Subject: Abolish Student Loans!

Student loans should be abolished. It is a terrible thing to start one's life in debt. I would never have gone to college if I had known that after borrowing \$70,000 to get a bachelor's and a master's, I would not be able to find a job!

Meanwhile, the interest and fees are accruing! Harvard has eliminated student loans as a way to finance a degree because they realize that the future is uncertain for an recent graduate, and that the burden of large debt can only have negative consequences.

I have been unemployed for three out of the last four years. My debts make me feel angry and victimized. [REDACTED] the student loan program!
