Dear Ms. Macias:

On behalf of the students, faculty and staff of Western Career College – California, thank you for the opportunity to provide written comments concerning the forthcoming negotiated rulemaking process.

Western Career College is a leading provider of educational programs in Northern California that lead to careers in fields such as nursing, dental hygiene, dental assisting, medical assisting, pharmacy technology, ultrasound technology, veterinary technology, criminal justice and graphics and drafting.

We strongly support that students attending all accredited institutions of higher education, regardless of an institution's public, private not-for-profit or proprietary status, be availed the resources and equal opportunity to attend the institution of their choice. If the United States is to emerge from the current economic downturn, it will require all sectors of education and multiple access and engagement points for a diverse array of students.

Western also heeds the Department's and Obama Administration's call to address the academic progress of American students from cradle to career. For most, but especially first time, first-generation students, discovering tangible college pathways is key to attaining educational success.

We have always served the needs of the non-traditional student; our focus on retention and graduate placement set us apart from traditional education pathways. Our students look to us to help them transition from undereducated, street smart individuals with no employment opportunities beyond minimum wage jobs; to educated entry level professionals with earning potential between \$20 and \$30 per hour. We are the spark that ignites the first generation of college graduates that leads to an explosion of college graduates in subsequent generations.

Sincerely,

A solid black rectangular redaction box covering the signature area.
