TIMELINE ON A CHILD’S DEVELOPMENT

A child grows and changes very quickly. As you read and play with your child, watch for typical milestones such as these.

0–18 MONTHS

talking  A baby cries when needing something and coos when happy. The child will babble and say a few words by this age.
reading  A baby will chew books at first, but the more you read the stories inside, the more likely the child will be able to turn pages and name pictures.
writing  Slowly the child will learn to use his or her hands for actions ranging from reaching and grabbing for objects to scribbling on paper in crayon.

18–36 MONTHS

talking  A child forms short sentences using the new words learned.
reading  A child can find the book he or she wants by its cover—and will ask you to read it!
writing  A toddler can hold a marker, and scribbles made look a little like writing.

3–4 YEARS

talking  A child can really talk by this age—about everything he or she sees and does (though your child might choose to watch quietly instead).
reading  A child starts to learn the alphabet and looks for familiar letters in his or her world.
writing  Your child will want to write just like you do. Before long, your child will write his or her name.

5–6 YEARS (TYPICALLY KINDERGARTEN)

talking  Your child is learning to rhyme at this age—have fun together!
reading  A child can retell a book from memory by recognizing a few words and looking at the pictures.
writing  A child begins to write words the way they sound, using mostly consonants.

6–7 YEARS (TYPICALLY FIRST GRADE)

talking  A child can imagine and describe what might happen next in a story.
reading  A child uses the sounds of letters to read words he or she doesn’t know by sight.
writing  A child will start to express himself or herself in writing, perhaps in a note to a friend or a story.

7–9 YEARS (TYPICALLY SECOND–THIRD GRADE)

talking  After years of being read to, a child can make up his or her own story, with characters, places, and drama.
reading  A child will begin to read faster, in whole phrases instead of word by word.
writing  A child knows that writing has many steps, from thinking and organizing ideas to fixing mistakes.
When parents are PARTNERS in their children's education, children will be more successful learners and better citizens.

Are you a PARTNER in your children's education?
