### Part 2A: Update of Maintenance-of-Effort Data

#### **3(a) Identify and describe the data sources used in determining the levels of State support for elementary and secondary education:**

Oregon will comply with the elementary and secondary education MOE requirements on an aggregate basis using the amount of funds provided to LEAs through the State's primary funding formulae, the State School Fund and the School Improvement Fund.

For FY 2006, this amount of funding is described in 2005 Senate Bill 5510 section 4(1).

For FY 2008, this amount of funding is described in 2007 House Bill 5020 section 4(1), plus the portion of 2007 House Bill 5021 that was expended during FY 2008, plus the funds described in 2008 Senate Bill 5556 section 24.

For FY 2009 "prior-enacted," this amount of funding is described in 2007 House Bill 5020 section 4(2), plus the portion of 2007 House Bill 5021 that was expended during FY 2009.

For FY 2009, this amount of funding is described in 2007 House Bill 5020 section 4(2), plus the portion of 2007 House Bill 5021 that was expended during FY 2009, plus 2009 Senate Bill 5552 section 1(4) for State School Fund and School Improvement Fund.

FY 2010, this amount of funding is equal to the amount in 2009 Senate Bill 5520 section 5(1) minus the amount of ARRA funds distributed to LEAs (\$160,000,000).

For FY 2011, this amount of funding is equal to the amount in 2009 Senate Bill 5520 section 5(2) minus the conditional amount in section 10(2)(c) (\$200,000,000); and minus an estimate of additional Common School Fund (local revenue) that may be available during this year (\$19,140,000); and minus the amount of ARRA funds to be distributed to LEAs (\$66,099,942).

#### **3(b) Identify and describe the data sources used in determining the levels of State support for public IHEs:**

Unlike primary and secondary education, State support for institutions of higher education is approved on a biennial basis. The following identifies legal authority for State support for IHEs and the additional records that were consulted to identify annual expenditure of authorized funds. ## I. ASSURANCES (a), (c), AND (d)

### Plan for Indicator (a)(1):

#### Responsible Agency:

The Oregon Department of Education is the responsible agency for collecting and making these data publicly available. Of the five offices comprising the agency, the Office of Educational Improvement and Innovation is responsible for fiscal and programmatic oversight of efforts concerning teacher quality. In conjunction with the Office of Assessment and Information Services, data are collected, validated, analyzed, and reported. Reporting of these data is accomplished through the publication of the Statewide Annual Report Card. Each office has full-time staff dedicated to these functions.

**Organizations Providing Technical Assistance:** None.

**Overall Budget:** No additional budget needed.

**Source of Funds:** Federal Funds.

#### Progress Reports

The state shall post announcements for stakeholder review, and for meetings of advisory committees. Progress reports will be posted on the agency website as milestones are achieved.

#### Milestones

Date	Milestone
Mar 2011	Data collection window closes.
June 2011	Data review and validation completed.
August 2011	Data analysis completed.
Sep 2011	Publication of data in annual state report card.

#### Review and Verification of Data

ODE determines the content expert for the required data (data owner), who works with internal and external partners to determine the data elements needed, and the design of the data collection tool. The data owner manages the process of collecting the data from district submitters. Once collected, the data owner works with internal partners to determine the requirements for extracting the data from our information systems, based on reporting needs, and determines other appropriate data sources. The IT section works closely with the data owner, and supporting staff, on the extraction rules for the required data. The process is documented and the necessary IT structures created so the results can be replicated with accuracy. The resulting data set is sent to the data owner for validation and verification. The data owner works with analyst staff to analyze the data and either recommends changes to the extraction requirements or signs off that the required data is correct.

#### Potential Obstacles

There are no prohibitions in state law or policy regarding this measure.

**Responsible Agency:**

The Oregon Department of Education is the responsible agency for collecting and making this information publicly available. Of the five offices comprising the agency, the Office of Educational Improvement and Innovation is responsible for fiscal and programmatic oversight of efforts concerning teacher quality and takes the lead in crafting the state’s Equity Plan. **Review and Verification of Data**

ODE determines the content expert for the required data (data owner), who works with internal and external partners to determine the data elements needed, and the design of the data collection tool. The data owner manages the process of collecting the data from district submitters. Once collected, the data owner works with internal partners to determine the requirements for extracting the data from our information systems, based on reporting needs, and determines other appropriate data sources. The IT section works closely with the data owner, and supporting staff, on the extraction rules for the required data. The process is documented and the necessary IT structures created so the results can be replicated with accuracy. The resulting data set is sent to the data owner for validation and verification. The data owner works with analyst staff to analyze the data and either recommends changes to the extraction requirements or signs off that the required data is correct.

**Potential Obstacles**

There are no prohibitions in state law or policy regarding this measure. Insufficient existing FTE is an obstacle of serious concern.

**Plan for Indicator (a)(7):**

**Review and Verification of Data**

ODE determines the content expert for the required data (data owner), who works with internal and external partners to determine the data elements needed, and the design of the data collection tool. The data owner manages the process of collecting the data from district submitters. Once collected, the data owner works with internal partners to determine the requirements for extracting the data from our information systems, based on reporting needs, and determines other appropriate data sources. The IT section works closely with the data owner, and supporting staff, on the extraction rules for the required data. The process is documented and the necessary IT structures created so the results can be replicate with accuracy. The resulting data set is sent to the data owner for validation and verification. The data owner works with analyst staff to analyze the data and either recommends changes to the extraction requirements or signs off that the required data is correct.

**Potential Obstacles**

There are no prohibitions in state law or policy regarding this measure. Timely and accurate reporting from district sponsors will be addressed.

**Plan for Indicator (d)(12):**

**Responsible Agency:**

The Oregon Department of Education is the responsible agency for collecting these data and making them publicly available. Of the five offices comprising the agency, the Office of Educational Improvement and Innovation (EII) is responsible for fiscal and programmatic oversight for Charter School activities. Full-time is dedicated to these activities.

**Organizations Providing Technical Assistance:**

**District Sponsors**

District sponsors will provide accurate data regarding closed charter schools. Closures will adhere to ORS 338.105 and 338.065 as required.

**Overall Budget:** 0.25 FTE of an Education Specialist 2 classification for the duration of the project using existing agency personnel.

## PART 3C: GENERAL REQUIREMENTS

- (1) Describe the processes the State employs to review and verify the required data and other information on the indicators and descriptors.

ODE determines the content expert for the required data (data owner), the source of the data, and the requirements for extracting the data from our information systems. Our IT section works closely with the data owner, and supporting staff, on the extraction rules for the required data. The process is documented and the necessary IT structures created so we can replicate the results. The resulting data set is sent to the data owner for validation and verification. The data owner works with their staff to analyze the data and either recommends changes to the extraction requirements or signs off that the required data are correct.

- (2) Describe the processes the State employs to ensure that, consistent with 34 CFR 99.31(b), the required data and other information are not made publicly available in a manner that personally identifies students, where applicable.

ODE started collecting student information in school year 2001-2002 and has added new student-level data collections each school year. Data collected is secured from unauthorized disclosure by:

- Encrypting data sent/received electronically (SSL)
- Restricting data access to authorized individuals through district superintendent selection of a local security administrator to control access to each data system; and advising districts that those authorized be required to sign confidentiality forms
- Restricting ODE IT staff, research staff, and data owner access to student data through a formal request/approval process; including annual department wide staff security training and annual signing of an acceptable use policy
- Providing data to the Public only in aggregate and implementing appropriate data suppression based on cell size
- Removing personal identifiers when researchers are authorized access to microdata
