Name of Project	Teacher Apprenticeship Program
City, State	Oakland, California

### **PROJECT ABSTRACT**

Holy Names University envisions a teacher education program that implements the coherent pieces of teaching and learning it shares with its LEA partners, one that integrates clinical work with coursework seamlessly so that the two mutually reinforce and reflect the common standards of professional practice that ensures every K - 12 student receives a world - class education. To realize this vision, we propose an undergraduate - graduate residency (apprenticeship) and internship program based on professional teaching standards and informed by research of effective practice.

We are committed to supporting our novice teachers from the beginning of their coursework through the second year of their induction.
