**Subject:** Some Sort of Bail Out

Banks, Credit Card Companies, etc....all getting some sort of relief and bail out. As someone who has a large student loan - which I may never be able to completely pay off - why can't I get some sort of help? Some sort of bail out? The interest that I have is killing me. I can't keep up. I have lost my job and with the amount that I owe, I can barely pay the interest. I am not asking to have the entire student loan released. I am asking for some sort of help. I know that I have paid the principal - the amount that I took out - but with the interest at 8.25% (already consolidated), I just can't make ends meet. I really need some help and I am sure there are others just like me out there. Why can't the government help us?

Thanks.
