Subject: Student Loan Justice ...

This letter/email is to protest the unfair practices associated with Federal and Private Student Loans. The Standard Consumer Protection Laws should apply to such an important aspect of American Citizens lives.

No one wants to default on their loans because it is a "Mark of Honor" to achieve a college education. However, the loans plus the interest are MUCH to high for most of us to afford. In pursuit of a Bachelor Degree I am already in debt for \$40,000 and I still have almost two years to go. It is very hard for a disabled, black, woman, to get a good-paying job and the debt repayment plans seem to be set up to make you fall behind in your payments and, the unfairness of additional interest and no way to escape those overly-large payments puts an unfair burden on us.
