Subject: Student Loan Faults

To Whom It May Concern,

I feel that the Student Loan System needs to be checked concerning previous defaulted students. I am a perfect example. My student loan defaulted when I was a junior in college. However, since I had transferred from one college to another, no one bothered to check to see if I was still in college. Even though I told those collectors that I was still in college, they didn't care. They put me in default anyway. That has caused me 17 years of grief.

Also, since these loans have changed hands so many times, the paperwork and previous payments are getting lost. I have paid back some of my loans and they were never credited to my account. They even still have me owing for one of the loans that on my credit report is paid off.

Thank you for taking my comment. If you have any questions feel free to contact me at [REDACTED]

Utterly Disgusted,

[REDACTED]
