

Notes on i3 Intents to Apply Summary Document

1. Organizations were not required to submit an intent to apply, nor are they required to apply once they have submitted an intent, so this may not be a wholly accurate predictor of the number of applications we will actually receive or of the sources of applications.
2. Many of the intents to apply were incomplete (i.e., they did not indicate the type of grant for which they are applying, they did not indicate under which one absolute priority they would be applying, etc), so we captured these intents but they may only contain the partial information that we received.
3. Some potential applicants submitted multiple intents to apply, in some cases indicating different priorities or grant types, in some cases not. Therefore, the summary information is an estimate used for planning purposes only and we have only released the names and locations of potential applicants to facilitate identification and potential connections.
4. We collect this information with the goal of informing our internal planning (i.e., Have we lined up enough peer reviewers? Are there consistent patterns we should address through targeted guidance or FAQs?) and find it helpful for that purpose.
