SUBJECT : Implementing the new funding formula under the IDEA—
Year of Age Cohorts for which FAPE is Ensured

The new IDEA funding formula for section 611 of Part B, which takes effect with the funds distributed this July, first allocates base amounts to States that are equal to the amounts they received of FFY 99 funds. Then 85 percent of any remaining funds are allocated among the States "on the basis of their relative populations of children aged 3 through 21 *who are of the same age as children with disabilities for whom the State ensures the availability of a free appropriate public education*" [emphasis added] and 15 percent of those funds remaining after the base payments are allocated "on the basis of the relative populations of children described [in the 85 percent clause] who are living in poverty." Section 611(e)(3)(A), see also 34 CFR §300.707 (same).

At this point all States are providing FAPE to all children with disabilities aged 3 through 17. State practice varies for children aged 18 through 21. For example, some States ensure FAPE for all children with disabilities through age 21 (and in some cases, even beyond that age). Some States ensure FAPE for all children who have not reached 21 by a date certain, such as September 1, and continue to ensure FAPE for children who turn 21 after that date for the remainder of the school year. Other States ensure FAPE for all children with disabilities through age 18, but allow LEAs to serve children with disabilities beyond that age.

In order to calculate State grants under section 611 of Part B this year, we have had to determine the age cohort to be used for determining the relative populations of the States based on the years of age for which a child with disabilities is ensured the availability of FAPE. The age cohort information is used in determining the population and poverty elements of a State's grant. Our rule for establishing the age cohort is quite simple -- all children with disabilities who are a particular number of years old must be ensured the availability of FAPE in order for that age year to be included in the State's relative population age cohort. For example, if a State ensures FAPE to children through the end of a school term or school year in which the child turns 21, the State is ensuring the availability of FAPE to all children with disabilities through age 20 years old, but is not ensuring the availability of FAPE to all who are 21 years old. Therefore, the last age year to be included in their relative population age cohort would be 20.

The attached chart identifies, by State, in the second column, the year of age cohorts that we used to determine relative population for the population and poverty elements of the formula. The third column provides a description of how the State determines the upper age for the provision of FAPE, taken from State documents.

We ask you to carefully review this information. If you believe there are any errors, we need to be notified immediately. We expect to make final distributions of FFY 2000 grants on October 1, 2000, and cannot make adjustments after mid-September. Any unresolved problems will affect the grants to all States. If we do not hear from your State by July 31, 2000, we will assume you agree with our determination.

If you have any questions about this memo, please contact Ruth Ryder at (202) 205-5547 or Larry Wexler at (202) 205-5390.
