the specific (real) needs of the students enrolled in each school to be able to assign the proposed weights.

- c. Describe how the system will support the academic achievement of students, including low-income students, the lowest-achieving students, English learners, and children with disabilities.

*Points: strong = 10 points; sufficient = 5 points; insufficient = 0 points*

The Local Flexibility Demonstration Agreement for Equitable Per-pupil Funding will allow Puerto Rico Department of Education to support the academic achievement of all students giving schools more economic resources sent directly to them, giving students more opportunities to receive better instruction (in a differentiated way), exposing them to more academic experiences that support the development of the common core standards and 21<sup>st</sup> century skills, creating a more comprehensive planning process that will take into account the availability of funds and the access to materials and equipment to enhance the learning experience, providing teachers with more tools in their classrooms and more access to work with the multiple needs of students, and the providing more timely interventions with students with specific needs, offering them what they really need to improve achievement. More funds in our schools means more services to our students, more equitable services, and more opportunities to improve academic achievement by aligning with the objectives and goals of the best practices for our educational systems.

The services that will be provided to low income and lowest achievement students will be based

on the needs assessment results of each school and could include: tutoring, supplemental equipment and materials, STEM and PBL activities and professional development for teachers, among others. For Spanish Learners the program will be providing linguistic interventions, specialized professional development for teachers that provide services to this population and the acquisition of supplemental materials, equipment, software and hardware. In the case of special education kids, it will always depend on the need and disabilities of the students. For this population, the services will be provided according to the IEP activities and the specialist's recommendations to ensure the students have a fair opportunity to participate from school and to address their specific needs.

The activities and services according to each eligible population will be included in the school's workplan. Each school will responsible for developing a complete plan that will project to address the student's specific academic needs with proven effective strategies. Further, we will discuss the evaluation process of the corresponding school plans to ensure compliance and allocability

3) (ESEA section 1501(d)(1)(B)) Identify the funding sources, including eligible Federal funds, the LEA will include in the system. Please check all the boxes below that apply.

- Local
- State
- Title I, Part A: Improving basic programs operated by LEAs
- Title I, Part C: Education of migratory children
- Title I, Part D, Subpart 2: Local prevention and intervention programs for children and youth who are neglected, delinquent, or at risk
- Title II: Preparing, training, and recruiting high-quality teachers, principals, or other school leaders
- Title III: Language instruction for English learners and immigrant students
- Title IV, Part A: Student support and academic enrichment grants
- Title V, Part B: Rural education initiative

- 4) (ESEA section 1501(d)(1)(C)) Identify the amount and percentage of total LEA funding, including State and local education funds and eligible Federal funds, that will be allocated through the system.

Pursuant to ESEA section 1501(d)(2)(A)(iv), the percentage of funds allocated to schools must be a significant percentage of the LEA’s State and local education funds and eligible Federal funds.

Please complete Table II or attach information regarding the portion of funding that will be allocated through your school funding system for State and local funds and for eligible Federal programs. An LEA should indicate the portion of each type of funding to be allocated through the student-centered funding system in the first year of implementation. If the Department enters into an agreement with an LEA, such LEA will need to annually update this information. Please indicate the date by which you will update this information for years two and three of implementation.

Note this information is only required for those eligible Federal funding sources the LEA will include in the system. If an LEA is *not* including an eligible Federal funding source listed below in its system, it is not required to complete the row for that funding source. Rows may be added to the table as necessary.

*Points: strong = 10 points; sufficient = 5 points; insufficient = 0 points*

**Table II: Portion of LEA Funding Allocated Through System**

<b>Funds</b>	<b>Fiscal Year</b>	<b>Total Funding</b>	<b>Amount of Funds Allocated Through System</b>	<b>Percentage of Funds Allocated Through System</b>
<b>State and Local Funds</b>	2018-19	1,528,063,000	742,806,309	49%
<b>Title I, Part A</b>	2018-19	388,684,712	206,414,268	53%
<b>Title I, Part C</b>	N/A	N/A	N/A	N/A
<b>Title I, Part D, Subpart 2</b>	N/A	N/A	N/A	N/A
<b>Title II</b>	2018-19	59,358,585	32,925,937	55%
<b>Title III</b>	2018-19	3,363,595	3,092,561	92%
<b>Title IV, Part A</b>	N/A	N/A	N/A	N/A
<b>Title V, Part B</b>	N/A	N/A	N/A	N/A

This applicant, if awarded authority for this flexibility, will update this table by March 2019 to reflect funding for year two of implementation and by March 2020 to reflect funding for year three of implementation.

- 5) (*ESEA section 1501(d)(1)(D)*) Identify the per-pupil expenditures of State and local education funds for each school served by the LEA for the fiscal year immediately preceding the year in which the LEA is applying to use the flexibility. This must include actual personnel expenditures (including staff salary differentials for years of employment) and actual non-personnel expenditures.

*Points: strong = 6 points; sufficient = 3 points; insufficient = 0 points*

*Note: For an applicant using estimated amounts as described below, the points awarded under this item will consider responses to both items 5 and 7.*

As suggested by the USDE, we are using fiscal year 2016-17 data based on the availability of the information of the most recent fiscal year data. Therefore, this information represents real data not estimated under any circumstances. No special methodology was applied to this information, and we certify that the data is complete and accurate.

Please refer to the attachment included detailing the per pupil expenditures requested in this question.

- 6) (*ESEA section 1501(d)(1)(E)*) Identify the per-pupil amount of eligible Federal funds each school served by the LEA received in the preceding fiscal year from when the LEA will first use the flexibility disaggregated by the programs supported by the eligible Federal funds. This should only include funds that were received by (*i.e.*, allocated to) schools.

*Points: strong = 6 points; sufficient = 3 points; insufficient = 0 points*

*Note: For an applicant using estimated amounts as described below, the points awarded under this item will consider responses to both items 6 and 7.*

As suggested by the USDE, we are using fiscal year 2016-17 data based on the availability of the information of the most recent fiscal year data. Therefore, this information represents actual data and is not estimated. No special methodology was applied to this information, and we certify that the data is complete and accurate.

In regard to Title III Part A Program funds, the data presented does not include a breakdown of funds from this Program at a school level, due to the fact that the PRDE manages this grant in the SEA level to maximize the use of funds. Services that are provided to this subgroup are established within the applicable school year work plan, which takes into consideration all eligible student's needs. If the proposed formula is approved, PRDE will distribute this program funds to the schools as the formula establishes.

Please refer to the attachment included detailing the per pupil eligible Federal Funds requested in this question.

When responding to questions 5 and 6 above, please complete Table III or attach the same required information. Note that question 5 above addresses per-pupil expenditures of State and local education funds for each school served by the LEA while question 6 asks the LEA to specify funds received by (*i.e.*, allocated to) a school, disaggregated by eligible Federal program. Rows may be added to the table as necessary.

Please note this information is only required for those eligible Federal funding sources the LEA will include in the system. If an LEA is *not* including an eligible Federal funding source listed below in its system, it is not required to provide information for that funding source.

*Only for applicants for SY 2018-2019:*

When responding to questions 5 and 6, if an LEA has elected to delay the reporting of per-pupil expenditures pursuant to ESEA section 1111(h)(1)(C)(x) and (h)(2)(C) as authorized by the Department's transition authority under section 4(b) of the ESSA and indicated in the June 28, 2017 Dear Colleague letter (see: <https://www2.ed.gov/policy/elsec/leg/essa/perpupilreqltr.pdf>), the LEA is not required to list the actual per-pupil expenditures for State and local education funds for each school nor the per-pupil amounts for eligible Federal funds received by school. Instead, an LEA may provide estimated data of both the per-pupil expenditures for State and local education funds for each school and the per-pupil amounts for eligible Federal funds received by the school. If an LEA is providing estimated data, it must complete question 7. If an LEA is not using estimated data, it does not need to respond to question 7.

*For applicants for SY 2019-2020 or later:*

When responding to questions 5 and 6, an LEA must provide either:

- (a) the actual per-pupil expenditures of State and local education funds and the amount of eligible Federal funds received for each school served by the LEA from the fiscal year immediately preceding the year for which the LEA is applying to use the flexibility; or,
- (b) the actual per-pupil expenditures of State and local education funds and the amount of eligible Federal funds received for each school served by the LEA from two fiscal years earlier than the year for which the LEA is applying to use the flexibility, adjusted for any significant variances in enrollment or other reasonable adjustment for accuracy as necessary and as fully articulated in question #7.

For example, an applicant intending to first use the flexibility in SY2019-2020 that chose option (a) would submit an application by July 2018 that included actual per-pupil expenditures of State and local education funds and the amount of eligible Federal funds received for each school served by the LEA from Fiscal Year 2018 (SY 2017-2018).

An applicant intending to first use the flexibility in SY2019-2020 that chose option (b) would submit an application by July 2018 that included actual per-pupil expenditures of State and local education funds and the amount of eligible Federal funds received for each school served by the LEA from Fiscal Year 2017 (SY 2016-2017), adjusted for any significant variances in enrollment or other reasonable adjustment for accuracy as necessary. (This methodology must be fully articulated in question #7.)

LEAs that select option (a) are not required to answer question #7. LEAs that select option (b) must answer question #7 and additionally will be required to review, and as necessary revise, their submitted data prior to implementation of the flexibility based on the availability of more recent fiscal year data.

- 7) *Only for SY2018-2019 applicants that are using estimated data or applicants for SY2019-2020 or later that choose option (b) above: Please describe the methodology for estimating the actual per-pupil expenditures for State and local education funds for each school and for the per-pupil amounts for eligible Federal funds received by each school, in the preceding year. Please explain why the estimated amounts under this methodology will be reasonably accurate when*

compared to the actual data the applicant will collect consistent with ESEA section 1111(h)(1)(C)(x) and (h)(2)(C) within the timeframe established by the June 28, 2017 Dear Colleague letter. Additionally, please indicate how these estimates will be verified (and, if necessary, revised) once an LEA has met the requirements of ESEA section 1111(h)(1)(C)(x) and (h)(2)(C) and/or based on the availability of more recent fiscal year data. Please note that based on the accuracy of the estimates the Department may require revisions to these estimated data or revisions to the year in which the pilot begins for purposes of compliance with ESEA Section 1501(d)(2)(A)(iii).

*Points: As stated above, for an applicant for whom this item applies, the response will be considered in conjunction with the response to item 6 for the purposes of scoring the response.*

During the process of compiling all the necessary data for presenting actual versus forecasted information and include the most accurate data for this application, we entered conversations with the USDE via email, as Puerto Rico is in the midst of a long recovery process after Hurricanes Irma and María made their paths across our island. As result of this tragic episodes, the country has faced a considerable reduction of population as families continue to leave Puerto Rico. The PRDE has also faced a reduction of around 13% of student enrollment if you compare the actual count with what we had on year 2016-17. Even though moderate actions have already been taken, the combination of these reductions and the economic challenges that intensified even more after the hurricanes, we need to take additional actions and begin a restructuring process that contemplate the closing of at least 300 schools, and the relocation of those students and resources to where they better fit to serve the specific needs of the remaining population.

We anticipate that we will have the complete information regarding school closures and student relocations within 2 months' time. Once we have all this information we will submit it accordingly as required by the application.

For applicants for SY18/19 *only*, please indicate whether this data is either:

- Actual
- Estimated

For applicants for SY19/20 or later, please indicate whether this data was produced using either:

- Option (a): the actual per-pupil expenditures of State and local education funds and the amount of eligible Federal funds for each school served by the LEA from the fiscal year immediately preceding the year in which the LEA is applying to use the flexibility; or,
- Option (b): the actual per-pupil expenditures of State and local education funds and the amount of eligible Federal funds for each school served by the LEA from two fiscal years earlier than the year in which the LEA is applying to use the flexibility, adjusted for any significant variances in enrollment or other reasonable adjustment for accuracy as necessary.

8) (*ESEA section 1501(d)(1)(F)*) Describe how the LEA will ensure that it will meet the purposes of each Federal program whose funds are allocated through its system, including serving students from low-income families, English learners, migratory children, and children who are neglected, delinquent, or at risk, as applicable.

Please note this information is only required for those eligible Federal funding sources the LEA will include in the system. If an LEA is *not* including an eligible Federal funding source listed below in its system, it is not required to provide information for that funding source.

*Points: strong = 10 points; sufficient = 5 points; insufficient = 0 points*

### Title I, Part A

The PRDE will continue to adopt challenging academic content and achievement standards, administer its annual statewide assessment META-PR and META-AlternA, maintain its statewide accountability system, and issue the annual State report card. Annually, Puerto Rico administers its high quality and aligned assessment to measure the proficiency and academic growth of students in the content areas of Spanish, math and English as a second language in third through eighth and eleventh grade. The curricular area of science is also measured in fourth, eighth and eleventh grade. The results of PRDE's evaluation system are used to guarantee the accountability and provide support and feedback to schools on student achievement in relation to the curriculum. With continued high expectations and appropriate supports and interventions for struggling students, PRDE expects to see its students rise to the challenge and observe the corresponding change in achievement results.

PRDE will maintain its fiscal effort under section 1118(a) and 8521. Implementing the student-centered funding system will not affect PRDE's ability to maintain effort under ESEA sections 1118(a) and 8521 because the PRDE's MOE measures expenditures of State and local funds in the preceding fiscal year compared to the second preceding fiscal year.

PRDE will use Title I, Part A funds to supplement and not supplant State and local funds consistent with section 1118(b)(2); and ensure that Title I schools receive services comparable to those provided in non-Title I schools.

The PRDE will continue to provide equitable services to eligible private school students, their teachers and families under Title I, Part A funds. On an annual basis, PRDE determines the amount of funds from each Federal program whose funds it consolidates in its system in order to ensure it will provide equitable services under that program. PRDE determines what services to provide under each program per the amount of funding generated for each program and the needs of the eligible private school students, teachers, and families through its consultation activity with appropriate private school officials.

Will continue to meet the requirements of all applicable Federal civil rights laws. Those laws include Title VI of the Civil Rights Act of 1964, Title IX of the Education Amendments of 1972, Section 504 of the Rehabilitation Act of 1973, Title II of the Americans with Disabilities Act, and requirements under the Individuals with Disabilities Education Act. We will also address disparities that result in low-income students and minority students in Title I schools being taught at higher rates than other students by inexperienced, ineffective or out-of-field teachers pursuant to ESEA section 1112(b)(2). In 2014 PRDE developed the Teacher Equity Plan in an effort to ensure that all students receive education by excellent teachers. This plan complies with all the requirements of the USDE in the components of the Teacher Equity Plan. It ensures that qualified and effective teachers have access to all necessary support systems to teach all students regardless of socio-economic status, ethnicity, and / or geographic

location. PRDE recognizes that number of inexperienced, unqualified teachers, teachers outside their field could increase if there is no effective recruitment and retention method that directly addresses these needs. During the 2016-2017 and 2017-2018 school year PRDE engaged in ongoing revision to its recruitment and retention processes to ensure the equitable distribution and/or designation of highly qualified, certified and experienced teachers to fill vacant positions. Among the strategies that the PRDE will use to eliminate the equity gaps and address disproportionate representation are:

Strategy 1: Ensure effective management of the human resources

Strategy 2: Strengthen Teacher preparation and In-Service Training Programs

Strategy 3: Commitment of PRDE's staff to the Equal Access Initiative for all students' background information and the current situation

Among other matters, PRDE will continue to meet with the report card requirements. The Data included in the School Report Card, which is based on their META-PR scores having to do with academic achievement, the whole child, and teachers allows schools to measure interim progress, issue progress reports, and establish priorities based on those needs in order to produce activities to close the gap. Progress reports allows schools to ensure that their activities are closing the gap.

Moreover, each school is subject to submit a school workplan including all the activities proposed towards the purpose of Title I program. This workplans are carefully evaluated one by one by the PRDE to ensure the schools that are receiving the Funds will develop initiatives to assist its population and ensure high quality development and results. To accomplish this task, PRDE developed evaluation rubrics according to the purposes and requirements of each federal program. Complying with the rubrics of evaluation will determine if the schools can have access to the funds that should be allocated. If schools don't show compliance with the different programs requirements in their workplans, the evaluators can request modifications to ensure the activities established are according to the program objectives. During the mentioned process the schools will have a limited allocation until the school's workplan modify the presented activities to guarantee the funds will be used for the right purposes.

### Title I, Part C

The PRDE does not receive Title I, Part C Federal funding.

### Title I, Part D, Subpart 2

PRDE is *not* including Title I, Part D, Subpart 2 federal funding in its student-centered funding system.

### Title II

The PRDE will continue to meet with the requirement of increasing its student academic achievement; improve the quality and effectiveness of educators; increase the number of educators who are effective in improving student academic achievement; and provide low-income and minority students greater access to effective educators. During the 2017-2018 academic year, the PRDE implemented a new Teacher Evaluation process. The new Teacher Evaluation System aims to strengthen the teacher's capabilities to achieve the transformation of schools. It is a three-step process consisting of two visits and evaluation, which documents, through observation, the areas of strength and opportunity of the teacher, as well as the next steps to receive academic support and technical assistance. Through this system, the PRDE seeks to use the results of the formative evaluation results to analyze, plan and

improve educational practice. This way PRDE can formalize the efforts and support that will be offered to teachers to make changes in their professional practice to benefit all students. Additionally, will perform capacity building leadership academies for school principals, teachers, and other academic leaders with the objective of strengthening the teaching and learning process to improve student outcomes. To accomplish this principal and teacher academies focus on strengthening school leadership, human and fiscal resource management, operational issues, as well as instructional improvement. Through the leadership academies, the PRDE will provide professional development to teachers so that these may impact the improvement of the academic achievement of its students, and evidence this improvement in the student's proficiency tests and corresponding distribution of grades (A, B, and C); META-PR and META-PR Alterna and the results of Adequate Yearly Progress (AYP); College Board and Advance Placement Tests, as applicable.

As stated before in the description of Title I program's process taken to guarantee the use of the Funds comply with the program's purposes, each school is subject to submit a school workplan including all the activities proposed towards the purpose of Title II program. This workplans are carefully evaluated one by one by the PRDE to ensure the schools that are receiving the Funds will develop initiatives to assist its population and ensure high quality development and results. To accomplish this task, PRDE developed evaluation rubrics according to the purposes and requirements of each federal program. Complying with the rubrics of evaluation will determine if the schools can have access to the funds that should be allocated. If schools don't show compliance with the different programs requirements in their workplans, the evaluators can request modifications in order to ensure the activities established are according to the program objectives. During the mentioned process the schools will have a limited allocation until the school's workplan modify the presented activities to guarantee the funds will be used for the right purposes.

### Title III

The goal is to assist SLs to meet the program's exiting criteria and the challenging State academic standards as all students are expected to meet. All services the student receives are unique and are designed to meet the language needs of the student as well as contribute to academic achievement. The program services provided to the student include after-hours tutoring, classroom support, academic resources, supplemental instructional materials, integration of technology, accommodations on standardized exams and classroom evaluations, extracurricular activities such as cultural events and field trips, family literacy nights, and other community sponsored events related to second language acquisition and academic achievement in needed areas. The Program will also continue to provide additional teachers or tutors to those students that are presenting a difficulty on acquiring the language, and therefore are having problems with their academic achievement. The teachers or tutor will mentor the homeroom teacher and will also team-teach with him/her. The same teacher or tutor will also do one on one teaching when needed.

The SLA program will focus on teachers who have SL students enrolled in their classroom for professional development opportunities related to second language acquisition. The professional development innovative plan includes sustained, intensive, collaborative, job-embedded, data driven, and classroom focused training related to the assessed needs among teachers and student academic progress data aligned with the three main goals established by the PRDE. In addition, as part of the professional development opportunities, the Title III program will provide coaching such as team

teaching, lesson planning and assessment, and peer observations for SL teachers to ensure they have the necessary knowledge and teaching methods to apply in the classrooms and to provide direct services to students that are unique according to their individual needs.

As stated before in the description of the other program's processes taken to guarantee the use of the Funds comply with the program's purposes, each school is subject to submit a school workplan including all the activities proposed towards the purpose of Title III program. These workplans are carefully evaluated one by one by the PRDE to ensure the schools that are receiving the Funds will develop initiatives to assist its population and ensure high quality development and results. To accomplish this task, PRDE developed evaluation rubrics according to the purposes and requirements of each federal program. Complying with the rubrics of evaluation will determine if the schools can have access to the funds that should be allocated. If schools don't show compliance with the different programs requirements in their workplans, the evaluators can request modifications in order to ensure the activities established are according to the program objectives. During the mentioned process the schools will have a limited allocation until the school's workplan modifies the presented activities to guarantee the funds will be used for the right purposes.

#### Title IV, Part A

PRDE is *not* including Title IV, Part A federal funding in its student-centered funding system.

#### Title V, Part B

PRDE is *not* including Title V, Part B federal funding in its student-centered funding system.

## Assurances

Please check each assurance. The LEA assures that:

- It has the legal authority to use the State and local education funds consistent with its proposed system of weighted per-pupil allocations;
- It developed and will implement the local flexibility demonstration agreement in consultation with teachers, principals, other school leaders (including charter school leaders in an LEA that has charter schools), administrators of Federal programs impacted by the agreement, parents, community leaders, and other relevant stakeholders;
- If it consolidates funds from a competitive grant under an eligible Federal program, it will carry out the scope and objectives, at a minimum, at the level described in the application under which the funds were awarded;
- It will meet all continued demonstration requirements pursuant to ESEA section 1501(e);
- It will use fiscal control and sound accounting procedures that ensure proper disbursement of, and accounting for, eligible Federal funds consolidated and used under such system, including by ensuring that costs are reasonable and necessary;
- It will continue to meet the requirements of ESEA sections 1117, 1118 and 8501;
- It will meet the requirements of all applicable Federal civil rights laws in carrying out the agreement and in consolidating and using funds under the agreement;
- It will use, for administrative purposes, not more than the percentage of funds allowed for such purposes under each eligible Federal program; and
- For eligible Federal funds *not* allocated through the student-centered funding system, it will continue to meet all applicable program and fiscal requirements.

School Code	School Name	Grades	State and local funds (expenditures)	Title I, Part A (funds received/ allocated)	Title I, Part C (funds received/ allocated)	Title I, Part D, Subpart 2 (funds received/ allocated)	Title II (funds received/ allocated)	Title III (funds received/ allocated)	Title IV, Part A (funds received/ allocated)	Title V, Part B (funds received/ allocated)
