MOE Method 1 Source Documentation

For the FY 2009 baseline data, a State must provide documentation substantiating the State's final appropriations or expenditures for elementary and secondary education and for public IHEs. Such documentation may include tables or text from official State budget documents (e.g., a State budget summary or table of expenditures from the State's accounting system). A State that establishes its level of State support for elementary and secondary education on a per-pupil basis must also provide final enrollment data and other data that may be necessary to verify the State's reported per-pupil amount.

For the projected FY 2011 data, a State must provide enacted or estimated appropriations levels. Such documentation may include a Governor's budget proposal, legislative budget proposals, or enacted appropriations. A State that establishes its level of State support for elementary and secondary education on a per-pupil basis must also provide estimated enrollment data and other data that may be necessary to verify the State's estimated per-pupil amount.

Following the close of State FY 2011, the Department will be collecting final appropriations or expenditure data for that fiscal year to verify that the State met the statutory MOE requirements.
