

In September 2011, the U.S. Department of Education (the Department) offered each state education agency (SEA) the opportunity to request flexibility from the one-size-fits-all requirements of the *Elementary and Secondary Education Act of 1965 (ESEA)*, as amended by the *No Child Left Behind Act of 2001 (NCLB)*, on behalf of itself, its local education agencies (LEAs), and schools. SEAs wishing to qualify for *ESEA* flexibility were required to provide the Department with rigorous and comprehensive state-developed plans designed to improve educational outcomes for all students, close achievement gaps, increase equity, and improve instructional quality.

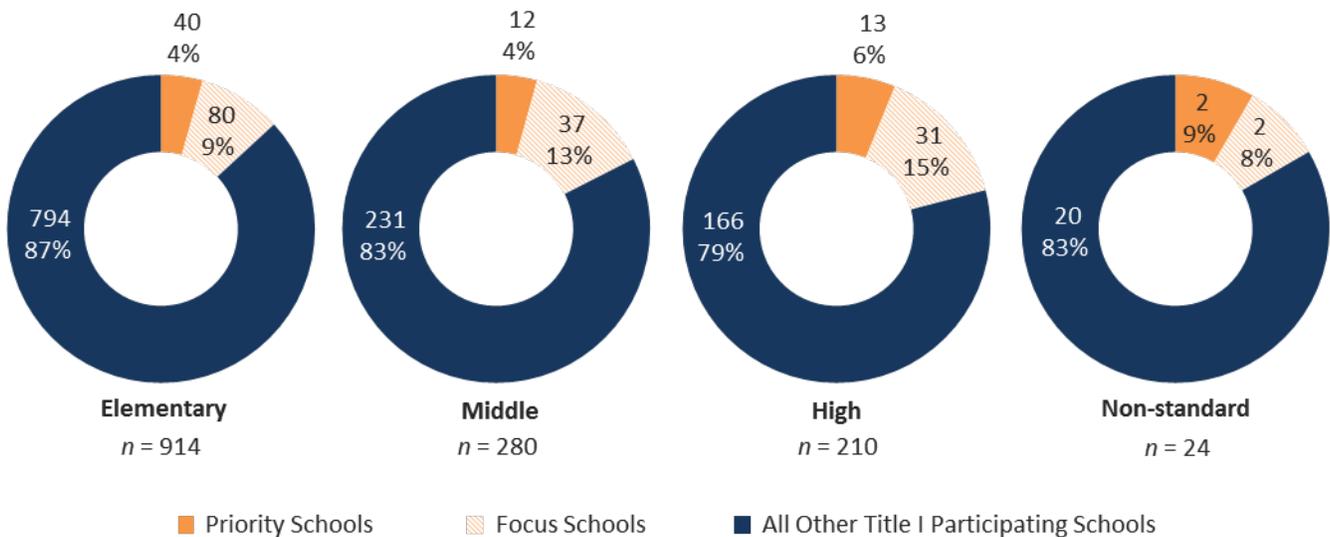

In order to receive *ESEA* flexibility, each SEA developed and implemented a system of differentiated recognition, accountability, and support that considered student achievement, graduation rates, and school performance and progress over time for the “all students” group, individual *ESEA* student subgroups, and any combined subgroup. A key element of the accountability systems was the identification of a state’s lowest-achieving schools and schools with the lowest graduation rates as priority schools and schools with the most significant achievement or graduation rate gaps as focus schools. Each SEA identified a number of schools equal to at least 5 percent of its Title I participating schools as priority schools and equal to at least 10 percent of its Title I participating schools as focus schools. Each SEA is ensuring that schools and students receive interventions and supports based on this comprehensive system of identification.

SEAs approved to begin implementation of *ESEA* flexibility in the 2012–13 school year (Windows 1 and 2 states) used 2010–11 data, 2011–12 data, or multiple years of data including 2011–12 data to identify schools under their systems of differentiated recognition, accountability, and support. Similarly, SEAs approved to begin implementation of *ESEA* flexibility in the 2013–14 school year (Windows 3 and 4 states) used 2011–12 data, 2012–13 data, or multiple years of data including 2012–13 data to identify schools under their accountability systems. The Department analyzed aggregate student data reported by SEAs to determine the extent to which each SEA’s identification of schools captured low subgroup achievement, low subgroup graduation rates, large subgroup achievement and graduation rate gaps, and subgroups meeting annual measurable objectives (AMOs), the 95-percent participation rate, and graduation rate targets. The data analysis that follows is a profile developed specifically for each state based on SEA-provided data for Title I participating schools. Each Window 1 and Window 2 state will have a Year 1 analysis (based on 2011–12 data) and a Year 2 analysis (based on 2012–13 data). Each Window 3 and Window 4 state will have only a Year 1 analysis (based on 2012–13 data). Please note that the analyses were impacted by varying levels of school data quality as indicated in the footnote for each exhibit and as noted in Appendix A-1 (Technical notes) and Appendix A-2 (Excluded and modified state profile analyses). Additionally, under *ESEA* flexibility, a state may have identified Title I eligible, but not Title I participating schools as priority schools. Such schools would not be included in the following analysis, which includes only Title I participating schools.

These profiles are provided to states as tools to facilitate continuous improvement of each SEA’s system of differentiated recognition, accountability, and support and to support conversations between individual SEAs and the Department. The Department intends to continue to generate data analyses of *ESEA* flexibility going forward. The current profiles are not designed to provide information on the effectiveness of individual state systems or the impact of *ESEA* flexibility on student achievement or other educational outcomes.

### Section I: Overview of Accountability Under *Elementary and Secondary Education Act (ESEA) Flexibility*

**Exhibit 1. What percentage of Title I participating elementary, middle, high, and non-standard schools were priority, focus, or other?**

**Exhibit reads:** In New Jersey, among Title I participating elementary schools, 4 percent (40 schools) were priority schools, 9 percent (80 schools) were focus schools, and 87 percent (794 schools) were among all other Title I participating schools for 2013–14.

Source: 2012–13 ED*Facts*, Data Group (DG) 18: Grades offered; 2013–14 ED*Facts*, DG 34: Improvement status - school (n = 1,428 Title I participating schools)

Note: Technical notes for this exhibit appear in the Appendix.

### Exhibit 3. What were the demographic characteristics of priority and focus schools compared to all other Title I participating schools?

Characteristics	Priority and Focus Schools	All Other Title I Participating Schools
<b>School Level (Percentage of Schools)</b>		
Elementary	55.3%	65.6%
Middle	22.6%	19.1%
High	20.3%	13.7%
Non-standard <sup>a</sup>	1.8%	1.7%
<b>Total</b>	<b>100.0%</b>	<b>100.0%</b>
<b>School Type (Percentage of Schools)</b>		
Regular	97.2%	97.5%
Alternative	1.4%	<1%
Special education	0.0%	<1%
Vocational	1.4%	2.2%
<b>Total</b>	<b>100.0%</b>	<b>100.0%</b>
<b>Charter School Status (Percentage of Schools)</b>	<1%	5.9%
<b>Urbanicity (Percentage of Schools)</b>		
Large or middle-sized city	44.7%	10.0%
Urban fringe and large town	51.6%	78.4%
Small town and rural area	3.7%	11.6%
<b>Total</b>	<b>100.0%</b>	<b>100.0%</b>
<b>Percentage of Students by Race/Ethnicity</b>		
American Indian	<1%	<1%
Asian	5.3%	7.8%
Black	34.7%	17.5%
Hispanic	48.8%	26.1%
White	10.8%	47.5%
<b>Total<sup>b</sup></b>	<b>99.6%</b>	<b>98.9%</b>
<b>Percentage of Students Eligible for Free or Reduced-Price Lunch</b>	76.4%	42.8%
<b>Percentage of Students With Disabilities</b>	14.5%	13.7%
<b>Percentage of Limited English Proficient Students<sup>c</sup></b>	13.0%	5.3%
<b>Average Total School Enrollment</b>	689	538

**Exhibit reads:** In New Jersey, 55 percent of Title I participating priority and focus schools for 2013–14 were elementary schools, compared to 66 percent of all other Title I participating schools.

## Year 2 ESEA Flexibility State Profile

**Exhibit 13. What percentage of Title I participating priority, focus, and other high schools had met the state-defined four-year adjusted cohort graduation rate targets?**

**Exhibit reads:** In New Jersey, among Title I participating high schools, 23 percent of priority schools (3 schools), 32 percent of focus schools (10 schools), and 97 percent of all other Title I participating schools (151 schools) met the state-defined four-year adjusted cohort graduation rate target for the “all students” group in 2012–13.

Source: 2012–13 ED*Facts*, Data Group (DG) 557: High school graduation rate indicator; 2013–14 ED*Facts*, DG 34: Improvement status - school (*n* = 200 Title I participating high schools [13 priority, 31 focus, and 156 all other Title I participating])

Note: Technical notes for this exhibit appear in the Appendix.

### Appendix

#### Exhibit A-1. Technical notes

Exhibit Number	Technical Notes
Exhibit 1. What percentage of Title I participating elementary, middle, high, and non-standard schools were priority, focus, or other?	<p>School levels were defined using <i>Common Core of Data (CCD)</i> codes, which were calculated from the school's corresponding low/high grade span: elementary (low grade: PK–3, high grade: PK–8); middle (low grade: 4–7, high grade: 4–9); high (low grade: 7–12, high grade: 12 only); and non-standard (grade configurations not falling within the elementary, middle, or high categories).</p> <p>This exhibit is restricted to elementary, middle, and high schools that provided a Title I Targeted Assistance (TAS) program or Title I Schoolwide program (SWP) in 2012–13 and reported improvement status for 2013–14. <b>This exhibit excludes 72 schools, including 8 Title I participating schools missing data for accountability status for 2013–14 and 64 schools missing data for 2012–13 Title I participation status.</b></p>
Exhibit 3. What were the demographic characteristics of priority and focus schools compared to all other Title I participating schools?	<p><sup>a</sup> Non-standard schools are schools with a grade configuration not falling within the elementary (low grade: PK–3, high grade: PK–8); middle (low grade: 4–7, high grade: 4–9); or high school (low grade: 7–12, high grade: 12 only) categories.</p> <p><sup>b</sup> Percentage of students by race/ethnicity may not sum to 100 percent due to exclusion of students reported as “two or more races.” <i>Asian</i> includes Pacific Islander, <i>American Indian</i> includes Alaska Native, <i>Black</i> includes African American, and <i>Hispanic</i> includes Latino.</p> <p><sup>c</sup> This category represents the percentage of limited English proficient (LEP) students participating in LEP programs among schools with LEP program—not all Title I participating—because the state did not report on schools with 0 LEP students participating in LEP programs.</p> <p>Student characteristics are weighted in proportion to the number of students enrolled in a school. This exhibit is restricted to schools that provided a Title I Targeted Assistance (TAS) program or Title I Schoolwide program (SWP) in 2012–13 and reported improvement status for 2013–14. Due to missing data in <i>EDFacts</i>, analysis samples vary across school characteristics, ranging from 194 to 217 for Title I participating priority or focus schools and from 926 to 1,211 for all other Title I participating schools. <b>This exhibit also excludes 72 schools, including 8 Title I participating schools missing data for accountability status for 2013–14 and 64 schools missing data for 2012–13 Title I participation status.</b></p>
Exhibit 4. What percentage of Title I participating priority, focus, and other schools had student subgroups performing in the bottom 5th percentile (for that subgroup) in reading?	<p>Percentiles are defined by the percentage of students scoring at or above proficient on state assessments in reading/English language arts. The percentage of schools in the bottom 5th percentile may exceed 5 percent in cases where the cut point for the 5th percentile and higher ranked percentiles (e.g., 10th, 15th) is 0 percent proficient. No Title I participating school met or exceeded the minimum <i>n</i> size for the American Indian subgroup. In addition, no priority school met or exceeded the minimum <i>n</i> size for the Asian subgroup.</p> <p>This exhibit is restricted to schools that provided a Title I Targeted Assistance (TAS) program or Title I Schoolwide program (SWP) in 2012–13 and reported improvement status for 2013–14. This exhibit excludes 103 schools, including 16 Title I participating schools (0 priority, 4 focus, 12 all other Title I participating) below the minimum <i>n</i> size for each student subgroup; <b>15 Title I participating schools (0 priority, 0 focus, 15 all other Title I participating) missing reading proficiency data for every student subgroup; 8 Title I participating schools missing data for accountability status for 2013–14; and 64 schools missing data for 2012–13 Title I participation status.</b></p>
Exhibit 5. What percentage of Title I participating priority, focus, and other schools had student subgroups performing in the bottom 5th percentile (for that subgroup) in mathematics?	<p>Percentiles are defined by the percentage of students scoring at or above proficient on state assessments in mathematics. The percentage of schools in the bottom 5th percentile may exceed 5 percent in cases where the cut point for the 5th percentile and higher ranked percentiles (e.g., 10th, 15th) is 0 percent proficient. No Title I participating school met or exceeded the minimum <i>n</i> size for the American Indian subgroup. In addition, no priority school met or exceeded the minimum <i>n</i> size for the Asian subgroup.</p> <p>This exhibit is restricted to schools that provided a Title I Targeted Assistance (TAS) program or Title I Schoolwide program (SWP) in 2012–13 and reported improvement status for 2013–14. This exhibit excludes 102 schools, including 15 Title I participating schools (0 priority, 3 focus, 12 all other Title I participating) below the minimum <i>n</i> size for each student subgroup; <b>15 Title I participating schools (0 priority, 0 focus, 15 all other Title I participating) missing mathematics proficiency data for every student subgroup; 8 Title I participating schools missing data for accountability status for 2013–14; and 64 schools missing data for 2012–13 Title I participation status.</b></p>

03/31/15

Exhibit Number	Technical Notes
<p>Exhibit 6. What percentage of Title I participating priority, focus, and other schools had student subgroup gaps that exceeded statewide subgroup gaps by one or more standard deviations?</p>	<p><sup>a</sup> SWD = Students with disabilities  <sup>b</sup> LEP = Limited English proficient  <sup>c</sup> Econ Disadv = Economically disadvantaged</p> <p>Proficiency rates for the nonBlack, nonHispanic, noneconomically disadvantaged, nonSWD, and nonLEP subgroups were calculated by subtracting the number of proficient students and the number of students with valid scores for the Black, Hispanic, economically disadvantaged, SWD, and LEP subgroups, respectively, from the number of proficient students and the number of students with valid scores for the “all students” group, and then dividing the resulting number of proficient students in the nonBlack, nonHispanic, noneconomically disadvantaged, nonSWD, or nonLEP subgroup by the number of students with valid scores in the subgroup. This exhibit is restricted to schools that provided a Title I Targeted Assistance (TAS) program or Title I Schoolwide program (SWP) in 2012–13 and reported improvement status for 2013–14. This exhibit excludes 293 schools, including 206 Title I participating schools (5 priority, 12 focus, 189 all other Title I participating) below the minimum <i>n</i> size for each student subgroup; <b>15 Title I participating schools (0 priority, 0 focus, 15 all other Title I participating) missing reading and mathematics proficiency data for every student subgroup gap included in the exhibit; 8 Title I participating schools missing data for accountability status for 2013–14; and 64 schools missing data for 2012–13 Title I participation status.</b></p>
<p>Exhibit 7. What percentage of Title I participating priority, focus, and other high schools had graduation rates below 60 percent?</p>	<p>The regulatory four-year adjusted cohort graduation rate is the number of students who graduate in four years with a regular high school diploma divided by the number of students who formed the cohort for that graduating class. The four-year adjusted cohort rate also includes students who graduate in less than four years. Under ESEA flexibility, states identified all Title I schools with graduation rates below 60 percent over a number of years.</p> <p>No Title I participating high school met the analysis threshold (i.e., 10 students in graduation cohort) for the American Indian subgroup.</p> <p>This exhibit includes 25 Title I participating high schools (7 priority, 9 focus, 9 all other Title I participating) where 2009–10 grade 9 enrollment was 10 percent to 99 percent greater or less than the number of students in the 2012–13 graduation cohort.</p> <p>This exhibit is restricted to schools serving grade 12 that provided a Title I Targeted Assistance (TAS) program or Title I Schoolwide program (SWP) in 2012–13 and reported improvement status for 2013–14. This exhibit may include non-standard schools (i.e., schools with grade configurations not falling within the elementary, middle, or high categories) serving grade 12. This exhibit excludes 66 high schools, including 2 Title I participating high schools (0 priority, 0 focus, 2 all other Title I participating) below the minimum analysis threshold (10 students in the graduation cohort) for each student subgroup; <b>12 Title I participating high schools (1 priority, 0 focus, 11 all other Title I participating) missing graduation rate data for every student subgroup; 2 Title I participating high schools (0 priority, 0 focus, 2 all other Title I participating) where 2009–10 grade 9 enrollment was over 100 percent greater or less than the number of students in the 2012–13 graduation cohort; and 50 high schools missing data for 2012–13 Title I participation status.</b></p>
<p>Exhibit 8. What percentage of Title I participating priority, focus, and other high schools had graduation rate subgroup gaps that exceeded statewide subgroup gaps by one or more standard deviations?</p>	<p><sup>a</sup> SWD = Students with disabilities  <sup>b</sup> LEP = Limited English proficient  <sup>c</sup> Econ Disadv = Economically disadvantaged</p> <p>This exhibit includes 25 Title I participating high schools (7 priority, 9 focus, 9 all other Title I participating) where 2009–10 grade 9 enrollment was 10 percent to 99 percent greater or less than the number of students in the 2012–13 graduation cohort.</p> <p>This exhibit is restricted to schools serving grade 12 that provided a Title I Targeted Assistance (TAS) program or Title I Schoolwide program (SWP) in 2012–13 and reported improvement status for 2013–14. This exhibit may include non-standard schools (i.e., schools with grade configurations not falling within the elementary, middle, or high categories) serving grade 12. This exhibit excludes 70 high schools, including 6 Title I participating high schools (0 priority, 0 focus, 6 all other Title I participating) below the minimum analysis threshold (10 students in the graduation cohort) for each student subgroup; <b>12 Title I participating high schools (1 priority, 0 focus, 11 all other Title I participating) missing graduation rate data for every student subgroup; 2 Title I participating high schools (0 priority, 0 focus, 2 all other Title I participating) where 2009–10 grade 9 enrollment was over 100 percent greater or less than the number of students in the 2012–13 graduation cohort; and 50 high schools missing data for 2012–13 Title I participation status.</b></p>

03/31/15

Exhibit Number	Technical Notes
<p>Exhibit 9. What percentage of Title I participating priority, focus, and other schools had met the state-defined annual measurable objective (AMO) targets in reading?</p>	<p>No Title I participating school was reportedly accountable for the American Indian subgroup. In addition, no priority school was reportedly accountable for the Asian subgroup. Percentages greater than or equal to 99.5 percent are rounded to 100 percent. This exhibit is restricted to schools that provided a Title I Targeted Assistance (TAS) program or Title I Schoolwide program (SWP) in 2012–13 and reported improvement status for 2013–14. This exhibit excludes 103 schools, including 19 Title I participating schools (0 priority, 1 focus, 18 all other Title I participating) reportedly not accountable for any reading AMO target; <b>12 Title I participating schools (0 priority, 0 focus, 12 all other Title I participating) missing data for all reading AMO targets; 8 Title I participating schools missing data for accountability status for 2013–14; and 64 schools missing data for 2012–13 Title I participation status.</b></p>
<p>Exhibit 10. What percentage of Title I participating priority, focus, and other schools had met the 95 percent participation rate requirement in reading?</p>	<p>No Title I participating school was reportedly accountable for the American Indian subgroup. In addition, no priority school was reportedly accountable for the Asian or White subgroups. Percentages greater than or equal to 99.5 percent are rounded to 100 percent. This exhibit is restricted to schools that provided a Title I Targeted Assistance (TAS) program or Title I Schoolwide program (SWP) in 2012–13 and reported improvement status for 2013–14. This exhibit excludes 99 schools, including 15 Title I participating schools (1 priority, 1 focus, 13 all other Title I participating) reportedly not accountable for any reading participation target; <b>12 Title I participating schools (0 priority, 0 focus, 12 all other Title I participating) missing data for all reading participation targets; 8 Title I participating schools missing data for accountability status for 2013–14; and 64 schools missing data for 2012–13 Title I participation status.</b></p>
<p>Exhibit 11. What percentage of Title I participating priority, focus, and other schools had met the state-defined annual measurable objective (AMO) targets in mathematics?</p>	<p>No Title I participating school was reportedly accountable for the American Indian subgroup. In addition, no priority school was reportedly accountable for the Asian subgroup. Percentages greater than or equal to 99.5 percent are rounded to 100 percent. This exhibit is restricted to schools that provided a Title I Targeted Assistance (TAS) program or Title I Schoolwide program (SWP) in 2012–13 and reported improvement status for 2013–14. This exhibit excludes 103 schools, including 19 Title I participating schools (0 priority, 1 focus, 18 all other Title I participating) reportedly not accountable for any mathematics AMO target; <b>12 Title I participating schools (0 priority, 0 focus, 12 all other Title I participating) missing data for all mathematics AMO targets; 8 Title I participating schools missing data for accountability status for 2013–14; and 64 schools missing data for 2012–13 Title I participation status.</b></p>
<p>Exhibit 12. What percentage of Title I participating priority, focus, and other schools had met the 95 percent participation rate requirement in mathematics?</p>	<p>No Title I participating school was reportedly accountable for the American Indian subgroup. In addition, no priority school was reportedly accountable for the Asian or White subgroups. Percentages greater than or equal to 99.5 percent are rounded to 100 percent. This exhibit is restricted to schools that provided a Title I Targeted Assistance (TAS) program or Title I Schoolwide program (SWP) in 2012–13 and reported improvement status for 2013–14. This exhibit excludes 99 schools, including 15 Title I participating schools (1 priority, 1 focus, 13 all other Title I participating) reportedly not accountable for any mathematics participation target; <b>12 Title I participating schools (0 priority, 0 focus, 12 all other Title I participating) missing data for all mathematics participation targets; 8 Title I participating schools missing data for accountability status for 2013–14; and 64 schools missing data for 2012–13 Title I participation status.</b></p>
<p>Exhibit 13. What percentage of Title I participating priority, focus, and other high schools had met the state-defined four-year adjusted cohort graduation rate targets?</p>	<p>No Title I participating high school was reportedly accountable for the American Indian subgroup. In addition, no priority high school was reportedly accountable for the Asian subgroup. Percentages greater than or equal to 99.5 percent are rounded to 100 percent. This exhibit is restricted to schools serving grade 12 that provided a Title I Targeted Assistance (TAS) program or Title I Schoolwide program (SWP) in 2012–13 and reported improvement status for 2013–14. This exhibit may include non-standard schools (i.e., schools with grade configurations not falling within the elementary, middle, or high categories) serving grade 12. This exhibit excludes 75 high schools, including 17 Title I participating high schools (2 priority, 1 focus, 14 all other Title I participating) reportedly not accountable for any graduation rate target; <b>8 Title I participating high schools (0 priority, 0 focus, 8 all other Title I participating) missing data for all graduation rate targets; and 50 high schools missing data for 2012–13 Title I participation status.</b></p>
