Subject: Sallie Mae

Hi, my name is [REDACTED]. I went to the Memphis College of Art. I graduated in 2006. After graduating I moved away from the country with no intention of avoiding Sallie Mae. At that time I had no idea of what kind of company it was. My family never had credit cards and taught me they were the devil, which isnt really good either because its a good way to establish credit. My point is I have never thought I would be stuck with such a corrupt company trying to get me to pay 1,500dollars a month.

My mom convinced me itd be a good idea to take out student loans, because all of the people she knows pays 100dollars a month. I thought this was reasonable, and was under the impression this is what Id be paying.

Being out of the country my mom sent my letter from Sallie Mae 6months later, by then I was already a delinquent on my loan.

The U.S.A will never prosper if people like me cant send money through the system to fluctuate. I dont care anymore honestly, I [REDACTED] America its a lying [REDACTED] and I have decided to change my nationality some day. I refuse to pay this [REDACTED] company and there [REDACTED] p credit company. Im not your typical American-I dont care about my credit-first off because i dont want a huge house-I like apt.s better-I [REDACTED] cars I can only take trains, I 'ont want kids, I dont want a credit card-so salie mae can go [REDACTED] itself with the .E.O's [REDACTED]! I hope America's [REDACTED] burns in flames-now how is that for being patriotic! Sallie Mae is eating the flesh of the young-its obese. They can take my teddy bear that i grew up with, because thats what I have of upmost value!-Thanks hope you shove your [REDACTED] up education system up China's [REDACTED] because the whole country will be China's [REDACTED] before to long. Which may not be bad, maybe whities can adopt eastern medicine-and healing techniques better for health than mcdonalds!
