

Suggestion from Laura Rasar King

Issue Paper 2 – Admin Capability

Item 2 re: providing students clinical placement opportunities

(j) Makes a reasonable effort to provide students with clinical or externship....”

I suggest that the language be amended to state:

(j) Provides students with clinical or externship...”

The proposed language is too soft. If a program is going to accept a student they **MUST** be able to provide ALL required components for completion of the degree, particularly those related to licensure and certification.
