

April 15, 2011

The Honorable Arne Duncan  
Secretary of Education  
U.S. Department of Education  
400 Maryland Avenue, SW  
Washington, D.C. 20202

Dear Secretary Duncan:

On behalf of Texas teachers and the schoolchildren they educate, I am enclosing Texas' application for \$830 million in funds now available to Texas under the Education Jobs bill passed by Congress and signed into law in 2010.

Texas has been denied access to its share of these funds for nearly nine months because of an amendment added to the Education Jobs bill by Representative Lloyd Doggett, an amendment that required Texas to make assurances required of no other state as a condition of receiving funds.

Thanks to the hard work of Governor Rick Perry, Congressman Michael Burgess, Senator Kay Bailey Hutchison, Senator John Cornyn, and other members of the Texas Congressional delegation, this "anti-Texas" amendment has been repealed as a result of the President signing into law H.R. 1473. Texas is pleased to be applying for Education Jobs funding under the same requirements as every other state in a manner that is allowable under our state's constitution.

In accordance with the Education Jobs bill and your request in a letter to me dated September 14, 2010, Texas' application is being submitted under the alternative distribution method described in section 101(8) of the Education Jobs bill. Attached please find documentation demonstrating that Texas meets all necessary requirements to receive funding.

Upon your approval, the Texas Education Agency will quickly make all funding available to Texas school districts and will not retain any funding, other than an amount for program administration that is less than the amount allowed by law. Funding will be allocated to districts under the state's public education formulas. Consistent with the Education Jobs bill, districts will have discretion to decide how to use the funds within the parameters of federal law, and districts that have funds remaining after the 2010-2011 school year may use remaining funds through September 30, 2012.

I look forward to hearing from you.

Sincerely,

Robert Scott  
Commissioner of Education

**A.**

According to *Initial Guidance for States on the Education Jobs Fund*, which can be found at <http://www2.ed.gov/programs/educationjobsfund/governors-ed-jobs-guidance-final-8-13-10.doc>, page 11, the following principles govern the Education Jobs program elementary and secondary education MOE requirements:  
A State may establish its level of State support solely on the basis of the amount of funds provided through its primary elementary and secondary education funding formula(e), but is not required to do so. The formula(e) must include the State's base or foundation formula(e).

**B.**

According to *Initial Guidance for States on the Education Jobs Fund*, which can be found at <http://www2.ed.gov/programs/educationjobsfund/governors-ed-jobs-guidance-final-8-13-10.doc>, page 11, the data used to determine levels of support must include only State support for education. Federal funds are not considered part of State support.

**C.**

According to *State Maintenance-of-Effort Submission under the Education Jobs Fund Program*, MOE Method 2, page 4, which can be found at <http://www2.ed.gov/programs/educationjobsfund/moe-states.doc>, for the FY 2010 baseline data, a State must provide documentation substantiating – The State's final appropriations or expenditures for elementary and secondary education and for public IHEs. Such documentation may include tables or text from official State budget documents (e.g., a State budget summary or table of expenditures from the State's accounting system). For the projected FY 2011 data, a State must provide - Enacted or estimated appropriations to establish levels of support for education.

**D.**

According to *State Maintenance-of-Effort Submission under the Education Jobs Fund Program*, MOE Method 2, page 4 "Source Document," which can be found at <http://www2.ed.gov/programs/educationjobsfund/moe-states.doc>, final total State revenues for the baseline year - These data would include both general and special revenues from sources such as personal income taxes, corporate income taxes, and sales and use taxes. Some States have revenues that are dedicated to particular activities and are not available to the State to support elementary, secondary, or postsecondary education. A State may, if it chooses, exclude from its total revenues those dedicated revenues that are unavailable to support elementary, secondary, or postsecondary education provided that, subsequent to August 10, 2010 (the date of enactment of the Ed Jobs statute), the State has not increased the basis on which the dedicated revenues are derived. For example, if a State has revenues from gasoline taxes that are available only for transportation projects, the State may exclude all such revenues from total State revenues if the State that has not increased its gasoline taxes since August 10, 2010. If a State chooses to exclude dedicated revenues, it must do so for both FYs 2011 and 2010. Furthermore, as part of its application, the State must identify the source and amounts of any dedicated revenues excluded.

Documentation substantiating revenue available to the state as required by USDE MOE Method 2 page 4 available at <http://www2.ed.gov/programs/educationjobsfund/moe-states.doc>

For FY 2010 baseline data, a State must provide documentation substantiating - Final total revenues for the baseline year. These data would include both general and special revenues from sources such as personal income taxes, corporate income taxes, and sales and use taxes. Some States have revenues that are dedicated to particular activities and are not available to the State to support elementary, secondary, or postsecondary education. A State may, if it chooses, exclude from its total revenues those dedicated revenues that are unavailable to support elementary, secondary, or postsecondary education provided that, subsequent to August 10, 2010 (the date of enactment of the Ed Jobs statute), the State has not increased the basis on which the dedicated revenues are derived. For example, if a State has revenues from gasoline taxes that are available only for transportation projects, the State may exclude all such revenues from total State revenues if the State that has not increased its gasoline taxes since August 10, 2010. If a State chooses to exclude dedicated revenues, it must do so for both FYs 2011 and 2010. Furthermore, as part of its application, the State must identify the source and amounts of any dedicated revenues excluded.

For 2011 projected FY 2011 data, a State must provide - The most recent State revenue estimates.
