

Race to the Top Assessment Annual Performance Report

CFDA Number: 84.395B

**U.S. Department of Education
Washington, DC 20202**

INSTRUCTIONS FOR GRANTEEES: Below, please provide the name of the consortium for which this report is prepared and the date it was submitted to the U.S. Department of Education. Complete Sections One and Two according to the guidelines provided in each of those sections along with the definitions included at the end of this form. Questions about preparing the report should be sent to your program officer. The completed report should be submitted electronically as a PDF document to your program officer by no later than August 15 of each reporting year. The final report is due on January 15, 2015. The Annual Performance Reports from both consortia will be posted on the Department's website as public documents.

NAME OF REPORTING CONSORTIUM:

DATE SUBMITTED:

Purpose

The Race to the Top Assessment (RTTA) Annual Performance Report (APR) will document grantees' progress toward the development of an assessment system by a consortium of states that measures student knowledge and skills against a common set of college- and career-ready standards in mathematics and English language arts. The assessment system will cover the full range of those standards, elicit complex student demonstrations or applications of their knowledge and skills as appropriate, and provide an accurate measure of student achievement across the full performance continuum over a full academic year. The system will include one or more summative assessment components in mathematics and in English language arts that are administered at least once during the academic year in each of grades 3 through 8 and at least once in high school. The assessment system will include all students, including English language learners and students with disabilities. The system will produce student achievement data and student growth data that can be used to inform determinations of school effectiveness; individual principal and teacher effectiveness for purposes of evaluation; principal and teacher professional development and support needs; and teaching, learning, and program improvement.

The APR is one component of the U.S. Department of Education's (ED's) review of the RTTA program. In addition to providing basic financial information, the APR provides information on the grantees' progress in meeting key indicators for both the RTTA absolute priority (development of an assessment system as described above) and competitive preference priority (collaboration and alignment with higher education). Additional information about the grantees' progress is gathered through monthly calls and an annual review process. These activities also help to identify areas where technical assistance may be needed. Both the APR and the Department's final report from the annual review process will be made publicly available on ED's website in order to provide all stakeholders with progress updates on the development of the new assessment systems.

SECTION ONE. Key Indicators of Progress and Impact

Complete the summary tables below for the appropriate year of the grant. Use the notes field following each table as needed to explain the data provided, including explanations for any decreases from previously submitted data. For Table 3 on page 6, please add rows as needed, and include an explanation for how LEAs were assessed on meeting the minimum requirements. See Section Three for definitions of selected terms, as originally provided in the Notice Inviting Applications (75 FR 18171).

Table 1. State Participation

The program requires that each consortium include a minimum of 15 states, of which at least 5 states must be Governing States.

Performance Measure	Grantee Response						
	Application Data	July 1, 2011	July 1, 2012	July 1, 2013	July 1, 2014	FINAL 9/30/14	
1.1.1 Number of states in the consortium by participation level	Governing States						
	Participating States						

Notes:

Table 2. Progress Indicators

The performance measures below were included in the Notice Inviting Applications for the RTTA program and are used for compliance with the Government Performance and Results Act as well as illustrating grantee progress against program goals.

Performance Measure	Grantee Response					
	Application Data	July 1, 2011	July 1, 2012	July 1, 2013	July 1, 2014	FINAL 9/30/14
1.2.1 Number of states in the consortium that have formally adopted a common set of college- and career-ready standards in math and English language arts (ELA)						
1.2.2 Number of states that have fully implemented the summative assessment components of the assessment systems developed by the consortium						
1.2.3 Number of institutions of higher education (IHE) that are working with the grantee to design and develop the final high school summative assessments in math and ELA						

Performance Measure	Grantee Response					FINAL 9/30/14
	Application Data	July 1, 2011	July 1, 2012	July 1, 2013	July 1, 2014	
1.2.4 Number of IHEs that have implemented policies that exempt from remedial courses and place into credit-bearing college courses students who meet the achievement standard for the final high school summative assessments in math and ELA and any other placement requirements						
1.2.5 Percentage of direct matriculation students in public IHEs that are enrolled in IHEs that are working with grantees to design and develop the final high school summative assessments in math and ELA and/or have implemented policies that exempt from remedial courses and place into credit-bearing college courses students who meet the achievement standard for the final high school summative assessments in math and ELA						

Notes:

SECTION TWO. Financial Expenditures

Report the actual expenditure totals for each of the budget categories listed in Section 2A. Include federal supplemental grant funds in the totals provided for each budget category, as applicable. For Section 2B, report the total amount of non-federal and non-SEA funds (e.g., foundation funds) used to support the work of the consortium.

Section 2A – Budget Summary U.S. Department of Education Funds					
Budget Categories	July 1, 2011	July 1, 2012	July 1, 2013	July 1, 2014	TOTAL FOR THE GRANT (9/30/14)
1. Personnel					
2. Fringe Benefits					
3. Travel					
4. Equipment					
5. Supplies					
6. Contractual					
7. Training Stipends					
8. Other					
9. Total Direct Costs (Lines 1-8)					
10. Indirect Costs					
11. Total Costs (Lines 9-11)					

Section 2B – Budget Summary Non-Federal Funds					
	July 1, 2011	July 1, 2012	July 1, 2013	July 1, 2014	TOTAL FOR THE GRANT (9/30/14)
Total amount of non-federal funds used to support the work of the consortium					

Notes:

Definitions

Achievement standard means the level of student achievement on summative assessments that indicates that (a) for the final high school summative assessments in mathematics or English language arts, a student is college- and career-ready (as defined below); or (b) for summative assessments in mathematics or English language arts at a grade level other than the final high school summative assessments, a student is on track to being college- and career ready. An achievement standard must be determined using empirical evidence over time.

College- and career-ready (or readiness) means, with respect to a student, that the student is prepared for success, without remediation, in credit-bearing entry-level courses in an Institution of Higher Education (as defined in section 101(a) of the Higher Education Act), as demonstrated by an assessment score that meets or exceeds the achievement standard (as defined in this notice) for the final high school summative assessment in mathematics or English language arts.

Common set of college- and career-ready standards means a set of academic content standards for grades K-12 that (a) define what a student must know and be able to do at each grade level; (b) if mastered, would ensure that the student is college- and career-ready (as defined above) by the time of high school graduation; and (c) are substantially identical across all States in a consortium. A State may supplement the common set of college- and career-ready standards with additional content standards, provided that the additional standards do not comprise more than 15 percent of the State's total standards for that content area.

Direct matriculation student means a student who entered college as a freshman within two years of graduating from high school.

Governing state means a state that (a) is a member of only one RTTA consortium, and (b) has an active role in policy decision-making for the consortium, and (c) is committed to using the assessment system or program developed by the consortium.

Participating state means a state that is a member of the consortium, but may also be a member of another consortium and does not play the full role of a Governing State as defined above.

Student achievement data means data regarding an individual student's mastery of test content standards. Student achievement data come from summative assessment components and must be reported in a way that can be reliably aggregated across multiple students at the subgroup, classroom, school, LEA, and State levels.

Student growth data means data regarding the change in student achievement data (as defined above) between two or more points in time. Student growth data from summative assessment components must be reported in a way that can be reliably aggregated across multiple students at the subgroup, classroom, school, LEA, and State levels and over a full academic year or course.
