Subject: Regulation Changes

To Whom it may Concern,

I am a third year student at Ashford University Online. I chose Ashford for several reasons such as, it is an accredited school, it is affordable, and it is truly convenient for a single mother, such as myself. The economy has made it impossible to find a job with comparable pay to the cost of living. Although I work full-time, I have found a higher education to be a necessity if I am to obtain any quality of life. Ashford University has made this easy for me by keeping the financial obligations low, the teaching staff of high quality, and classes at an accelerated pace which means I can finish my degree in four years. Additionally, if regulations remain as they are, I am seriously contemplated continuing my education to receive a Masters degree. However, knowing the debt I am incurring now, if regulations change and education comes at a higher price, my decision will have been made for me and I know I will not be able to continue. My hope is that you will keep the regulations as they are so that I may continue my education with Ashford University. Thank you for your time.

Sincerely,

[REDACTED]
